You must have noticed that some of your friends hold their reading matter far from their eyes. Have you ever wondered why they do that? The cause is a loss of the focusing power of the eyes. Can this be restored? Not naturally. But it can be supplied by a competent eye service. All who read with difficulty should note the above. Continued week after next.

BASEBALL PLAYING HITS ALL-TIME HIGH

"More baseball was played this summer in the United States than ever before in history. The reason, simply because today our cities and towns all over the country have furnished their boys more and better ball-fields than ever before." These observations were voiced by Ernest C. Quigley, National League Supervisor of Umpires, upon his return recently to his Rockefeller Center desk after his annual tour of the baseball map. His trip took him far and wide, and his study of baseball as it was played by the stars of school age brought him home brimming with enthusiasm. "I was particularly impressed by the ball-fields I saw in towns of about 8,000 to 10,000. These fields are the result of some form of public works program. They are regulated by the town authorities—always kept clean and in playing shape. All in all they are what the kids of my boyhood would have considered a sort of heaven-on-earth."
