

Over The County News

Charles Bower, of Millheim, was the winner last week of an electric shaver in the club sponsored by Bierly's Radio & Electric Shop.

A call for the help of the Millheim Fire Company pumper stopped an incipient blaze in the home of Simon Rote, on Water street, last Thursday morning. The fire started from a defective flue, the flames being quickly subdued by use of the booster tank on the pumper. Very little damage was done to the property.

Refuge keepers claim the only reason more deer are seen at this time of the year than at any other is due to the fact that the deer come to the fields for a variety of food after having been forced to eat undesirable food for much of the winter. The fact that many deer are seen now does not indicate that deer herds are over crowded more than in past years.

The townman at Woodward Round Top called the Millheim telephone exchange operator about three o'clock Saturday morning for the purpose of telling her that a brilliant display of Northern Lights could be seen to advantage at that time. Miss Lottie McCool was the operator on duty and she says she was very beautiful. Earlier in the night, some reflection of this light could be seen from points of vantage, although the full beauty did not appear until the wee, small hours of the morning.

A forest fire which broke out back of Young's Gap, south of the Woodward Cave, about two o'clock last Friday afternoon, burned over approximately three hundred acres before it was gotten under control. Fortunately, the smoke was seen shortly after the fire started and was reported to Ranger W. P. Ard, who took a crew of about twenty-five men, including visitors from distant parts, to stop the blaze. The backfires were started before the flames were controlled, high winds forcing the red peril through dead chestnut and oak and brush at a fast rate. Most of the burned-over land was the property of D. W. Springer, who has a cabin near the Woodward Cave. Others whose lands were affected were those of Harris Stover and Frank Bibbe.

The work of laying the concrete floor of the new bridge at Spring Mills was begun during the past week. Both east and west approaches will have to be built following the finishing of the bridge. The steel of that structure, as well as of the one in Coburn, has been painted within the past week.

The Rebekah lodge of Spring Mills, last Tuesday evening held its installation. Officers were installed by District Deputy President Mrs. Albright of Pine Grove Mills. The new officers are: Noble grand, Josephine Stevens, vice-grand, Mrs. Zettie; chaplain, Mrs. Crader; warden, Mrs. Jennie Shook; conductor, Mrs. Sue Heckman.

Donald, one of the twin sons born to Mr. and Mrs. Lynn Breen, of Centre Hall, was discovered to have a common thumb tack in his mouth. The child was making unusual facial movements which attracted the attention of the parents and upon examination of the mouth the tack was discovered. The timely discovery no doubt prevented dire results.

George Tibbens, of East Howard street, while employed on the Ohio Bluff farm in Buffalo Run Valley, sustained severe body bruises last Monday morning about 8 o'clock when he fell through a straw hole to the ground 14 feet below. Mr. Tibbens was working in the overhead of the straw shed which was covered with straw and he did not notice the hole until he dropped through it. Though badly bruised, he suffered no broken bones.

The timber on the Dr. Runkle farm east of Old Port, now owned and occupied by Charles Foust, is being cut by lumberman William Petteloff and hauled to one of his mills on the former Dauberman, now J. H. Knarr, timber tract along Spring Creek, where it is being cut into merchantable lumber. The trees on the tract are mostly oak, and a large per cent of them hollow at the butt, not an unusual condition for trees found in open, pastured woods.

Clarence Meyers, of Centre Hall, was arrested by Constable George Glenn, of Bellefonte, and arraigned before Squire Harold D. Cowher on West Bishop street for hearing last week on charges of trespassing on grounds owned by the City of Philadelphia, and located in Burnside township. The charges were preferred by W. P. Meeker, a caretaker on the grounds, who alleged that the defendant trespassed on the lands during the hunting season last fall. Meyers pled guilty and paid a fine of \$5 and costs of prosecution.

At a hearing before Squire Harold D. Cowher held last week seven fish law violators pleaded guilty to charges of fishing on State grounds along Spring Creek before 7 o'clock on the opening day of trout season. The arrests were made by fish wardens Carl Wertz, Arthur Snyder and Jacob Kniesly. All paid their fines and costs ranging from \$10 to \$20. Collected from the party amounted to \$100. The State grounds along Spring Creek are posted against trout fishing before 7 a. m. during the season.

