

Kiwanians Visit Titan Factory

(Continued from page one)

The business has been expanded during these years to include also brass pressure castings, forgings and screw machine products. Many articles in the hardware line are manufactured, and other products enter into the manufacturing of automobiles, refrigerators and radios.

The Kiwanians were shown the 80 E. W. Ajax electric induction furnaces, producing 1000 pounds per furnace each 90 minutes, and witnessed also the pouring of the heat. For free turning brass a mixture of 61.5% of copper, 3% of lead and the remainder of zinc is used; for forging brass, the mixture is varied to 88.5% of copper, 2% of lead, and the remainder of zinc; for naval bronze the mixture is 60% copper, 75% tin, and the remainder zinc.

The guests were shown pressure casting in the Polak Brass Pressure Casting Machines. These machines were the first of their kind in the United States, and operate under hydraulic pressure of 6000 pounds per square inch. Brass is formed from a semi-plastic state and the temperature is controlled in electric holding pots. In the screw machine department brass products were seen being produced on National Acme Screw Machines. Another interesting process was the extrusion, in which billets 26 inches long and 6 inches in diameter were forced through dies under hydraulic pressure of two million pounds into brass rods of various shapes and diameters.

At the end of the tour each Kiwanian was presented with a garden hose nozzle, one of the Titan products, and a picture was taken of the group. Much comment was made on the beauty of the surroundings of the plant, even in winter, and the setting for the large crystal clear spring, whose flow is over 2,000,000 gallons daily. This spring has a year round temperature of 42 degrees, plus or minus two degrees, with water of the character of the big spring of Bellefonte.

Couple Observes 65th Anniversary

(Continued from page one)

health for several years, she does all her own housework, helps raise and can fruits and vegetables every summer, and keeps a house that is a model of cleanliness.

The Stine's have five children, 27 grandchildren, and 28 great-grandchildren.

Centre Democrat Cooking School

to do things well whether you are painting a masterpiece or making a beef stew.

"Cooking is really a simple job today with our modern equipment, prepared foods and canned goods. Our modern recipes are a help, too, for they are so simple and explicit, so well tested and accurate, that the most inexperienced cook can follow them."

Numerous Spring Movings Listed

(Continued from page one)

house on North Spring Street, to the "Pete" Breen house on Burrows street, Frank Knarr will vacate the Mrs. Massey house on Pine street to occupy the home being vacated by the Sprankles.

Clifford Bickie, who occupied an apartment in the Sprankle home has moved to the Weaver property on Burrows street.

Paul Gordon has moved from the Mrs. Frank Sasserman apartments on North Water Street to an apartment in the Joseph Hazel home on Blanchard street.

George Cunningham this week vacated the "Busy Bee" property on West Bishop street, and the apartment he occupied on the second floor, and has moved to his own home on Half Moon Terrace.

John Hall, who until his health failed recently was employed by the Westinghouse Electric Company at Pittsburgh, had his furniture moved to Bellefonte and has stored it in the Helen Bezer storage building in Cherry Alley until he is able to resume work.

William H. Jenkins and family, who have been occupying one of the first floor apartments in the First National Bank apartment building at the corner of Allegheny and Curtin Street, have moved into one of the Berardis apartments on South Allegheny Street. Mr. Jenkins was formerly employed at the local silk mill before that industry ceased operations.

Searchers Find Coburn Man Dead

Mills. The brook bears no name and is of small size.

Mrs. Gainfort, 91, Succumbs Here

(Continued from page one)

the largest churches and cathedrals in Dublin and London.

The aged woman, who until recently had enjoyed exceptional health, became ill some weeks ago, and death Friday, was attributed to a complication of diseases incident to advanced age.

"Simple foods especially prepared and seasoned are always the best—a little planning and imagination are all that are needed to make them fit for any company. I always urge my audiences to make it a point to visit their local markets, especially those fascinating outdoor markets that have such a marvelous variety of fruits and vegetables. Or if there are any foreign markets in your neighborhood, don't overlook their possibilities for new ideas. Sometimes a chat with the proprietor will give you an idea for a dish that will 'make' your reputation as a cook."

