

Over The County News

During the thunder storm, last Monday night, a small tree was broken off and blown across the highway at Ave Mann, holding up motorists until a road Samaritan, living close by, braved the hard downpour of rain and removed it.

The seismograph at State College recorded waves of a severe earthquake at 2:32 o'clock last Monday morning, but as it was estimated to have been 5700 miles away there was no cause to become excited about it in Centre county.

While thermometers in Bellefonte, last Wednesday morning, registered from 40 to 45 degrees above zero quite a heavy frost prevailed in many parts of the county, in some places doing considerable damage to gardens and flower gardens.

R. N. Wiltmer, P. R. R. agent at Coburn, is off duty for two weeks, the office at Coburn being in charge of Mr. Riffell, of Williamsport. It's a poor vacation period for Ray, however, the rains keeping him indoors practically all the time.

Prof. John R. Bracken, landscape architect at Penn State, last Wednesday supervised the planting of shrubbery to take the place of those set last summer failing to make satisfactory growth on the Kerlin lawn at Centre Hall. Of the large number of plants, shrubbery and some twenty ferns, more than 97 per cent made excellent growth. This record is considerably above the average for such planting. The lawn and plantings of great variation present a beautiful picture at this time.

Mr. and Mrs. J. F. Wetzel, daughter Clara Lou and Mr. and Mrs. Homer W. Fetterolf of Spring Mills attended the 25th reunion of their graduating class at Bloomsburg State Teachers College Saturday. Mr. Fetterolf and Mr. Wetzel were classmates and graduates in 1913. About 90 of the former 188 classes were present. Dr. and Mrs. Kimber Kuster held a very lovely reception for the group Friday evening Saturday morning all had breakfast together at the Hotel Stevens, followed by the regular banquet in the College dining room at 1:00 o'clock. The experiences shared by the group gave a very good cross-section of life, with its successes, mishaps, pathos, grief and hard-earned achievements.

Richard Innis, of Lewisstown, was the winner of the State College Gas Model Club's airplane contest at the State College airport last Saturday. Terry Noll, of Pleasant Gap, was the winner of second prize in the contest, which took place in the afternoon. Powered with small gasoline engines, the little ships were supplied with only enough fuel for a flight of 45 seconds. Most of the planes took off and went into a climbing turn in order to gain altitude quickly. As soon as the motor stopped, the models glided to a landing. Objects of the meet was to see how long a flight the planes could make, Innis, using a small plane that was said to have reached speed of nearly 80 miles-per-hour, placed first with a flight of two minutes and three seconds. Noll was second with a flight duration time of one minute and 26 seconds. Both boys were awarded silver loving cups. Clark Hill, of Pleasant Gap, placed third.

A recently enacted ordinance in Centre Hall calls for the reduction of the borough debt at a lower rate of interest. The interest now paid is at the rate of four per cent for a water bond of \$1000 and a 5 per cent rate of interest for \$2000 borrowed from local parties on notes. Under the new financing plan two of the longest term notes will bear interest at 2 1/2 per cent and the remainder, 4 per cent at tax free. The tax is four mills, making the interest rate 2.9 and 4.4 per cent. The indebtedness under the new arrangement will be increased by but \$2000, since a part of the funds secured by the new loan will be used to pay off the notes of \$200 now in force. It is the intention of the council to call in the water bond, long past due. The bond, however, will be paid from the borough's general fund and not from the sale of notes now offered. In adopting the Centre Hall school budget at a meeting of the school board, last week it was voted to continue the school tax at eighteen mills on real estate and the per capita tax at \$4.00.

Samuel Ross, teacher in the Harris township public school, contracted a mild case of lead poisoning, following the close of his school and taking up painting, last week.

Ruth Stine, daughter of John Stine, was the winner of a silver medal given by the Hallmoon W. C. T. U. in a recent oratorical contest. Her selection was entitled "The Better Way." Six other young people were in the contest.

David I. Graybill, teacher of science and mathematics in the Centre Hall-Potter high school, will spend the greater part of the coming school vacation with his father, C. S. Graybill, a Paxtonville carpenter and contractor, doing general carpentering. It was his first intention to take a summer course at Penn State, but a series of events occurring in the meantime prevented this plan carrying through.