A four-inch water pipe was laid over Main street and down School street to the Centre Hall high school building last week. It is one of two WPA projects to be carried out on that street. The pipes used were John Mansville product, a composition of cement and asbestos, very similar in its compound to the asbestos roofing made by the same firm and is known as transit pipe. The connections, other than those joining sections of the transit pipes, are the standard cast iron. The line was thoroughly tested before being covered, and not a single leak was discovered.

Following the theft of John M. Bobb's cured meats last week, it was discovered by M. H. Smith, another Millheim resident, that his smoke-house was broken into and all but two of his large pieces of smoked meat taken. The thief or thieves damaged the house getting into it, and made off with three hams, three shoulders and four loaves. All of this meat came from hogs that weighed more than 500 pounds each and represents a loss of more than a hundred dollars to Mr. Smith.

Probably during the same period, somebody entered the John D. Neese backyard, and evidence indicated that they were snooping about his place, too, but Mr. Neese had no meat in his smoke house. Since last fall H. Frank Shirk, living on the Barney Wagner farm near Centre Hill, which he purchased some years ago, had the misfortune to lose eleven farm animals—three horses and eight head of cattle—through death. The cattle were mostly cows. When the last of the three horses was carried away last week, three additional cows were down, unable to stand. The Wagner farm, with quite a large acreage, was one of the crack farms from point of production in Potter township. Mrs. Huldah Meece owned it after the World War when farm land was skyrocketed and she was offered a fabulous price, but did not sell. Later the place was purchased by Mr. Shirk. Last year very meager crops of corn and hay were stored from the acres tiled.

Every parent believes that, mysteriously, but none the less certainly, children inherit good traits without acquiring the bad habits of their ancestors.

Penn State Will Hold Industrial Conference

Leaders in industry and education will join with the staff of the Pennsylvania State College for the 13th annual industrial conference at the College May 12 to 13. By means of these conferences the School of Engineering is attempting to coordinate its teaching aims more directly with present conditions in industry and to afford visiting industrialists an insight into type of training it is providing.

The conference has been divided into sessions dealing with the selection of the "engineering type" from potential college students; post-collegiate education and training of engineering graduates, and methods of developing leadership in industry.

Dr. Robert L. Sackett, dean-emeritus of the School, and chairman of the committee on student selection and guidance for the Engineers' Council for Professional Development, will preside over the session devoted to selection and guidance. Other presiding officers will be O. W. Eschbach of the American Telephone and Telegraph Co., who is chairman of the committee on professional training for the council; J. O. Keller, assistant to President Ralph D. Hetzel, in charge of extension; and F. M. Felker, executive secretary of the American Engineering Council.

FENDER OF GHOST CAR DAMAGED BY MOTORIST

A "ghost car" driven by a member of the Pennsylvania Motor Police from the Philadelphia subsection was slightly damaged in a Saturday night minor accident at Woodland.

The officer reported seeing an automobile ahead of him zig-zag back and forth across the highway. The officers signal to halt and his siren went unheeded as he passed the other vehicle, pulled off the road ahead, and tried to flag the driver with a flashlight.

PENN STATE MAN NAMED TO NATIONAL OFFICE

Edward K. Hishman, executive secretary of the Penn State Alumni Association, was elected president of the American Alumni Council at its 25th anniversary meeting in Columbus, O.

REPORT TRIPLETS BORN TO LEOPARD AT HERSEY ZOO

Curious visitors are waiting anxiously for a glimpse of three spotted, or black baby leopards born to the Hershey Zoo.

Centre County Hospital Notes

Monday of Last Week Admitted: Michael Coelvert, Bellefonte; Martin Howard, Bellefonte; Francis A. E. Koski, Bellefonte; Hassel E. Loe, Bellefonte. Discharged: Mrs. Michael Rider, Coburn; Mrs. Sarah Holderman, State College; Master Richard Johnson, Pine Grove Mills; Mrs. Joseph Kluge and infant daughter, Howard; Mrs. Florence Harter, Aaronsburg. Janet Denithorne of State College, was admitted Monday and was discharged the following day. Births: A daughter was born to Mr. and Mrs. A. E. Yougel, Bellefonte.

