

WORK TO BE DONE ON NEW DEATH HOUSE

MUST BE ERECTED SOON TO COMPLY WITH ACT.

BRIEF DESCRIPTION OF BUILDING

Will Be a Concrete Structure 32x228 Feet in Dimension, and Built Two Stories High—All Executions Will Take Place Therein.

Just on the brow of the hill to the southwest and in sight of the little flag station known as Rockview, this county, will be located the first "death house" for the electrocution of condemned murderers ever erected in Pennsylvania. Passengers in the future can see from the trains on the Lewisburg branch, the building where those convicted of the high crime of murder must answer to their fellow-men for their misdeeds.

The site has already been staked out and work on its construction will start next spring. The last legislature passed an act abolishing the rope for capital punishment upon persons convicted of murder committed after the approval of the act, which occurred on July 19. An appropriation of \$50,000 was made for the construction and equipment of the death house.

The death house will be erected on what was the Dreese farm and will be built of reinforced concrete, two stories in height. The main building will be about 228 feet long and 32 feet wide. On the first floor will be the apparatus for heating and lighting purposes and other machinery and offices for the officials in charge. In the center will be a large hall leading up to the second floor. To the right of this hall on the second floor will be the cell house where the condemned men awaiting execution will be confined. There will be six cells and a bath room in this section. The execution room will also be on the second floor to the left of the main hall. In this room will be the electric chair, so located that the condemned man will not see it on first entering the room on the day of execution. To the right of the chair will be the witness chairs for the jury and physicians. Next beyond will be the post mortem room. There will also be rooms in the upper hall for visitors. The bids call for an electrocution apparatus including a chair made by the Adams Electric Company, of Trenton, N. J., or one equally as perfect. The building will be quite an imposing one, perfect in all its details and built of the very best materials. The plans and specifications were drawn by John T. Winderlich & Co., architects of Philadelphia, Pa., and are complete in every particular. The bids for the construction of the building are to be opened on October 14th. It behooves our local contractors to be busy if they desire the work. There are separate specifications for the electrical apparatus and wiring; heating and ventilation, plumbing, construction work and the furnishing of materials.

On Tuesday afternoon a representative of this paper had the privilege of visiting the new Western Penitentiary and inspecting the work so far accomplished toward the erecting of what promises to be one of the greatest penal institutions in this country. While the work is still in its infancy, there is enough to be seen of an interesting character, to show just how this great commonwealth is progressing in its efforts to better its penal system. Situated as it is in a beautiful valley, where the air is clear and sweet and with an unfailing supply of pure water, it is an ideal place for such an institution.

Getting off the train at Rockview station (former station) you are within sight of the main prison office, now located in the farm house on what was the farm of Reuben Crust. This has been comfortably and cosily fitted up as the offices of Warden John Francis and here the administration of affairs is directed. A short distance from the station an immense stone crusher is at work busily engaged in crushing stone for the roads now rapidly being constructed to the various penitentiary grounds. Opposite the station a freight house erected by the penitentiary for the receiving and sending of freight. A walk of about five minutes over the brow of the hill to the west brings you to what is now the main prison and the scene of the principal activities. Here in the old stone farm house on the Ishler farm is the cell house. The barred windows here, however, are the only sign to indicate that you are in prison bounds. On the ground floor are cages containing canary birds singing sweetly, as if there was not a care or sorrow in this big world. The balance of the house is fitted up as cells and in each room are eight cots on which the prisoners sleep. Just to show how crowded and thoughtful the officers are, the prisoners, whose duties require them to arise the earliest in the morning, are placed down stairs so as not to awaken the balance of the sleeping men. There are 42 men quartered in this building at present. Down in the Lutz farm house near the College road, 22 men are domiciled, making 64 prisoners in all now at the penitentiary. Since the work began there have been 132 men brought here from Pittsburgh, many of whom have left their time having expired. The terms which the men now on the ground have to serve, range from eighteen months to three years. The last man brought here has over a year to serve. At present the men take their meals in what was formerly the Ishler barn which

BIRTHDAY GATHERING.

