

Over The County News

A portable ramp was built for use on Grange Park during last week. It is a convenience greatly needed for the loading and unloading of heavy machinery, tractors and the like, also for horses and cattle. The ramp may easily be dragged with a tractor on track to the point needed.

Lynn Breon of Centre Hall, is locomoting on crutches due to the snapping of a ligament in the back part of a foot and ankle. The injury was due to a fall on running to first base in the Centre Hall-Spring Mills ball game on Saturday. Last week Breon, one of the heavy swatters in the local team, also suffered an injury.

Charles Lucas, of near Joliet, Ill., met with a serious accident while engaged on construction work. A scaffold on which he was standing collapsed and in the fall Mr. Lucas crushed one of his hips. Mr. Lucas is a son of Wm. H. Lucas, late of Potter township. When he first went to Illinois he engaged in farming but later switched to carpentering, a trade learned in the east.

At Rev. J. J. Weaver's public sale of personal property and real estate held last Saturday afternoon on the premises in the Millheim Narrows, most of the items of household goods, and souvenirs, and sold at reasonable prices. The cottage, bid up to eight hundred dollars, was not sold but is to be sold for that figure, since it represents an investment of more than twice that amount. It is likely that the cottage will be sold privately at a later date.

A total of 26,332 feet of walks have been laid in Phillipsburg borough under the project being conducted there by the Works Progress Administration. Of this total, sidewalk construction 7,472 square feet, of concrete walks have been completed. Walks relaid with used brick total 19,460 square feet. So far on the project no new brick walks have been put down. At the present time the borough holds contracts for a total of 103,039 square feet of sidewalks. This is divided into 27,742 square feet of concrete, 71,263 square feet of concrete and 3,034 square feet of new brick. Contracts paid to date are listed at 157 and of these 43 contracts have been completed.

Vernon Garbrick, of Centre Hall, is making preparations for the erection of a work shop on a tract of ground purchased from Mrs. Mary Stahl on the west side of Main street. The structure contemplated will have dimensions of 40x50 feet and will be built of concrete blocks. Mr. Garbrick's principal business is electric welding, which is done at his business place and also anywhere he is called. The electric welding device is mounted on a motor trailer and may easily be carried to distant points where work on heavy machinery or other machinery not conveniently removed may be repaired on the spot. The new shop will be located thirty or forty feet back of the street line. Mr. Garbrick contemplates the erection of a private residence on the same site at a later date.

Tractor Strikes Beech Creek Barn

taken from nearby Maaden Creek which was pumped dry before the blaze had completely subsided. All the Bickel horses and cattle except the four calves were intact. Just as the skeleton of the building crashed, an agonized howl was heard from one of the calves.

Young Van Gorder apparently suffering only minor injuries, was considerably shaken up by the fall and its consequences and was taken to the Lock Haven Hospital. His injuries are burns on the right arm and chest, sore right shoulder and hip, a sprained forearm and a right hand. An x-ray examination revealed no broken bones.

After the flames had died down, it was noticed that the wooden beam which had supported the floor in the second story was broken instead of burned off. It was suggested that had given way under the weight of the machine and caused the floor to begin to collapse. Young Van Gorder, confused in the unexpected catastrophe, was unable to give a complete account of just how the accident happened.

Mr. Bickel states that the barn, the cattle and the tractor were insured. The insurance, included \$2,500 on the barn. Total damages were estimated at between \$6,000 and \$7,000. Work on a new structure will be begun as soon as the debris can be cleared from the foundations which are still intact.

There are still six acres of oats on the farm, unharvested. Mr. Bickel also hopes to salvage some of the grain that was in the fire. He believes that, although the stored crop got pretty well scorched around the edges, there is a good deal of usable grain left.

The large barn standing near the road, was part of the Bickel homestead, where the Bickel family moved a year or so ago, from Lock Haven, where they had resided for many years.

CAMBRIA COUNTY FAIR OFFERS GREAT ATTRACTIONS

While literally hundreds of attractions will be offered visitors to the Cambria County Fair which opens Labor Day, Monday, September 5 and continues throughout the week at the transformed Ebensburg Fair Grounds, some of the most interesting and profitable attractions which are being prepared by James Wilkinson, racing secretary of the Fair Association. The new track which is being laid as part of a \$140,000 WPA project at the Fair Grounds will be one of the finest in the State, Mr. Wilkinson declares.

"I feel certain when the horses go to the post on Labor Day that racing fans will be more pleased with the track," Mr. Wilkinson said. "A great deal of money will have been expended to make the track one of the best in the State and I feel certain we will be amply repaid by the pleasure derived by the fans." While the racing events will undoubtedly attract thousands, amusements to meet the desires of a varied multitude will also be offered. Presented every night in front of the grandstand will be Ernie Young's "Passing Parade," one of the outstanding attractions on the stage today. The principals are stars from the various vaudeville circuits and revues, while a chorus from the various Follies and Hollywood studios will feature. More than a dozen vaudeville acts will be offered every afternoon in front of the grandstand.

The agricultural, stock, industrial and horse and mule pulling contests will be just a few of the exhibits which will vie with each other for the applause of the thousands of visitors.

REFRIGERATOR EFFICIENCY IS TESTED BY HOT WEATHER
During the hottest days—when the kitchen thermometer reads 90 to 95—50 per cent more electricity is used to maintain the proper food temperatures in the refrigerator than during the days the thermometer reaches only 70 degrees.