A crew of 12 from Centre Hall more or less experienced deep-water fishermen say fishing was poor off Bowers Beach on Delaware Bay. Last Monday the anglers used their utmost skill with the success almost nil. The crew, with Wm. H. Homan as captain, included Ernest Homan, Ralph Homan, Roy Dutrow, John Dutrow, Bruce Hartley, George W. Shiner, George Tackett, Miles Decker, Calvin Weaver, Ralph Luse, C. P. Ramer. The fishermen returned home Monday night at 11 o'clock. Fishermen from the south side of Potter township, Pleasant Gap, and State College, in the same water had no better success than Capt. Homan's crew.

The West Penn Light and Power Company is surveying for a pole line from Pottery Mills along State Highway Route No. 322 south to "Rayona" club house, on Garrity road, and probably on to the Juniata Valley Boy Scout camp, a short distance to the east. Others along the line given an opportunity to secure service include Brownie's Place, Sunset club house, White House, where forest ranger John Meeker lives, Reaick's improvement, and several other mountain camps. Along the Garrity road, in addition to the Rayona club house, service has been signed up for by the Penn Lock Club, White Oak Lodge, McKeesport club and Camp Reaick. The line is the extension of the line coming up through Georges Valley, connecting with a main line at Spring Mills.

SHADE ON THE RANGE COMFORT FOR PULLETS

Well-distributed shade is important for pullets on range. Since the birds have a tendency to congregate in shady places during the heat of the day, the ground will become badly overheated if too many birds use it.

It is essential to have numerous small shade locations so that the birds will be better distributed over the range. County Agent R. C. Blaney suggests, if the shade is not too dense, sunshine will reach most of the ground some time during the day. This dries and sterilizes the soil and aids in preventing filthy spots from developing. Pulletts like to crowd under brush piles, but the ground soon becomes covered with droppings and unsanitary for the birds.

Where this condition exists, the dense bushes should be thinned and the lower branches of the trees removed to permit the rays of the sun to penetrate to the ground. When this is done, the pullets will extend themselves over a larger area.

On farms having strip farming, a combination of shade and grass is provided. With the colony houses or range shelters placed on the grass, the chickens will have the corn for shade. Wheat or oats in near-by strips will be eaten by the pullets as the grain ripens, reducing the amount of feed that must be carried to the range.

Birds that have been ranging regularly in wheat or oats will suffer no ill effects from the new grain as long as they have access to satisfactory amounts of mash and other grains. The pullets will eat their regular ration before starting on the standing stalks.

Of the German war vessels sunk in Scapa Flow during the World War, 25 destroyers and three battleships have been raised.

FARM CALENDAR

Timely Reminders From The Pennsylvania State College School of Agriculture

Guard Against Disease—Chicks should be kept growing in clean, dry, well-ventilated quarters. The best protection against poultry diseases, say poultry specialists of the Pennsylvania State College. Careful, common-sense brooder house management will prevent set-backs which often result in stunted growth or make the birds prey to diseases.

Store Wools Properly—Wools keep best when stored in a cool, dry place. They should never be stored in a cellar or basement where they may take on moisture. It is always advisable to pack cotted, dead, black, gray, seedy and burry wools separate from the good fleeces, say Penn State livestock specialists.

Peach Thinning Needed—Although age and vigor, and the size of fruit influence pruning, 5 to 8 inches between fruits generally is adequate for early peaches while 4 to 6 inches may be suitable for the latter and larger varieties. Penn State fruit specialists recommend saving the larger and more perfect specimens.

Control Tent Caterpillars—To control tent caterpillars use 3 to 5 pounds of acid arsenate per 100 gallons of water. Applications should be made at once, preferably with a high power sprayer. When caterpillars become larger the amount of lead arsenate must necessarily be increased to as much as 10 to 15 pounds, say Penn State entomologists.

Irrigate the Garden—Overhead irrigation is ideal for the home garden. A simple portable system may be installed cheaply where water under pressure is available near the garden, say Penn State vegetable gardeners. The system will last many years and may be left outside over winter if drained in the fall.

ROOSTING SPACE IS NEEDED BY PULLETS

Do you have plenty of roosting space for your pullets? If not, arrangements should be made at once to take care of the requirements, suggests County Agent R. C. Blaney. Leghorns should be roosting at 5 to 6 weeks of age and heavy breeds at 6 to 8 weeks. Unless birds are roosting, they have a tendency to crowd in the corners. Quiet often some are smothered and others stunted, the litter becomes wet and filthy, and an outbreak of coccidiosis may follow.