Tuesday of Last Week Admitted: Miss Betty Rudy, State College; R. D. Lewis W. Bayliss, Centre Hall, R. D. Discharged: Orvis Horner, Centre Hall, R. D. These patients were admitted Tuesday and were discharged the following day: Miss Mary Garberick, Oak Hall and James Weaver, Bellefonte.

Wednesday of Last Week Admitted: Mrs. Mary Arnold, Coburn. Discharged: Andrew Irvin, Julian; J. William Livesay, Gettysburg; Charles C. Peters, State College. Lois Emma Hoy, of Milesburg, was admitted Wednesday and was discharged Thursday. John T. McCormick, State College, was admitted Wednesday and was discharged Saturday. Births: A daughter was born to Mr. and Mrs. Henry G. Reitz, of Boonesburg. Death: Mrs. Catherine Mason, of State College.

Thursday of Last Week Admitted: Master John Samuel Tate, Bellefonte, R. D. 3; Harry S. Meyer, Pleasant Gap; Lester Auman, of Centre Hall, R. D. 1. Births: A son was born to Mr. and Mrs. George Drapcho, of Clarence.

Friday Discharged: Miss Elizabeth Brobeck, Howard, R. D. 2; Mrs. Henrietta J. Frew, Bellefonte, R. D. 1; John G. Billett, Bellefonte; Miss Mary E. Glasgow, Centre Hall.

Saturday Admitted: Master Elmer Keith, Howard, R. D. 2; John Curtin, Jr., Bellefonte; Edward Weizalls, Ashland; Patricia Ann Martz, Pleasant Gap. Discharged: Miss Mary Loe, State College; Mrs. Ivan E. Parkin and infant daughter, State College; Mrs. John C. Major, and infant daughter, State College; Mrs. Melvin Cherry and infant daughter, Bellefonte; Miss Kathleen Campbell, State College; Mrs. William E. Ripka, State College.

Sunday Admitted: Mrs. Milton Muhlfelder, State College; Mrs. Willard Rabin, Centre Hall, R. D. Discharged: Patricia Ann Grove, Spring Mills; Harold E. Schaefer, Woodward. Births: A daughter was born to Mr. and Mrs. Ross Griffin, Bellefonte.

There were 48 patients in the Hospital at the beginning of this week. Hospital contributions—The following contributions were received by the Centre County Hospital during the past week. From Health Clubs of Howard and Blanchard, two crates eggs; From Mrs. Harry Breen, Bellefonte; 1 lot of magazines; From Mrs. David E. Washburn, Bellefonte, a lot of magazines.

Give Bees Special Care During Spring Months

Now that fruit trees are blossoming, it is a good plan to give a super of drawn combs to every colony having six or more frames of brood, suggests County Agent R. C. Blaney. This super may be either a shallow frame super or a deep body, depending upon the system of management used by the bee.

Mr. Blaney recommends that producers of comb honey supply each colony with a shallow frame super of drawn combs. As soon as the bees have stored honey in four or five frames, the apiarist should make sure that the queen is in the lower body and then place a queen excluder under the shallow frame super. There should not be brood in more than two or three frames when the queen is placed below.

NEW REGULATIONS ON SALE OF BABY CHICKS

For the protection of farmers and other poultry raisers new regulations governing the sale of baby chicks in Pennsylvania were established this week by J. Hansel French, State Secretary of Agriculture. The regulations require that when chicks are offered for sale as a unit in a container the container must show in clear, legible markings the number of chicks, the breed, the hatching date, whether blood-tested, whether cockerels, pullets or straight run, the name and address of the producer and the name and address of the seller.

Farm Calendar

Reduce Use of Lights—As natural daylight increases with the lengthening of spring days, poultrymen need less need for artificial lighting. This helps to cut costs. Most poultrymen decrease the amount of artificial light gradually to prevent blinding on an unnatural moit, report Penn State poultry specialists.