The planked steak we are doing at one of our classes of the Centre Democrat Cooking School is a grand example of how foods we all know can be turned into a company meal. Steak, potatoes, tomatoes and onions are certainly common enough foods, but when they are broiled to a turn, seasoned and arranged on one of those special oak planks, they make a masterpiece of color and flavor that will call forth cheers. Indeed, when we call with Hal and upon its completion, containing in that capacity until his death on February 26, 1914.

Although Mrs. Gainfort was one of a family of seven children, all her brothers and sisters preceded her in death, and since the death of her husband she had no living relatives to her knowledge.

Although she was a member of the Episcopal church during her early life, Mrs. Gainfort, upon coming to this country, became affiliated with the Presbyterian church, and attended services regularly until several years ago. For some years she was teacher of a Sunday School class.

Interviewed upon her 90th birthday, Mrs. Gainfort deplored the lack of green-eyed parents in failing to provide their children with proper training in music. She had little time for radio, contending that "programs are all the same and the music generally bad." She had little time for movies, finding them "stupid."

For four years after her husband's death Mrs. Gainfort resided with Mrs. W. P. Wilson on High Street, where the theatre now is located. Since Mrs. Wilson's death Mrs. Gainfort had made her home with Mrs. Gray.

Funeral services were held Monday afternoon from the Gray residence on East Linn Street, in charge of the Rev. William C. Thompson, pastor of the Bellefonte Presbyterian Church. Interment was made in the Union cemetery.

Sent to Prison in Morals Charge

(Continued from page one)

ed in Springfield, Ohio, on a vagrancy charge. Manuel, the record showed, also had been arrested on a charge of deserting his family. He denied one of the items in the record, and decided that in Washington, when charged with assault, he had been suffering from delirium tremens.

The remainder of the session Thursday was devoted to an argument arising from the case of N. R. Silver, of Martha Furnace, charged with reckless driving. It will be recalled that two weeks ago Mr. Silver appeared in court seeking an appeal from the decision of a Justice of the Peace on the charge, and Judge Walker delayed decision until argument had been heard on various points of law involved.

Last Thursday Judge Fleming, counsel for Silver, held that the information should be dropped and the defendant discharged, because the information did not set forth specifically in what manner Silver is supposed to have driven his car in a reckless manner. District Attorney Mueser W. Gettig, for the Commonwealth, countered this contention with the statement that the law provides that general terms are sufficient in drawing an information, more technical and detailed information being required only on an indictment.

Counsel for Silver declared that State Motor Police who stopped Silver's car on the Bald Eagle Valley highway near the Elk Haven Inn, west of Port Matilda, judged the speed of the car by the manner in which its headlights approached through the darkness, and by the sound of the car's motor. This evidence, the attorney declared, is dependable, averring that no person can judge speed accurately by the way lights approach him and that the motor of an ancient car might make more noise at 20 miles an hour than the motor of a good car going at 40 miles an hour.

In a letter to Council James R. Hughes, former headmaster of the Bellefonte Academy asked Council to reimburse him in the sum of \$250 for the water and sewer lines he built on East Bishop Street in 1921 in order to provide water and sewer connections to the swimming pool at the Hughes athletic field. Mr. Hughes, who claims to have spent \$500 in the work, holds that the borough is now using the lines he built and that he feels that the town should pay at least half the cost of installation. The matter was referred to the Sanitary committee.

The Finance committee reported as follows: Borough department: balance, \$1,477.54, and bills \$1,616.74. Water department: balance, \$1,347.23, and bills \$493.88.

The Fire and Police committee reported the floor of the Logan House in bad condition. A suggestion to adjudge the defendant not guilty.

1938 Budget Approved by Boro Council

(Continued from page one)

coming year are expected to total \$36,000.32.