R. C. Blaney recommends that the birds be placed on the roosts the first night they are in the range shelters after being moved from the brooder houses. Usually they will go on the roosts of their own accord the second night. However, if they sleep on the floor the first night, they will be harder to train. As the birds grow, they will require more roosting space.

Farmers to Gather At Penn State

(Continued from page one)

The poultry staff will conduct groups of poultrymen on tours of the poultry farm. Research work in genetics and feeding will be discussed, hen shelters and poultry house construction will be considered, ring-necked pheasant investigations will be observed, and such management problems as incubation, brooding and the care of the young stock on the range will be explained. Turkey management will also be discussed.

Special features on the program will be a picnic dinner in the College woods followed by entertainment and recreation and a sight-seeing bus tour over the College farms every 20 minutes. The fourth annual state-wide rural chores contest at 2:30 p. m. will complete the day's activities.

Modern Etiquette

1. When the ceremony is finished, at a church wedding, shouldn't the members of the families be allowed to leave first, before the other people?
2. Shouldn't the word "dear" be capitalized in the salutation of a letter, as "My Dear Mrs. Adams"?
3. What is the real definition of "dinner"?
4. Are introductions of a new employee necessary in a business office?
5. Where should the date be placed on a brief social note?
6. When giving a tea at a club for a large number of guests, would it be all right to omit napkins?
7. Is corn on the cob appropriate to serve at a dinner party?
8. When should wedding guests call upon the bride?
9. Is there any traditional color that one should wear on a tennis court?
10. Should a woman use heavy perfume when traveling on a train?
11. When there is to be no wedding breakfast, how should the wedding cake be distributed to the guests?
12. When a man is dining in a restaurant with a woman, and another woman stops to speak to them, is it necessary for him to rise?

Answers to Modern Etiquette

1. Yes, this is proper.
2. No; it should be written, My Dear Mrs. Adams.
3. Webster says a dinner is "the principal meal of the day, eaten about midday or in the evening; also a formal feast in honor of some person or event."
4. This depends entirely upon the host and character of the staff. If the staff is small, the new employee may be introduced, but it is not necessary when there are a great number of employees.
5. It is usually placed below and to the left of the signature.
6. Yes.
7. No; there are so many other things to choose from, that it is not necessary to serve the guests anything that might be difficult to eat.
8. Soon after she has returned from her wedding trip.
9. Yes; white.
10. No; nor when traveling on a boat, bus, or plane. A heavy perfume is often obnoxious to other passengers, and sometimes will even make a very sensitive person ill.
11. It is cut into small pieces, placed in white boxes, and tied with white ribbon.
12. Yes.

Health and Beauty

HINTS TO BEAUTY SEEKERS

Women throughout the ages have been seekers after beauty. They have realized that good looks were a great asset to them on this mundane sphere. Some of the most famous women of history have been described by contemporary historians as exceedingly lovely, yet the pictures and representations of them that have come down to us are far from our ideals of pulchritude. Cleopatra is a notable example, yet she certainly swayed the minds and held the hearts of the most noted and powerful men of her time in her hands.

Shakespeare makes Anthony exclaim: "Age cannot wither her, nor custom stale her infinite variety. She was popularly supposed to be fifty years old at the time. Her personal charms, liberal education, keen intellect and great magnetism seem to have enabled her to keep half the world at her feet for a period of many years.

The most beautiful and influential woman of past ages have not all been noted for their goodness by any means. Had they been as virtuous as they were powerful, the world would have had a better history.

The modern women are perhaps more intelligent in the application of those of past ages. This is due to the fact that knowledge is now more widely disseminated. We know that no mere external application is going to compensate for a hollow chest, stooped back or pale and pasty complexion. Health must be the foundation upon which physical beauty must rest. It even goes far beyond that, a sour or discontented disposition stamps itself indelibly upon the countenance, and renders its possessor repulsive instead of attractive.

The fashion magazine articles of beauty seem to be written by advertisers of toilet concerns who wish to sell their preparations. In the midst of all this hally-hoo, there is often a good deal of sound philosophy dispensed at the same time. One such article in a very high class magazine began by saying "no beauty can be a beauty today without a good skin. It is one of the prerequisites of the whole business. The skin itself must be clean and clear and healthy."

Now, remember this, a clear skin is due to several causes, chief of which is a healthy body. External beauty preparations have their place and help a great deal, but they have their limitations no matter how meritorious they may be. You must be systematic and persistent about your acquisition of beauty, or in keeping what you have.