Held in Honor of Mr. Charles Lucas, of Runville, Last Saturday.

A pleasant gathering of the friends and neighbors of Mr. Charles Lucas, of Runville, on Saturday last week, was the honor bestowed upon Mr. Lucas on reaching his eightieth birthday. The day was a delightful one and the morning train brought a number of guests from Altoona among them being: Franklin Lucas, Mr. and Mrs. Evan Lucas, Mr. and Mrs. Ira Wagner, Mr. and Mrs. A. C. Lucas, Mr. and Mrs. W. A. Himstead, Mr. and Mrs. W. L. Davis, Mrs. T. G. Lucas, Mrs. C. C. Mountain, Mrs. Erby Huffard, Martin Kenneth, Donald Lucas, Gerald Huffard, Mr. and Mrs. George W. Heaton, of Greenwood, former residents of Runville; Mr. and Mrs. R. B. Lucas, of Fairview; Mr. and Mrs. C. Wittmer, of Bellefonte. The neighbors of Mr. Lucas who were present were the following: Mr. and Mrs. Elias Hancock, Mr. and Mrs. John, Mr. and Mrs. George Lucas, Mr. and Mrs. Cornelius Friel, Rev. Sommers, H. F. Irvin, Chas. Smoyer, Mrs. Addie Resides, Mrs. Lucy and Ida Poorman, Hannah Kunes, Master Edward Gross, Miss Lucy Smoyer in addition to Mr. and Mrs. L. J. Heaton, sons-in-law, and daughter of Mr. Lucas, who reside in the county. The entire party numbered about eighty-four, and formed a joyous group when seated to the bountiful repast which had been prepared. The afternoon was taken up with conversation, singing and rendering of instrumental music, the latter furnished by Mrs. W. L. Davis, assisted by a number of the others in vocal sections. Mr. Davis took a picture of the entire group which was finished and will add another interesting feature to the occasion. Not one present more keenly enjoyed the day than the venerable man to whom the honors were being paid, and the unanimity of opinion is expressed that he may live to round out a century of birthdays.

REACHED 80th BIRTHDAY.

Friends of Mingoille Man Celebrate the Important Event.

Last Thursday, the 80th anniversary of Frank W. Sharp was celebrated by a jovial party at his residence at Mingoille. A sumptuous dinner was served and the afternoon was spent in a pleasant social manner. Those present were as follows: Daughters and sons—Mrs. Catherine Dunkle, Altoona; Wesley Sharp and Mrs. Phoebe Yarnell, Jacksonville; Mrs. Mary Sproul, Mingoille; Mrs. Mattie Frazier, Newark; Del. Grandchildren—Misses Verma and Rena Sproul, Mingoille; Wm. Sproul; Mrs. Lizzie Alters, Lamar; Mrs. Grace Spencer, Huntingdon county; Isaac Yarnell, Misses Phoebe and Alice Yarnell, Jacksonville. Grandchildren—Misses Marian, Edna and Mildred Alters, Lamar; Clair Dunkle, Altoona; Miss Phoebe Spencer, Huntingdon county. Other guests were: Samuel Sproul, Mrs. Sarah Harnish, Mrs. Gertrude Hill, John B. Rossman and family, Mrs. Mary J. Shamp, Mingoille; William Yarnell, Jacksonville; Mrs. Annie Miller, Mrs. Alice Young, Bellefonte; Mrs. John W. Keller, Lamar. Quite a number of grand and great-grandchildren were present.

Preacher After Chicken Thieves.