Raking Injures Lawns—Severe raking of lawns is harmful. The dead leaves add humus to the soil, protect it from excessive evaporation, and tend to keep weed seeds covered so that they do not sprout. Raking makes a seedbed for weed seeds, damages the grass and removes the natural protective covering, say Penn State turf specialists.

Learn About Termites—Every home owner should have a copy of Circular 187, "Termite Control for Pennsylvania." This publication describes the damage caused by termites and tells how to prevent infestations. A knowledge of how these insects work is helpful in preventing damage to wood structures. Ask your county agent for a copy of the circular or write to the Agricultural Mailing Room, State College, Pa.

Protect Farm Tools—Rust and rot are more injurious to farm tools than wear through use. This emphasizes the need of care and proper housing for machinery, Penn State agricultural engineers point out. Where Rose Grease—a deep loam soil on well-drained ground is preferable for growing roses. Only varieties which are hardy in the section where planted should be selected, say Penn State floriculturists.

Check Rate of Seeding—Drills and planters can be checked by farmers to insure accuracy of seeding, explain Penn State agricultural engineers. Ask your county agent about a simple method for doing this.

30 Attend Meeting Pleasant Gap Group

The Men's Brotherhood of Pleasant Gap, held their regular meeting at the Methodist church Thursday evening at 8 o'clock with a good number attending.

The regular business was conducted and discussions were varied and interesting relative to the Agricultural and community problems now present in this fast growing section. An active program has been put into effect that should help modernize the community and make it an even more attractive community in which to live.

The entertainment committee presented a First Aid team, head by Mrs. Nevin Adkins. An able life-saving demonstration was conducted by the team. They also illustrated the use of the Bureau of Mines stretcher, various bandages for injuries and artificial respiration.

John Tressler served refreshments for the organization. A large number of men are taking an active part in this worthwhile organization and all men interested in a real, alive and progressive community are invited to attend the regular monthly meetings held the third Tuesday of each month.

Amateur Contest to Be Held by Rover Crew

Jim and Jane with their Western Vagabonds will appear at the Bellefonte High School auditorium Tuesday, May 3, at 8 p. m. This group of radio and stage performers have been heard daily over WRAC at Williamsport for quite some time. They have played to packed houses everywhere they have gone. An amateur contest will be held in connection with the entertainment. The winners of the contest will be given the privilege of making appearances on two of the vagabonds broadcasting programs; second prize is a cash prize of \$2 and third prize is \$1. All contestants who wish to enter the contest may do so by giving or sending the name of the amateur and the act to be performed to Reynolds Van Buskirk, 37 South Thomas Street, Bellefonte, or any other member of the Centre Pennsylvania Rover Crew who are acting as sponsors of the program.

Rheumatism Must Go

With This Reliable Scientific Remedy That Eliminates Poisons from the System PAIN PROMPTLY EASED Rheumatic Poisons and toxins cause deposits in the joints and muscles and clog the whole system. The only possible way to get rid of them is to drive them out with proper internal medication. You need LUEBERT'S NOX-EM TABLETS and CAPSULES (combined) to do this for you. They relieve the excruciating pains in rheumatic conditions and assure you of a good night's rest. They drive out poisons, purify the blood, stimulate the liver and kidneys to increase eliminations and strengthen the bladder. Price 60c. and \$1.20 per package at druggists or mailed direct from laboratory. A. G. LUEBERT, P. D., Coatesville, Pa. Bold and recommended by Parrish and Zeller Drug Stores.

Keep Brooder House Fresh and Clean

How frequently should the litter in the brooder house be changed? That will depend on the materials used and the number of chicks in the house, answers County Agent R. C. Blaney. Housing not more than three chicks per square foot of floor space is a safe rule to follow. When chicks are confined to the brooder house, or where the proportion of chicks to the floor space is larger, more droppings will fall in the litter and necessitate more frequent cleanings.