Begin your day by drinking two glasses of water and one of fruit juice before breakfast. Oh, no, not one right after the other, but at intervals while you are taking your daily doses and breathing exercises, after which comes your cool bath, and a thorough friction rub all over with a large crash towel. You will enjoy your breakfast, for the preliminaries that lead up to it will give you a general feeling of well being and content.

(To be continued)

Louisa's Letter

Dear Louisa:

I am sixteen years old and a group of six boys have arranged a house party at the beach and I am one of the girls invited. My mother doesn't want me to go. Don't you think it would be all right if we have chaperones?

SIXTEEN.

ANSWER:

Your husband probably knows that he can worry you more that way than in any other and uses such a method to punish you and the children for what wrong he thinks you have done.

On the other hand, he may belong to that specie who believes in peace at any price, but to my notion such peace is clearly paid for. It is not necessary to have words over things we dislike, but it is much better to tell those who do such things that we do dislike them, and why. If we hide our feelings and growl around instead, it does us harm and others also.

We have no outlet for our feelings and if we try to hide them they grow bigger and bigger inside of us until we are seething inside with a sense of being wronged. Much better it is to have an understanding about things and disagree on and drag them out into the light and look them over dispassionately. Things that look like monsters when they are hidden in the dark often turn out to be very harmless affairs.

I don't know what you can do about your husband's silence. You might try the same racket and when he goes on a word strike, you go on one also. It's just a question of who will weaken first.

LOUISA.

My husband never raises his voice to me or the children but when he gets mad or doesn't like something we do, he closes up like a clam and won't speak to us for days except in monosyllables. What can you do with a man like that? Half the time we don't know what's the matter with him but it certainly does get on all of our nerves.

MARY J. M.—Ala.

LEVEL CULTIVATION BETTER THAN RIDGING OR HILLING

Careless and improper cultivation is often the cause of damage to garden crops. County Agent R. C. Blaney suggests that everyone consider carefully the rooting habits of various vegetables and the effect that cultivation may have on them.

Spinach, lettuce, radishes, onions, endive, beets, carrots and similar vegetables grow rapidly and mature quickly. All are shallow rooted and most of them have fibrous root systems. Practically the entire rooting system is in the top foot of soil, and three-fourths of the roots are found in the upper or plowed layer, which is loose and contains the fertilizer. Because of this, he recommends level and shallow cultivation which does much good and no damage.

Deep cultivation close to the row destroys many surface roots and ridging against the row exposes the surface roots between the rows.

If cabbage, tomatoes, peppers, eggplants, and similar crops have been set deeply enough, hilling is unnecessary. Level, shallow cultivation is equally important for these

NOTABLES TO RACE AT ALTOONA SPEEDWAY

Four Californians, each boasting impressive records on Pacific Coast Tracks, will carry the hopes of the far west in the Altoona Speedway's 100-mile championship classic June 11.

Topped by Johnny McDowell, darry Alameda, Calif., driver who finished fourth in national Central States Racing Association rankings in 1937, the brilliant quartet includes Duke Dinamore, San Diego; Dick (Spider) Webb, Bell and Bayless Leveritt, San Francisco.

McDowell was the only driver to defeat Everett Saylor, defending national titleholder from Dayton, O. three times during the 1937 campaign. Saylor already has entered the June 11 event.

INTEREST GROWS ON STATE'S UNEMPLOYMENT FUND

Interest on Pennsylvania's Unemployment Trust Fund has passed the million dollar mark. Secretary of Labor and Industry Ralph M. Bashore announces.

Reports from the Federal Treasury at Washington, D. C., where the money is deposited to Pennsylvania's account, showed that \$1,338,523 of the \$76,422,993 credited to this State represents accumulated interest to April 1, 1938. For the first quarter of 1938 alone, interest amounted to \$453,715.

"All money collected in the form of contributions from covered employers is immediately deposited in the Unemployment Trust Fund in the United States Treasury," Secretary Bashore explained, "to be used solely for the purpose of paying unemployment compensation benefits."

"These figures on accumulated interest reveal that the fund is a 'silent partner' of Pennsylvania's more than 140,000 contributing employers, working shoulder to shoulder with them to build financial reserves that will later go to eligible unemployed workers of Pennsylvania."

Statistics compiled by the Division of Unemployment Compensation and Employment Service indicate that the average amount of benefits received by qualified unemployed workers is nine weekly checks of \$11.00 each, or a total of \$99.00. On this basis, the interest accumulated on Unemployment Trust Fund money would cover benefit payments of 13,520 claimants.