There is at least one parson in Centre county who believes in the strictest method of dealing with chicken thieves. The Phillipsburg Journal recites an incident as follows: The home of Mrs. Alice Dawson on Spruce street was visited by chicken thieves one night recently about midnight. Rev. J. H. Keller, who lives next door, heard the chickens flutter and in that instant was out of bed and at the window with the gun. It was very dark, but he shot in the direction of the noise, and immediately there was a scramble to get away. One fellow ran on Mrs. Dawson's porch under cover, while Rev. Keller sent a second shot after the man who fled behind the barn. While the Reverend was reloading, the fellow on the porch took to his heels and escaped. Mrs. Dawson examined the coop afterward and found the chickens all in the outside yard, but none were missing. Let all sneak thieves and night prowlers notice Rev. Keller's home or that of his neighbor's take warning, for he shoots to hit and not simply to scare.

Decapitated by Train.

Hans Reide, of Orviston, employed on the construction train of the N. C. railroad, was instantly killed near that place Saturday evening about 9:30 o'clock, by being struck by a freight. He was terribly mangled, his head and both feet having been cut off. From some of the evidence adduced at the coroner's inquest, it was thought that he deliberately laid on the track. However the coroner's jury returned a verdict of accidental death. The young man was aged about 25 years, and was unmarried. The remains were taken to Blanchard for burial.

One Way of Settling It.

Friday evening's Altoona Mirror says: "Proprietor Thomas McCarthy, of the Fifth Ward Hotel, shortly after midnight this morning, found two men interfering with his auto, standing in front of the hotel, and when he told them to quit, one made a vile remark about the proprietor's daughter, and then ran. McCarthy pursued him across the Seventeenth street bridge, caught him and, after administering a severe beating, went to police station, reported the affair and left security for his appearance at a hearing tonight."

Postoffice Takes Stock.

The postoffice at Bellefonte and postoffices all over the United States began Monday taking inventories to learn the value of all department property and equipment. The work will go on until an inventory in minutest detail has been completed in every one of Uncle Sam's 83,000 postoffices and their branches throughout the United States and insular possessions, as well as in all the mail cars. The inventory is expected to take several months.

—See "Dear Uncle Billy" at the opera house Monday night.

CLOSING SESSIONS OF STATE COLLEGE'S NEW PRESBYTERIAN CHURCH

WILL BE FORMALLY DEDICATED ON SUNDAY.

ERECTED AT COST OF \$50,000.

A Handsome and Imposing Edifice of Gothic Architecture—Commodiously Planned to Accommodate Students Attending Penna. State College.

An occasion of importance and interest to the congregation at State College, as well as Presbyterians in general throughout the state, will be the dedication of the handsome new church, built by that congregation at State College, next Sunday, October 5th. A program, appropriate to the day and event, has been prepared, and the services will no doubt be attended by people from all over the state. The sermon will be preached by Rev. Joseph W. Cochran, D. D., secretary of the Board of Education, and the

Court convened on Monday morning at ten o'clock. The list of jurors was called, excuses allowed for good and sufficient reasons, after a number of motions and petitions as presented by the several members of the bar were heard and disposed of.

On motion of N. B. Spangler, Ivan Walker, a student at law for the past three years in Mr. Spangler's office, and who passed a satisfactory examination before the State Bar Examination Board, was admitted to practice in the several courts of Centre county.

Civil cases on last week's list and not heretofore reported were disposed of as follows: Clement Hale, executor of Austin Swisher estate vs. Pearl C. Gray, agent, being an appeal, was continued pending terms of settlement.

G. Antis Confer and John G. Confer, now to the use of G. Antis Confer vs. Chester L. Neff, being an appeal, settled.

The second week's trial list was gone over again on Monday morning and the following cases disposed of: David McCloskey, William Hoover, Margaret Miller, Rebecca Welsh, Martha B. Iddings, Elsie Johnston, Adaline Wood, Jacob McCloskey, Emma Walker, Elizabeth S. Falls, Mary J. Sayer, Mary McCloskey, P. B. Iddings, guardian of Emma McCloskey, minor children of Martha McCloskey, deceased, and Nathan W. McCloskey, vs. J. F. Young, being an action in ejectment, and the same was continued on account of being special.

