1 The GENERAL ELECTRIC Triple-Thrift REFRIGERATOR is a product of the combined research, engineering skill and manufacturing experience of the world's largest electrical manufacturing company. It is thrifty in price, thrifty in current, thrifty in upkeep.

2 The all-steel refrigerator cabinet, the sealed-in-steel cold-making mechanism, the 5 year performance protection plan all were originated by GENERAL ELECTRIC.

3 Although the sealed-in-steel G-E THRIFT UNIT is now widely imitated it is still years ahead. For G-E's sealed mechanism has long since passed the experimental stage, and is the only one that has been constantly improved for twelve years. OIL COOLING is a GENERAL ELECTRIC development that assures quiet operation, low current cost and long life.

4 GENERAL ELECTRIC has built and sold more refriger-ators with the popular sealed type of mechanism than any other manufacturer.

5 The GENERAL ELECTRIC is recommended to you by millions of satisfied users, and has an unparalleled record for enduring economy.

6 GENERAL ELECTRIC new economy models of 1938 climax a smashing 12-year record of ever increasing values (see chart). And this first choice of millions is now popularly priced!

State College

THORE

Be cautious of choosing any refrigerator that is too big a bargain. Remember, when you buy a General Electric your money is invested for years-not spent! Start a new G-E "save waye" in your kitchen this week!