Shavings, crushed corn cobs, peat moss, sugar cane litter, sawdust and cut straw are common types of litter. Chaff is likely to be too dusty. Leaves of clover or alfalfa may be used. If chicks are inclined to eat the finer materials, the litter may be covered with paper for the first few days.

Strive to maintain a dry, deep litter. Frequent stirring will help keep it in good condition. Warm, damp, dirty litter provides an excellent medium for the development of certain diseases and parasites, particularly coccidiosis.

Placing water fountains on low wire platforms prevents chicks from coming in contact with wet areas. Remove damp litter at once. Periodic flushing with a preventive for coccidiosis may necessitate cleaning after each flush. Stirring may dry out the litter enough that it can be safely left in the house.

TILL SUGGESTS YOU TRY MACARONI CHEESE TIMBALES

For a new and different way of serving macaroni, M. Till, manager of the Gateway Restaurant in Rockefeller Center, suggests you try Macaroni Cheese Timbales. Here is the recipe for it:

Blend well one cup of grated cheese, one and one-half cups of milk, two eggs, well beaten, one-half teaspoon of Worcestershire sauce, and then add salt and pepper to taste. Divide one and one-half cups of cooked broken macaroni equally among four buttered custard cups and fill the cups with cheese mixture. Set in a pan of hot water and bake in a moderate oven (350 degrees) until firm. Unmould on a platter, garnish each timbale with a mushroom cap and serve with sauce made by cooking one-half cup of grated cheese, one pepper in a double boiler until cheese is melted.

URGE ANGLERS TO HELP PREVENT FOREST FIRES

Centre County anglers are urged by game wardens and forest rangers to be careful with fire in the woods. Wooded areas in at least seven Pennsylvania counties have been damaged during the past two weeks by fires believed to have been caused by thoughtless fishermen. Be sure to extinguish every spark of campfire before leaving the site, and when you toss a cigarette away, be sure to grind it out with your foot. Prevent forest fires!

Civil Service Exams Announced

The United States Civil Service Commission has announced open competitive examinations for the following positions. Special agent, research in commercial education, \$4,900 a year, and special agent for distributive education, \$4,600 a year, Office of Education, Department of the Interior. Assistant associate, and senior naval architects, \$2,600 a year to \$4,600 a year. For the assistant and associate grades optional branches are: General; hull structures and arrangements; scientific ship calculations; ship piping and ventilation; small boats.

Inspector of miscellaneous supplies (wooden products), \$2,600 a year, and inspector of miscellaneous supplies (metals), \$2,600 a year, Quartermaster Corps, War Department. Alphabetic card-punch operator, \$1,200 a year. Junior auditor, Income Tax Unit (internal revenue agent), \$2,600 a year, Bureau of Internal Revenue, Treasury Department.

This examination is open only to persons with the specified experience prescribed in the announcement, in the following branches: Flour milling, insurance, lumber milling and manufacturing, meat packing, petroleum production and refining, public utilities, textile manufacturing, tobacco processing and manufacturing.

Full information may be obtained from Postoffice, State College, or Secretary of the U. S. Civil Service Board of Examiners, at the post office or customhouse in Washington, D. C.

CIVIL SERVICE EXAMINATION

The United States Civil Service Commission has announced an open competitive examination for the following positions: Farm manager, \$2,900 a year; assistant farm manager (dairying), \$2,300 a year, Bureau of Prisons Department of Justice.

Penna. Farm Program Raises Potato Rate

The Pennsylvania Agricultural Conservation Committee announced today that among the details of the 1938 Agricultural Conservation Program that have just been changed by the Agricultural Adjustment Administration to put this year's program in line with recent amendments to the 1936 Farm Act, the only one affecting Pennsylvania is that pertaining to potato payments. For potatoes in this state, which is included in the late producing area, the rate of payment per bushel, at a farm's average yield, on acreage planted up to a farm's allocation has been raised from \$3 to \$5 cents.

BRAIN SEVEN DIMENSIONS

The question, "What are the seven dimensions of the intellect?" is answered in a recent study made by a group of educational societies at Rockefeller Center, New York. It shows that they are: word fluency, number facility, verbal reasoning, perceptual speed, memory, induction, and visualizing ability.