Thomas Elwood Comley and Bessie Comley, his wife vs. Thomas Kelley, Reuben T. Comley and Amanda Comley, his wife, vs. same. Both of these cases are actions in trespass and were continued at the costs of the defendant in the absence of a material witness but were to be continued again for the same cause.

Thomas Elwood Comley and Bessie Comley, his wife vs. Harry P. Kelley, Reuben T. Comley and Amanda Comley, his wife, vs. same. Both of these cases are actions in trespass, and grow out of the same facts, and the two cases just before this, and continued for the same cause.

Paul Rusnoveske vs. Dr. William Henderson, being an action in trespass, and the plaintiff's wife vs. the defendant non-suit at the request of his counsel.

Ellen E. Gray vs. Thomas R. Weber, administrator, with notice to all terra tenants, being an action of Scire Facias on mortgage. Verdict in favor of the plaintiff for \$3299.

Christian Buck, Daniel Buck and Joseph B. Buck, trading as C. Buck and son, now of New Britain, vs. Catherine E. Buck, executrix, etc. of Christian Buck, deceased, vs. Mary Denlinger Holt and J. Kennedy Johnston, administrators, etc. of J. H. Holt, deceased, being an action to revive and continue the lien of a judgment. Verdict in favor of the plaintiff for \$8632.67.

Dora G. W. Spotts (formerly White) and James L. Hamill, administrator of the estate of William White, deceased, vs. same, being an action to revive and continue the lien of a judgment. Verdict \$15184.

At this point no one being ready to proceed with the trial the District Attorney called the attention of the Court that he had present in court two ladies who had been held up on the highway in Bush township by three men near Bilger's on Forge Run Hill. The one man had stopped the horse and demanded "Mon". He whistled and two more men appeared and demanded their money. Mrs. Davenport positively identified the prisoner in court as the man who had caught the lines and stopped their horse and did the whistling. She told that all three of the men wore dark clothes. Miss Miller, Mrs. Davenport's companion, corroborated the testimony of Mrs. Davenport in every particular, and further stated that she was positive that the man in court was the man who held the horse, and that he was the man who had taken the bread and meat out of the buggy, and that she would never forget his face. This testimony was brought in to court for the purpose of further identification of the prisoner and to show that the robbers in the Millheim Narrows were the same who had robbed these women near Phillipsburg just a few days before, of which an account was given in this paper at the time. The prisoner was remanded back to jail.

John Nolan vs. Martin Nolan, administrator, etc., of Patrick Flanagan, deceased. This case is from Rush Township and is an action brought to recover for six years' board with the plaintiff at the rate of \$20 per month, \$5 per month to be credited on account of an indebtedness, and \$15 per month to be paid in cash. \$15 per month was paid by the defendant for six months of each year. There was no defense by the administrator and verdict was rendered in favor of the plaintiff for \$900.

Mrs. Kate E. Hastings, as an individual vs. Kate E. Hastings, administrator, etc., of Enoch H. Hastings, deceased. This action is brought to recover for moneys loaned by Mrs.

FATAL AUTO ACCIDENT.

Occurs Near Phillipsburg Last Sunday Afternoon.

A fatal automobile accident, in which James Maxwell, general manager of the Somersville Coal Co. at Carnworth, was the victim, occurred near Phillipsburg on Sunday afternoon. The Journal says:

The car, a five passenger Ford, was owned and driven by Mr. Maxwell. He was going with a party to Morrisdale to his mother's. Besides himself the occupants of the car were his brother, Joseph, Fred Williams, David J. Lloyd and Andrew Draid. They were running at a high rate of speed, and in some unaccountable way lost control of the car, and in trying to get control, the car ran off the road and turned turtle, falling on its side, face down. Mr. David had his right shoulder broken and received other painful bruises. Mr. Lloyd had several contusions of the body, face badly cut and was otherwise made by T. W. Evans, general superintendent of the Buffalo division of the road, and approved by W. J. Frapp, assistant general manager.