From the currently accumulated interest alone, payment of minimum benefits could be provided for 109,715 compensables, or payment of maximum benefits of \$195.00 could be furnished for 6,864 compensables.

CHURCHES

Evangelical-Reformed, Bellefonte
Church School 9:30; Morning Worship 8:15 a. m. and 10:45 a. m. Notice: No evening services will be conducted during the month of June.

Presbyterian, Snow Shoe
Services June 8th. Bible School 10:00 a. m.; Morning Worship 11:00 a. m.; Christian Endeavor 6:30 p. m.; Evening Worship 7:30 p. m. Unionville—Meeting to consider Bible Study Class on Friday evening, June 3. Edward E. Oakwood, Minister.

St. John's Lutheran, Bellefonte
Whitsunday, June 5, 9:30 a. m. Sunday School; 10:45 a. m. The Sermon and Sermon: "Another Comforter." There will be no Vesper service, the congregation uniting with the other churches in the Baccalaureate service in the Presbyterian church. Clarence E. Arnold, pastor.

Hubersburg Evangelical-Reformed
Rev. James B. Mauer, Minister. Services Sunday June 5th. Zion—Union Sunday Church School 9:30 a. m.; Morning Worship with sermon; Children's Day June 12th. Trinity (Hubersburg)—9:30 a. m. Sunday Church School; 7:30 p. m. Preaching service. Children's Day service the evening of June 19th.

Bellefonte Evangelical
John B. Mays, pastor. Pentecostal services will be continued each evening this week. The service of Worship on Sunday morning at 10:45 will include reception of members and the semi-annual Financial Rally. The theme of the sermon will be: "They That Gladly Received His Word." There will be no evening service because of the Baccalaureate service at the Presbyterian church.

Christian and Missionary Alliance
Missionary Prayer Meeting, Tuesday 2:30 p. m., at the parsonage, 116 Pike St. Mid-week Prayer Meeting, Wednesday 7:30 p. m.; Sunday School, 9:45 a. m. classes for all ages; Morning Worship 10:45 a. m. with Communion. Following the morning service: Young People's service 6:30 p. m.; Praise and song service at 7:30 p. m.; Evangelistic service at 8 o'clock. We extend to everyone a hearty welcome to attend any or all of these services. Edward G. Murray, Pastor.

United Brethren, Bellefonte
G. E. Householder, Pastor. Unified services at 9:30 a. m. J. R. Shope, Supt. in charge; Order of services as follows: Devotional period at 9:30; sermon by the pastor 9:50; Study Sunday School lesson 10:20; closing exercises at 10:50; Benediction at 11 o'clock. Christian Endeavor at 6:30 p. m. No evening services on account of the Baccalaureate services to be held in the Presbyterian church; Prayer meeting Wednesday evening at 7:30; Choir rehearsal Friday evening; Junior choir at 7 o'clock; Adult choir at 8 o'clock.

CHRISTIAN ENDEAVOR RETREAT SET FOR JUNE 17-18

People who try to figure out the result of the elections this Fall can save a lot of mental worry by waiting until November and letting the newspapers tell them the results.

Centre county's annual week-end Retreat, sponsored by Centre county, June 17-18. You can't afford to miss it at Ralph Watts' cabin (Andy Lytle).

Inspirational, educational, recreation, Bible study, conferences, and consecration.

You ask whom? Earl Kuch, state president; Larry Israel, state alumnae superintendent; county leaders, pastors and you.

It has been planned for you, so take advantage of it. What! Bible study, worship, good times, friendship, and friendly talks. What more could you want?

Price 50c and \$1.00 per box at drugstore. If you can not be supplied locally, send direct to our laboratory. ACCEPT NO SUBSTITUTE.

FREE TRIAL OFFER. One regular 50c box will be mailed to any family ONCE for 10c to cover mailing expenses.

A. G. LUBBERT, P. D. Coatesville, Pa.

Sold and recommended by Parrish and Zeller's drug stores.

RICH RED BLOOD

Good Health Rich Blood Atoning Vitality

You can have all these—IF—when you feel below par, you will take LUBBERT'S IRON TONIC TABLETS. Composed of the chemical foods which your body needs to build new vim and vigor. If you are weak and run down—TRY THEM. Easy to take, no nauseating liquids.

Price 50c and \$1.00 per box at drugstore. If you can not be supplied locally, send direct to our laboratory. ACCEPT NO SUBSTITUTE.
