CHECK EQUIPMENT NOW FOR SUMMER CANNING—If you have not taken stock of your canning equipment during your housecleaning, there is no time like the present, says Miss Eleanor J. Smith, home economics extension representative of Centre county. The canning season has already begun and many home-makers in Pennsylvania have been making jars of early wild greens, parsnips, and rhubarb on their storage shelves.

Begin your inventory by assembling all the equipment which you will use in canning fruits and vegetables this summer. This will help you to see what you need and which articles to be replaced. If practical most of these utensils can be kept in a special place so that they will be ready at a moment's notice. A few well-chosen but inexpensive utensils are a definite aid to successful and easy canning during the summer months.

The following suggested list may be helpful in getting your canning equipment ready. Vegetable brush; stainless steel paring knives and medium sized knife; saws; chopping board; shallow pan for washing vegetables or fruits; colander; large dish pan for sterilizing jars; jar tongs; small saucepan for pre-cooking vegetables and making syrups; metal cup with handle; or ladle for filling jars; jar funnel; measuring cup and spoons; wooden spoon or spatula; long handled spoons; glass jars; covers for jars; new jar rubbers; household scales; tray to place jars on; pressure cooker or hot water bath (with rack).

Miss Smith will be glad to give you the latest information on canning. Circular 153, "Home Canning of Fruits and Vegetables," published by the Pennsylvania State College, can be secured free from your County Agricultural Extension office.