Mr. Fleming started his railroad career as a telegraph operator on the Oneida Creek division in 1893 and six years later was promoted to the position of train despatcher. Nine years ago Mr. Fleming was promoted to the position of assistant trainmaster of the Pennsylvania division of the Buffalo division, with headquarters in Albany.

During his executive career Mr. Fleming made an enviable record, and his rapid rise in railroad circles brought him much favorable comment throughout the east. Although only slightly known in Buffalo, the officers of the New York Central in New York congratulated him upon his promotion.

CENTRE CO. MAN'S PROMOTION.

The following news item taken from the columns of the Buffalo Courier will be of interest to the Centre county friends of Mr. D. B. Fleming, who was born and reared at Gillentown:

D. B. Fleming, of Albany, former assistant superintendent of the Mohawk division of the New York Central railroad, has been promoted to superintendent of the Buffalo division of the road to succeed H. E. Brown, resigned. The announcement was made by T. W. Evans, general superintendent of the western district of the road, and approved by W. J. Frapp, assistant general manager.

Mr. Fleming started his railroad career as a telegraph operator on the Oneida Creek division in 1893 and six years later was promoted to the position of train despatcher. Nine years ago Mr. Fleming was promoted to the position of assistant trainmaster of the Pennsylvania division of the Buffalo division, with headquarters in Albany.

During his executive career Mr. Fleming made an enviable record, and his rapid rise in railroad circles brought him much favorable comment throughout the east. Although only slightly known in Buffalo, the officers of the New York Central in New York congratulated him upon his promotion.

Silo Building Attracts Many.

The Pennsylvania State College Department of Agriculture is completing the construction of a reinforced concrete monolithic silo on its farm adjoining the college campus. The silo is 15 feet in diameter and 32 feet high. The walls are six inches thick and thoroughly reinforced with steel, both horizontally and vertically, the steel bars being placed about half way between the front and back fences of the wall.

This particular piece of work will be of special interest to farmers in the vicinity, as well as dairymen, due to the fact that the great advantages to be derived from the use of silage is so well known that the United States Department of Agriculture and various organizations give them their highest endorsement. Regardless of whether a farmer has five head of cattle or 100 head, the silo is a necessary and economical investment. This silo is to be used to a large extent for the feeding of beef cattle from the State College experimental farm.

Renewed interest is being taken in cattle raising and dairying in Centre county. While there are numerous silos in the county, hundreds of farms are not equipped with them, though their necessity and convenience is readily recognized by agriculturists at State College. The success of the concrete structure at the college will stimulate building of silos throughout the county.

"Fine Feathers" at the opera house last Monday evening proved a most splendid attraction and was greeted by a large and appreciative audience.

other services of the church, and now within a few weeks after the completion of the building, the students' attendance is greatly increased. A plan is about to be introduced in the Presbyterian church by which students being church members at home may bring such letters to the State College as will admit them associate members, thus giving them a church home without severing their connection with their home church.

Many prominent Presbyterians of Pennsylvania are interested in this new move and have contributed liberally to it. Mr. Alva B. Johnson, president of the Baldwin Locomotive works, and elder of the Presbyterian church at Bryn Mawr, is a member of the building committee. He has presented the church with a splendid bronze bell, weighing 2,000 pounds. Mrs. Dr. Turner, of Philadelphia, whose husband was a former member of the Board of Education, gave the church a Haskell pipe organ. Professor John Hamilton, one of the founders of the church and an Elder since its organization, has presented a beautiful art window with the inscription, "To the Memory of the Founders of This Church." Other donors have given gifts of furniture and money. The pastor is the Rev. Samuel Martin, a graduate of Lafayette College and Princeton Theological Seminary.

