Interment was made in the cemetery at that place.

Toleration of Filth.

Cleanliness means more than washing the hands and face and body. means the keeping of one's surroundings free from influences which must taint the air we breath, our food and our drink. Epidemics are not to be prevented without such cleanliness.

What a vast number of fatal ills ven at this day, when the virtue of cleanliness is more widely recognized than ever before, is due to the toleration of filth.

Thousands on thousands of dwellers on farms, or in small villages in this country permit dangerous nuisances about their premises—such as neglected vaults under the sleeping rooms, cellars unventilated and taining decaying vegetables and fruits sink drains emptying close by door ways, stables too near the house, or wells within filtering distance of sta-

The people who tolerate these nuisances only too often have to pay the penalty in typhoid and other fevers, diphtheria and filthy disease of other kinds. In many country districts which should be almost perfectly healthy fevers are shockingly preval-ent, and generally they are traceable to domstic nuisances of this kind.