Treasurer Carpeneto's outline of the budget for various departments, together with figures showing expenditures in those departments last year, follows:

BOROUGH DEPARTMENT PURPOSES: Estimated expenditures for 1938, \$3,985.00. Expenditures in 1937, \$2,943.23.

PROTECTION TO PERSONS AND PROPERTY: (including work of the Fire and Police committees): Estimated expenditures, \$9,580.00. Expenditures in 1937, \$6,164.69. It was shown that the estimated expenditures for the coming year were made high enough to include possible emergencies. The fact that they are higher does not mean that the indicated amounts of money must or will be spent, the Treasurer declared.

HEALTH AND SANITATION: (including sewer maintenance and health service) Estimated expenditures 1938, \$1,475.00. Expenditures in 1937, \$2,342.50. This item was materially reduced because of the fact that last year a number of new sewers were constructed, and this year no such construction is contemplated.

HIGHWAYS: (including maintenance, repairs and cleaning streets) Estimated expenditures for 1938, \$18,000. Expenditures last year, \$14,527.04. This item, it will be seen, shows a sharp increase. For the past three years the borough has made no major repairs to its roads, and the roads are in bad condition. The extra expense shown in the proposed budget includes a street oiling program.

CAPITAL OUTLAY: This item for the coming year shows an allocation of \$1,950, for the purchase of a road roller. No expense under this heading was shown for 1937.

MISCELLANEOUS: (insurance, work program allocations, contributions and similar items) Estimated expenditures for 1938, \$2,040.32. Last year \$5,708.32 was expended under this heading. Various economies to be practiced during the year are assigned as the reason for the reduction.

SINKING FUND: During 1938 Council will put \$4,539.00 in the sinking fund for payment of interest on the bond issue and for other debt service expenditures. Last year's budget showed no entry for this item.

WATER DEPARTMENT: In this department estimated expenditures for 1938 were given as \$25,290.23, with anticipated revenues being \$23,963.70. Last year expenses in the water department totaled \$28,506.64.

Bellefonte borough adopted the budget system of borough financing for the first time last year. This year, in compliance with a new law, the budget was revised to conform with a system which is now standardized throughout the state. As a result, Bellefonte's budget has an unfamiliar appearance, the headings being different in most instances, and expenditures for various types of work expenses being grouped in a different manner from the one used last year.

With Council's preliminary approval Monday the budget was presented at the borough office at the Big Spring, to remain open for public inspection until March 21, when Council will take final action upon it.

Councilman Cherry read a list of suggestions for parking and traffic regulations in the borough, and after much discussion it was finally decided to refer the suggestions to the Borough Solicitor to prepare an ordinance for Council's inspection.

J. Thompson Henry, who is in charge of the WPA project for the extension of Beaver and Lamb Streets reported as follows: of \$35,541.15 of Federal funds allocated for the work, \$15,044.14 has been spent of Federal funds of \$5,709.70, a total of \$3,283.53 has been spent. The project is 33.21 per cent completed.

Councilman Brookerhoff was asked to continue his efforts to get the State Highway Department to repave East Bishop Street from Allegheny Street to the borough line when the Department rebuilds the Ninety Valley Highway from Bellefonte to Zionsville.

Bossart DeHaas, of the DeHaas Electric Store, appeared before Council with information regarding the installation of new lights in the Council chamber. Council decided to take no further action until the room has been repapered and refurnished.

Two checks, one from an insurance company for \$38.40 for repairs to a light standard damaged some time ago near the A. & P. store by a truck, and the other from E. E. Welter for the relocation of a street light on Allegheny Street, were received by the Treasurer.

The Water committee reported long collections of \$349.57, of which \$25 represented garage rentals.

Humes Home Deed Granted Libray Corp.