MANY APPLICANTS FOR OFFICE OF SEALER

NEW COUNTY OFFICE WILL NOT GO BEGGING.

POSITION WORTH \$1,000 A YEAR

County Commissioners Have Privilege of Joining With Another County in Appointing Sealer—Names of Those Who Have Filed Application.

Whether or not, Centre county needs the services of an officer known as the sealer of weights and measures is not up for argument, but the fact remains, nevertheless, that the last legislature created a new law requiring the county commissioners in every county of the state and the mayors of second and third class cities to appoint a sealer for the respective districts. Centre county so far has not complied with the requirements of the Act, as there is no demand for any haste in the matter. This fact, however, has caused no scarcity in the number of applications filed for the position as the following list of names will show:

Ezra H. Auman, Millheim; James E. Harter, Coburn; L. D. Orndorf, Woodward; G. Larimer, Bellefonte; A. L. Auman, Coburn; C. A. Weaver, Coburn; T. E. Shope, Milesburg; John R. Herd, Phillipsburg; Kline Woodring, Bellefonte; James H. Rathmell, Hubersburg; Wm M. Waddle, Bellefonte; Deemer L. Pierce, State College; Geo. C. Miller, Axeman; C. M. Hoy, Hubersburg; J. M. Cunningham, Bellefonte; W. F. Leathers, Curtin; John Haugh, Benore; W. H. Garman, Bellefonte; A. W. Reese, Port Matilda; J. H. Close, Bouslog; J. S. Williams, Port Matilda; D. Wagner, Geisla, Bellefonte; Homer Barr, Milesburg; C. Herbert Haugh, Benore.

The office is a good one and pays a minimum salary of \$1,000 and expenses. It is practically a life position to the holder, as the Act provides that no sealer of weights and measures, appointed in conformity with the law, shall be removed, discharged or reduced in pay except for inefficiency, conduct unbecoming an officer or other just cause, and not until after written statement of the reason for such removal or reduction shall have been given, with reasonable time to make answer thereto.

From the above list it will be seen that the office will not go begging for applicants. How soon the appointment will be made is not known, even to the county officials. One provision of the law permits two or more counties to jointly maintain a sealer of weights and measures, but such course is hardly likely to be followed by Centre county commissioners. The new law relating to the appointment of a sealer was designed to bring about a more efficient, rigid and vigilant inspection of measures and scales, monthly reports of same being required.

CHILD'S MIRACULOUS ESCAPE.

Little Emma Grace Snyder, aged four years, a daughter of Mr. and Mrs. Walter Snyder, of 1243 Washington avenue, can feel very thankful and happy that she is living today, says the Tyrone Herald.

Grace and her little brother Melvin, aged six years, were sent to the Beaver planing mill for their father's dinner bucket. They started to cross the track in front of the home instead of going to the crossing. A freight train was coming out of the East Tyrone yard and the big engine was only three feet away and in a second bore down upon the child. The big iron horse and two and a half cars passed over her little body. The train was immediately stopped. The entire family ran to witness the child lay expecting to see her almost ground to pieces, but were agreeably surprised to find that she had not been touched by the wheels or any of the rigging under the engine. It was discovered that the rail the big engine was only three feet away and in a second bore down upon the child. The big iron horse and two and a half cars passed over her little body. The train was immediately stopped. The entire family ran to witness the child lay expecting to see her almost ground to pieces, but were agreeably surprised to find that she had not been touched by the wheels or any of the rigging under the engine. The train was immediately stopped. The entire family ran to witness the child lay expecting to see her almost ground to pieces, but were agreeably surprised to find that she had not been touched by the wheels or any of the rigging under the engine. It was discovered that the rail the big engine was only three feet away and in a second bore down upon the child. The big iron horse and two and a half cars passed over her little body. The train was immediately stopped. The entire family ran to witness the child lay expecting to see her almost ground to pieces, but were agreeably surprised to find that she had not been touched by the wheels or any of the rigging under the engine.