Frequent opening and closing of the refrigerator cuts down on its efficiency. Miss Edith Morton, home economics extension specialist at the Pennsylvania State College, said this week. She advises housewives to form the habit of taking several articles from the refrigerator at one time, closing the door as quickly as possible and jatching it tightly. Placing the refrigerator next to the kitchen stove or in a sunny place on the porch is like exposing it to a continuous hot day, Miss Morton claims. Every bowl, plate, paper sack, as well as every bit of food placed in the refrigerator should have a perfectly good reason to be there. Many refrigerators do unnecessary cooling and unnecessary expense to the household. "Cold air falls; warm air rises," Miss Morton said. "This rule will help locate the frigid zone in the refrigerator. A thermometer set at different places will help locate the exact spots. Because milk, cream and raw meats are especially inviting to bacteria, store them in the coldest section of the refrigerator. "Overcrowding cuts off air currents and reduces the efficiency of the refrigerator. Dishes are better than paper sacks for food storage as they allow free passageway for the cooling air currents. "Keep the refrigerator clean, avoid overcrowding, cool hot dishes before storing them, and the housewife will help to increase the efficiency of her refrigerator, whether it is ice, gas, kerosene or electricity."

FARM CALENDAR
Timely Reminders from The Pennsylvania State College School of Agriculture
Improving Farm Woodlots—The first important thing in woodlots 25 to 35 years old in which most of the trees are 5 to 6 inches in diameter is suggested by forestry extension specialists of the Pennsylvania State College. Remove crooked, unsound, short and limby trees. Dogwood, aspen, ironwood, fir, spruce and juniper may all be cut. The trees will provide fuel wood, small mine timber, and sometimes pulpwood.

Strips Lessen Erosion—Heavy rains this summer have been of little concern to farmers whose fields have been stripped on the contour with alternate crops of corn or potatoes and close growing crops, report agronomists at Penn State. On other farms, losses of soil from erosion were being serious.

Moving Pullets—Catching crates simplify the job of moving pullets from the range to the laying house, according to Penn State poultrymen. The trick is to place turkey crates end to end before the door of the range shelter with all the ends open except the last. The pullets are driven into the crates, the ends inserted, and the birds are all ready for moving to the laying house.

Guard Against Aphids—One of the commonest of cabbage growers danger is the control of cabbage aphids. Heavily infested plants seldom produce satisfactory heads. Destruction of infested plants and dusting of the remaining with four per cent nicotine dust is suggested by entomologists of the Pennsylvania State College.

Flowers for Next Year—Seeds of hollyhocks and delphinium may be planted as soon as they ripen, according to Penn State ornamental horticulturists. Sow forget-me-nots now for early blooms next year. They make an attractive carpet planting for tulip beds.

800 Present at Scotia Picnic

(Continued from page one)
Samuel Bryant acted as director of the band, and the concerts before and after the lunch hour were greatly enjoyed. The speaking program began at 1:45 p. m., with Harry E. Williams, of Bellefonte, former well known Scotiote, as toastmaster. The first speaker, the Rev. A. G. Herr, of Bellefonte, recalled the people of Scotia lived as one big family, with loyalty to one another being a community characteristic.

Dr. W. R. Henton, of Phillipsburg, who taught school at Scotia in 1860 and 1861, called his former scholars to the speakers' platform and spoke of the great interest he and his pupils took in the work of the church at Scotia. John Blair, of Buffalo Run Valley, who taught school in the ore-mining town in 1890 and 1891, presented a school card bearing the names of all his scholars and a number of them answered as the roll was called.

James Van Zandt, of Altoona, spoke on the American system of government and Democracies in general as contrasted with Communism and other forms of government in European countries. He compared the freedom enjoyed in the United States with the much-talked-about "freedom" in other countries, which really amounts to government oppression.

Memorial services in honor of the memory of former Scotia residents who have passed away were in charge of the Rev. O. R. Williams, of Millersburg, former rector of Scotia, and the Rev. H. Willis Hartsock, of Bellefonte, a native of Buffalo Run Valley. Impressive tribute was paid to the many persons, now deceased, who helped to make Scotia the town which will never be forgotten as long as any of its former residents remain alive.

Most of the day was spent in greeting old neighbors and friends and in reminiscing over the past. One attraction was a display of old photographs dating from 1880 to 1911, and showing various persons and scenes in the old town. Dr. Henton brought to the picnic a photo of himself and his scholars which he prizes highly. Nine former Scotia schoolteachers were among those who spent the day at the picnic grounds.

Other features of the occasion included music by John Martin's stringed orchestra from State College, which kept the crowd well supplied with music. The committee takes this means of expressing thanks to all persons who in many ways contributed to the success of the outing.

Drops Baby To Death

Holding her five-weeks-old infant out of a fourth floor, New York window for her next-door neighbor to look at, the infant unexpectedly squirmed and fell from the arms of his mother, Mrs. Sally Glantz, to the concrete pavement below. It was dead when it arrived at a hospital, two blocks away.

Japs Get Oil
Advices are that two Japanese vessels have loaded cargoes of fuel oil at a Mexican port on the Gulf of Mexico, despite the statement of President Cardenas that no Mexican oil will be sold to Japan.