(Continued from page one)

or otherwise encumber the property, and that if at anytime in the future the Library and Historical Corporation shall fail to fulfill the purposes set forth, in Miss Humes' will, an order of court may be made directing the conveyance of the premises to the Presbyterian congregation of Bellefonte and the Centre County Hospital, which Miss Humes designated as heirs to the property in the event the Library did not come into being.

In an interview yesterday J. Thomas Mitchell Esq., head of the Library and Historical Corporation and one of the most active persons in the organization of the Corporation stated that the First National Bank, executors and trustees of the Humes estate authorized its attorneys to prepare a deed at once in compliance with yesterday's court order.

Mr. Mitchell added that the Corporation will now begin to accumulate books and furnishings for the library, and to prepare the Humes home for public use. All tenants in the building have vacated the premises, and the Corporation will take possession of the building as soon as transfer of the property has been made.

The property to be deeded to the Library Corporation is bounded as follows: On the east side by Allegheny Street; on the west by an alley, and on the north by land of Catherine Allison.

Commissioners as a Poor Home would result in a substantial savings to the County, even though they found it necessary to make a number of changes in the building.

and there met and talked with President Roosevelt, and he feels that he is well versed on the aims and policies of the New Deal.

Returning to Altoona, Mr. Aukerman engaged in accounting for the Altoona school district and in 1934 was drafted for the assembly, in which he served two terms. He stood 100 per cent for labor at Harrisburg, voting for the full crew bill and for the train length bill. He was chairman of the Geological Survey committee of the house during his second term and sponsored the Hospital Appropriations and Highway bills. He was chairman of the sub-committee which formulated the new Motor Code, reducing the cost of driver's licenses and calling for other changes. He also was chairman of the sub-committee on the small loan company and pawnbroker's bills.

Mr. Aukerman is now serving on Governor Earle's commission arranging for the 150th anniversary of the U. S. Constitution. He introduced a bill in the House commemorating the landing of the Swedes in Philadelphia, an event to be celebrated next April.

It is Mr. Aukerman's intention to conduct an aggressive campaign for the nomination.

Mr. Aukerman has informed The Centre Democrat that if elected he will establish an office in Bellefonte and one in Clearfield, and will spend at least one day each week in both places, when he is not attending sessions in Washington. He would devote his entire time to the office.

If you pay attention to all of the warnings given out, you will not have time to do anything else.

Correct this sentence: "Of course you owe me the money, but you don't need to pay me now."

County May Buy Academy

(Continued from page one)

local laws regarding sanitation, fire protection, safety devices, building regulations and maintenance. Annual reports must be submitted to the welfare department and the homes must be open to inspection by state agents at all times.

Homes must have "potable" water supplies, tested at least once a year. Bathing facilities with hot and cold water must be supplied, and the homes must be heated to at least 70 degrees in coldest weather. Artificial lighting must be electric. Doors and windows must be screened, kitchens well lighted. Suitable recreation or sitting rooms, and individual lockers are required in all homes, under the regulations.

Persons familiar with the main building of the Bellefonte Academy will realize that the building is admirably suited for use as a County Home. There is room for approximately 100 persons at the Academy; baths and showers are provided; electric lighting is installed and hot and cold water is piped throughout the building. The water supply, from Bellefonte's famous spring, is constant in quantity and quality; there are specially designed recreation and "kitting" rooms, locker room space is available, and the Academy is connected with the borough sewer system, meeting sanitary requirements. The kitchens are large and well lighted, and since the building was designed for providing a home for approximately 100 students, it could be converted into a home for dependents with very little expense, it is believed.

The Commissioners are required to establish a County Poor Home for the care of the county's dependents. Plans for such a home are being prepared by the Welfare Department and if the County builds such a home the Commissioners will be faced with the problems of locating and purchasing a site and providing adequate water and sewage facilities, in addition to the heavy cost of constructing a building which would meet requirements.

It is probable that if the Academy proved suitable and was approved by the State, its use by the

County may be a substantial savings to the County, even though they found it necessary to make a number of changes in the building.
