### This Is Serious Business

Composing a letter to Santa is indeed serious business. The writing ay not be literary, but he usually manages to fill the orders.

#### GUATEMALA INDIANS JUST LEARN OF U. S.

#### Primitive Tribe Adheres to Pre-Conquest Customs.

New York.-The 1,000 Indians in the Guatemalan village of Santiago Chimaltenango, living by a calendar which dates from the ancient Mayan civilization, have just learned of the existence of the United States, according to a report of a field study sponsored by the department of anthropology of Columbia university.

The report was submitted by Charles Wagley of Kansas City, Mo., tasks. a graduate student in the department, who returned recently from five months spent in this village. situated high in the Andean Cordillera. There he studied the economic and social customs of one of Central America's most primitive the boy and girl.

feet high, cut into the side of a peak staple. in the Cuchumatanes mountains, highest range in Central America.

#### Follow Old Customs.

Touched very slightly by the inroads of "civilized" culture, the natives of this community lead a life which perpetuates the traditions of ancestors who lived before the Spanish conquest of Guatemala 400 years ago, Mr. Wagley reports. The 40 separate villages which comprise the department are autonomous units, although all come under the central government of the Guatemalan republic. With its own mayor and council, each village observes its peculiar customs and dresses according to its own centuries-old style. Until the arrival of Mr. Wagley last summer, no one in Santiago Chimaltenango had ever heard of the United States.

The Mayan calendar by which these Guatemalan Indians figure the passage of time is based on a year of 18 months of 20 days each. Since this system is shorter than the solar year, a five-day period in March separates the end of one year from the beginning of the next. These five days, which are considered very unlucky, are spent by the entire village in fast, abstinence, and prayer.

Corn is the exclusive crop at Santiago Chimaltenango, where the cornfields lie at 45-degree angles along the mountainside. With the cron surplus as barter, trading is carried on with other groups in the

#### REIMS CATHEDRAL'S WAR WOUNDS HEALED

#### Great Edifice Badly Damaged by Fire, Cannon.

Washington, D. C. - Reims (Rheims) cathedral, badly damaged by fire and bombardment during the World war, at last has been restored when it served as coronation church home? of French kings.

"For nearly two decades this cherished French shrine has been ments be mailed? closed to the public while architects. financed chiefly by the French government and John D. Rockefeller, Jr., repaired war damage," says the National Geographic society. "In 1927 a rededication ceremony marked partial reconstruction of the edifice. Now, after an impressive service, the restored cathedral has been reopened for worship.

"During September, 1914, when the Germans seized Reims, they covered the floor of the cathedral's vast nave with straw, prior to quartering soldiers there. After the Germans withdrew from the town, the French converted the church into a hospital for French and German wounded. Nevertheless the Germans his best man be dressed alike? used the high towers as targets. claiming they sheltered military observation posts. Fire completely destroyed the roof, descended wooden scaffolding on a tower to the nave, set the straw on fire, and practically gutted the building.

Bombed and Shelled. From time to time, for the remainder of the war, airplane bombs and shells from long-range guns struck the cathedral. Buttresses and chapels were damaged. Only the massive strength of the thick walls saved the interior from utter destruction. Strangely the equestrienne statue of Joan of Arc, close by, remained uninjured in the midst of falling shells, and many considered this a good omen,

""Shells that broke pinnacles and disfigured statues also shattered priceless Thirteenth-century stainedglass windows. Drawings of these windows fortunately had been preserved, and some of the windows have been reconstructed in their original forms. Others have been fitted with temporary colorless glass awaiting replacement by the stained glass of future artists.

"An entire new roof has been constructed. Walls, pinnacles, and buttresses have been skilfully mended. Tapestries and works of art carried off to safety during the war have been returned to their places. Several statues purposely have been left mutilated as reminders of the

"From 1180 until 1824. Reims was ster abbey. England's great coronation church, was largely patterned

#### after this cathedral. Deemed a Masterpiece.

"Reims is considered a masterpiece of Gothic architecture. Built on the site of a previous church, it was completed in the Thirteenth century, with the exception of its twin-towered western facade, finished about 100 years later. This facade is noted for its wealth of sculpture. Above the three deeplyrecessed portals are more than 500 statues, ranged row upon row. These served as 'picture-books' for teaching Biblical history to medieval worshipers who could neither read nor write.

"The pointed central portal leads the eye to the magnificent rose window above it, nearly 40 feet in diameter. Still higher one sees a row of statues of French kings, each nearly ten feet tall. From them, the eye travels up to the two flat-topped square towers. These were originally surmounted by spires but, destroyed by fire in 1481, they were never replaced.

"The towers overlook the town of Reims, about 100 miles northeast of Paris in the champagne district. From surrounding vine - clad hills comes wine to be stored in the city's miles of wine cellars. During the war, when continual heavy bornbardment practically wiped out the forcing 100,000 citizens to leave. 000 remained and u to the e wine cellars as dormitories courts of uces, and even schools which gave examinations and prizes. Today, rebuilt Reims is almost back to prewar population and is again busy making champagne."

#### Eight Hats of Napoleon

Are Still in Existence Paris.-The sale at auction of a hat worn by the Emperor Napoleon has opened an inquiry which established the fact that eight such hats are now in existence.

Three of these are in the Invalides museum in Paris, one is at the Fountainebleau museum, one is owned by Prince Napoleon, the Bonapartist pretender in Brussels: another is in the private collection by the Prince of Monaco and the eighth is the one recently sold at auction for \$1,000,

All of the relics are well-authenticated with documents, and that of the Prince of Monaco is valued at
