declared. "The medical profession permission to marry. doesn't know the cause of cancer, bringing about apparent cures in its hearted co-operation. early stages," he said.

Cancer, which now holds second

What causes the breakdown of unknown, the surgeon pointed out. gle injury, the speaker went on, but repeated injury or irritation defintely may result in cancer. Chronic ulcers, jagged teeth, broken dentures, sores which do not heal readall should be regarded as possible sources of cancer, the speaker library. said. Doctors, nurses and persons who care for cancer patients never contract the disease in that man-"There is no danger of contracting the disease from contact with a person afflicted," Dr. Waterworth stated. "It is not infectious."

Deploring the fact that cancer more about him than we did before. cause so many deaths from cancer mean absolutely nothing. They may a disgraceful thing," expressed the present issues. hope that in the future more accur-

more danger of contracting the mal-

the disease. In the early stages there

erworth recommended constant attention to the mouth, stressing the need of keeping the mouth clean. Take care of ragged areas, have dead teeth removed, beware of ulcers, and particularly beware of sores of the lower lip. he warned. Cancer of the lower lip spreads to the neck glands and down into the chest unless treatment is begun

Sailors and farmers are more further irritant. He recommended thorough and frequent washing of

Cancer of the esophagus, he conliquids over a period of time, or by New Dealers propose to change that eating irritating foods. He suggest- order of things. ed drinking a glass of water after gus as a preventive measure.

Stomach cancer represents about teen per cent of all cancers are located in the large intestine. Rectal cancer is frequent, as are cancers special to women. Throat cancer is quite frequent but can be cured if

treated early, he stated. Ninety per cent of all skin cancers can be cured if they are discovered early and treated effectively, the speaker said. Cancer always kills if it is left unchecked long enough. There is no such thing as spontaneous cure of cancer. As to internal cancers, Dr. Waterworth said many of them can be checked if discovered early enough. He advised middle aged persons and older ones to have thorough examination if they notice such symptoms as prolonged stomach trouble, any marked change in bowel habits, any sores which do not heal, or any growth of the money-\$40. upon the body. The best system, he suggested, is to have every man and women undergo a thorough physical

examination once a year. Dr. Waterworth described cancer quacks as the lowest form of human vultures, for they not only sell treatments which can do no good, but take money from people who are ill. "The people of my town spend approximately \$20,000 annually for patent medicines," Dr. Waterworth declared.

Warning against newspaper and magazine advertisements of socalled cure-alls, and against press notices of the "discovery" of "cancer cures," Dr. Waterworth declared that with the intelligent cooperation of the public, the annual toll of cancer can be very materially

"The medical profession is only 2,000 to 3,000 years old," Dr. Water-worth said, "Most of what is known today has been learned in the past 60 years. In the next 1,000 to 2,000

years the medical profession, now one of the youngest of the profes-

sions, will really reach its stride." Turning briefly to the study of syphillis, Dr. Waterworth described the three stages; first, a local sore which fails to respond to usual treatment; second, a rash like measles, falling out of hair and eyebrows, mucous patches on lips, throat and other moist parts of the date are as follows: body, and third, appearance of copper colored lumps on and in the body, possible insanity, and other conditions. The first two stages are

infectious. Syphillis may be contracted directly or indirectly from a person afflicted with the disease, or may be of congenital origin. The malady is not of a hereditary nature. In congenital syphillis the germ is implanted in the child either by the mother or father.

infectious. The third stage is not so

Dr. Waterworth declared in his opinion no person afflicted with syphillis is cured unless he has at was provided by the chorus of the least three years of treatment; has gone one year without treatment "Neither Franklin nor Edison and has had three or four blood knew the exact nature of electricity, tests during the year with no posibut they achieved almost unbeliey- tive reactions, in such instances, Dr. able sucess in controlling that great Waterworth said, the patient can be source of energy," Dr. Waterworth considered cured, and is entitled to

"Syphillis," Dr. Waterworth debut medicine has made great strides clared, "could be wiped out like in controlling the disease, and in measles if the public gave its whole-
