KEEP SWEATERS LOVELY WITH CAREFUL WASHING

Maybe Santa Claus left some downy soft sweaters of lovely glowing colors at your house. If you'll diligently follow these suggestions he'll be happy to see that they look "good as new" next Christmas.

Before washing a sweater for the first time, test for color-fastness by squeezing a cuff in clear lukewarm water, says Miss Helen S. Butler, home economics extension representative of Centre county. If all is well, proceed. But if the color runs, take the sweater to a dry-cleaner.

Turn your sweater wrong side out before putting it in the lukewarm suds made with a mild soap. Squeeze the suds through the sweater with swishy cupping motions, and let the bulk of the sweater rest on the bottom of the basin so that its wet weight does not pull it out of shape.

Rinse the sweater in several clear lukewarm waters. Lift gently, and after squeezing (not wringing) the garment between both hands, roll in a towel and knead to remove the rest of the moisture.

Put the damp sweater on a sweater form or shape it into the proper measurements on a towel or on a piece of paper on the floor. Leave in a shady spot away from direct heat to dry. When dry shake the sweater and brush with a clean brush to restore the nap.

Finally, mend all moth holes and little tears as soon as you notice them. Look for them particularly before washing. A stitch in time here will give those lovely sweaters the proverbial cat's nine lives.
