Plan Display of Fire-works Here on 4th
(Continued from page one)
from local business houses and industries. Since practically everyone enjoys a good bang-up show of fire and brimstone, contributions are coming in rapidly, and the goal of \$150 is well within reach. Among the firms which have contributed up to the present time are the following: Athletic Association and Titan Metal Company; the Elks; American Legion; City Bakery and employes; C. Y. Wagner & Co., Chamber of Commerce, West Penn. Power Co.; First National Bank; Court House officers and employes; American Lime and Stone Company; Bellefonte Trust Company, and the Claster Lumber Co. The displays will be erected at one end of the spacious field, in full view of the bleachers, and firing of the various pieces will be in charge of experienced men. A truck from one of the local fire companies will be on hand as a safety measure, and the spectators will be well protected from all danger.

Constitutional Investigations
Result in the discovery of much information, but oftentimes this is the end of it.

Sarah Ann's Cooking Class

Salad and warm weather just naturally seem to go together. In early days it was made of herbs and leafy vegetables, today we made salad from almost any appetizing combination of foods and serve it as a first course, as a main course at luncheon or frequently as a dessert. The materials for it must be the newest and freshest of the season, emphasize contrasts in flavor, texture and color. The salad plates should be chilled, also the lettuce and other garnishes; and any dressing that may accompany the salad should be cold.

Vegetable Salad
1/2 cup cooked diced carrots.
1 cup cooked peas.
1/2 cup cooked butter beans.
1 cup diced celery.
2 tablespoons minced chives.
1 cup cooked salad dressing.
6 large tomatoes.
1 green pepper.
6 anchovy filets.
Curly endive or lettuce.

Frozen Cheese Salad
1 cup evaporated milk.
1/2 cup lemon juice.
2 packages cream cheese.
1 cup chopped dates.
1/2 cup mayonnaise.
1 cup crushed pineapple.

Vegetable Bouquet Salad
Place your preferred mixture of vegetables in a lettuce nest. Top it with cooked cauliflower. Circle with cooked carrot slices cut in stars, surround with peas. Lastly have a circle of tomato sections or diced beets. With a sprig of parsley in the center of the cauliflower, you have an old-fashioned bouquet.

Jellied Cheese and Beet Relish Salad
1 pkg. lemon flavored gelatin.
2 packages cream cheese.
1 cup cooked chopped beets.
1 cup chopped raw cabbage.
1 tablespoon minced onion.
Lettuce.
Sliced cucumber, mayonnaise.

Salmon Salad
1 lb. can of salmon.
4 chopped, shredded, hard-boiled eggs.
1 1/2 tsp. par. caviar.
4 tablespoons chopped pickle relish.
1 cup mayonnaise.
Lettuce, stuffed olives.

Cottage Cheese and Peach Salad
1 lb. cottage cheese.
Lettuce.
6 tablespoons honey.
6 halves of fresh peaches.

Chicken Fruit Salad
2 cups diced cooked chicken.
1/2 cup pitted white cherries.
1/2 cup diced canned pineapple.
1 pared orange sliced.
1/2 cup chopped pecans.
1 cup French dressing.
Lettuce-watercress.

Emerald Salad
Border individual plates with green lettuce leaves, slice green peppers as thin as wafer and chill in ice water. Drain, dry and arrange on the lettuce with minute shreds of onion, top with sprigs of water cress. Serve with French dressing made red with shredded pimiento.

Hot Weather "Don'ts"
Nine hot weather "don'ts" that all persons might well observe this summer have recently been compiled by a health organization at Rockefeller Center, and are as follows: (1) Don't overeat or over-drink. (2) Don't fail to sleep with the windows open. (3) Drink at least six glasses of water, cooled, but not less daily. (4) Don't fail to bathe daily. (5) Don't eat much and not more than once a day. (6) Don't fail to get eight hours' sleep every night. (7) Don't fail to get a typhoid inoculation before leaving the city. (8) Don't overwork. (9) Don't wear heavy clothing.

Council to Get Facts on Sewage Project

(Continued from page one)
suggested. With 45 per cent of the total cost of the plant available through a P. W. A. grant, and with the remaining 55 per cent in sight through the issuance of non-debt revenue bonds, which would be bought by the government, one of the greatest problems connected with the construction of a sewage disposal plant here is somewhat minimized. Remaining for discussion are innumerable other problems upon which Council touched in a discussion, and which are slated for the special meeting to be called at the convenience of the Pittsburgh architects.

J. Thompson Henry, foreman in charge of the Lamb street W. P. A. project appeared in Council at the instance of Councilman Sieg, who declared that before the project reopens, Council should either endorse Mr. Henry's management of the project or should discontinue paying attention to the criticisms which have been received.

Councilman Brockerhoff replied to Mr. Sieg's suggestion to the effect that criticism for the manner in which the Lamb street project has been conducted, and that because of that criticism WPA officials have decided to "run" the remainder of the project—guaranteeing satisfaction to both Council and to the WPA. If their conduct of the job is not satisfactory to Council, Mr. Brockerhoff continues, Council can at any time withdraw their sponsorship of the project.

Various other Councilmen reported some of the complaints they have received as to the management of the work, and Mr. Henry gave his version as to the reason for such complaints. As the discussion drew toward a close, Councilman Sieg and W. J. Emerick reported that before the project re-opens in the next few days, Mr. Henry should obtain instructions from the WPA headquarters at DuBois as to just what his rights are in handling the workers and conducting the job.

To this suggestion Mr. Brockerhoff remarked somewhat cryptically: "The WPA will do the work—they will handle it themselves," and the discussion ended.

The Sanitary and Water Committees were instructed to consult the borough solicitor in regard to the passing of a plumbing ordinance, as required under State laws. Under the regulation, all plumbers would be required to pass a state examination; a code of charges would be adopted, and all plumbing work would have to pass inspection by a Borough Inspector. It is understood that most Bellefonte plumbers have taken the examination and are now qualified under the terms of the proposed ordinance.

Mrs. Nellie Geary, superintendent of the Centre County Hospital, in a letter to Council asked that steps be taken to curb fast driving in the hospital zone on Willowfork street. The present speed limit in the "HNT" area, the latter set forth, is a source of annoyance to patients, and constitutes a danger to pedestrians and other motorists.

The Fire and Police committee was directed to erect speed limit signs to the borough line on that street, while the State Motor Police will erect signs outside the borough to the Miller store, and will aid in enforcing the speed limit.

The Water committee noted collections totaling \$596.99, of which \$550.49 represented income from water taxes.

Approval was given Guy W. Lyons for the construction of a concrete block addition at the rear of his plumbing shop on West Bishop street, to replace an old wooden structure. A total of \$25.50 was turned in by Mayor Hardman P. Harris from fines and costs collected.
