his money his watch, and about \$200 Now, about this parking on the worth of mechanic's tools, for which road business-I understand how he is the agent. The State Highway innocent a thing it seems to you and Patrol was notified as soon as Mr. I also understand why your mother Weiser was able to return to Lewis- is so disturbed about it. Your idea burg but up to the present time no in parking is merely to use the car trace has been found of the bandits, as you would a private living room. You have nothing evil in your mind and for that reason you wonder why anyone should find evil in such an innocent act

But your mother knows that evil couples also make it a habit to park along the sides of county roads and Dog & Cat Hospital Gen. Practice do so for evil purposes. She knows that people who pass along and see you there may put you in the same class with those bad girls and she is anxious to keep you from being talked about by busybodies. She a so knows that a great many boys are not to be trusted where there is no restraint and that you may be saved an embarrassing situation by avoiding causes leading up to them. And most important of all, she knows that such a practice is dangerous. Every week or so we see in he papers where romantic couples have been held up and robbed-cometimes murdered-by people who walt for parked ears along lonely roads. So you can understand why your mother does not like the idea. If your parents won't give up the living room and you wish to have your date in the car, park in a safe place. Park before your house of where there is plenty of traffic.

Best Wishes LOUISA

Plenty of Linen

According to statistics, Ireland made 154,000,000 square yards of linen in 1937, or enough to put a strip a yard wide three times around the world and still have Milton, were welcomed by relatives some left. The output was valued at \$61,250,000.

> Every time that we think this will be a warm Winter a blitzard rolls down upon the United States.

BETTER FLAVORS

with an Electric Roaster

THOUSANDS of women who have not yet purchased an electric range already own an electric roaster. Many of them use their electric roaster regularly, instead of their old-style stove, just because it's so easy to do and the loods taste better.

Pie-baking, for instance, is so imple. You just put the pie into roaster, cover it-then bake it as long as the recipe tells you to. When you take it out, you'll find that the fruit in the pie is very "done", that the crust is "flaky" -and the taste is marvelous. It's a fast, clean way to bake-and very little trouble

An electric roaster is also convenient in cooking complete meals, -and for stewing, grilling roasting Operating cost is low, too

Investigate-You Can Get A Good Electric Roaster For Less Than \$20

THE FOLKS IN THIS HOUSE SAY EVERYTHING TASTES BETTER SINCE I'VE BEEN COOKING FOR THEM . . THAT'S BECAUSE ELECTRIC COOKING SEALS IN THE **GOOD FLAVORS!** ELECTRIC RANGE makes the cooking of tasty meals so much easier! REDDY KILOWATT

ONE of the first things that the family learns, after an electric range has been installed, is that everything tastes better! And mother learns that she is able to get these fine results with far less work than ever before.

Electric cooking requires very little water-in some cases none at all. It is "sealed-in" cooking. Juices don't steam away. They remain in the foods and develop into rich, fine flavors.

Electric heat is measured—there is a correct heat for all foods. You can depend on an electric range to do the job right-without the necessity of watching and testing. That's why it is so easy.

Users will tell you that they prefer this modern cooking method-that they're cooking electrically "for keeps!"

Go to the Electric Stores and See the New | Models-Join the Swing to Electric Cooking!
