DEMOCRACY HAS A JOB

The mass of Americans find it difficult to believe that there are people in the world, some holding high positions, that denounce democracy and advocate forms of tyrannical government which were typical of other centuries.

The celebration, this month, of the 150th anniversary of the establishment of the American Congress, reminds us that, after all, democracy, in its modern version, is a babe compared to the other forms of government, Naturally, the people of some lands turn to autocratic forms when they face great issues that involve serious difficulties.

The success of democracy will not depend upon the oratorical efforts of office-holders, the activities of committees investigating subversive movements or the promises of men seeking public office. Democracy will not be conquered by any "ism" from foreign lands. It will probably stand, or fall, by its ability to solve modern problems that confront the individuals composing the people supporting it.

For example, consider the unemployment problem in the United States. Since the debacle that followed the splurge of 1929 millions of Americans have been unable to secure regular work. They have not had the chance to establish themselves or to look to the future, either for themselves or their families, with any confidence or se-

The present task of democracy, in the United States, is to provide jobs for these people, to give them some chance of success and some hope for the future. It is the obligation of business, which has produced the world's greatest economic structure, to solve the problem. Government has attempted to do so by "made work" but even the advocates of various forms of relief understand that there can be no permanent solution without the cooperation of those who control the economy of this country.

For the last few years big business has been assailing the government, denouncing increased taxation and talking about what could be done if somebody would "take the brakes off." Well, at last, it looks like Washington is inclined to accept the challenge and give business leaders the leeway that they have insisted upon, Maybe, our economic leaders will deliver the goods, which means, provide jobs for Americans who wish to work.

We do not know how far the government will go in complying with the requirements laid down by business leaders but it seems that Congressional leaders intend to give business an opportunity. Well, it will be up to the industrialists and the capitalists. It may be too much to say that our present economic system is having its last chance. If things go well, everybody will be happy but if the movement fails, you can look for future legislation that will make the New Deal program look like rock-ribbed conservatism.

SAYS THE STARS TOLD HIM

Admitting the slaying of his mother, a 38-year-old man recently asserted that the stars controlled his action. He said, "The stars would have killed every one if I had not killed my mother."

Of course, the man, who spent some time in a sanitorium a few years ago, was crazy. No sane man thinks that the stars would have killed anybody else or that they "told" this deluded lunatic to slay his mother.

However, don't forget the incident the next time you "play a hunch" or follow your "fate." There was a time in the history of the world when wise men relied upon the stars and many Americans, even today, carefully inquire into the "signs.

You probably have your own personal idea about portents and omens that influence your course of action. Do not many people plant by signs? Do we not consult fortune-tellers and haunt the soothsayers? Do we not eagerly persuade ourselves to believe magic and other forms of hokum?

The answer is, "We do!" And the truth is that we are, in part, just as crazy as the man who killed his mother.

CANCER CAN BE CURED

During the next ten years about a million and a half American citizens will depart this life as a result of the ravages of cancer.

Many of them will be victims of ignorance. They will pass on because they do not know that cancer, in many instances, can be completely cured. The records show that thousands of persons are alive after treatment of cancer by surgery, radium, or X-ray or combinations thereof.

The individual who has suspicious lumps, or sores that do not readily heal, should consult a competent physician. Medical science will not do anything for the man who does not give it an opportunity to help him. In the event that the victim is financially unable to secure necessary treatment, there are avenues through which assistance can be obtained.

ANOTHER "FAST UNTO DEATH"

Last week the world heard that Mohandas K. Gandhi. bald-headed and shriveled ascetic, leader of millions of people in India, had begun a "fast unto death" in order to win a voice in the government of Rajkot for the people of

the tiny Indian state. It was Gandhi's sixth hunger strike to win conces-

sions for his followers. In view of his general condition, many feared it would be his last.

Here we have a man, offering to die by voluntary action, in an effort to spread democratic ideas among his people. In effect, he offers to commit suicide unless the native ruler meets his demands for constitutional reforms.

It's a queer world. While dictators in Europe denounce democracy and blame it for all the ills of the world, Gandhi, a remarkable character, wants to die unless his people get constitutional recognition. Meanwhile, admirers throughout the world hail his sacrifice without taking into consideration the question whether a man is justified in taking his life, in any process, for any cause.

WILL A WOUNDED VETERAN DO?

The Honorable Hamilton Fish, of New York, who represents the President's district in the House of Representatives, says the time has come for veterans of the World War to insist openly on the nomination of a war veteran for President on both Democratic and Republican tickets.

The idea is not exactly new and, in view of our past political history, we are rather surprised that the veterans of the World War have not insisted upon it before this.

We are not prepared to say that the next President should not be a veteran of the World War but if none but veterans are allowed to apply we suggest that the parties nominate veterans who faced the enemy in combat, were wounded in engagements and have not, thus far, capitalized on their war records.

Such a candidate would be, we feel certain, an exceptional man!

The Minister Told 'Em

An editor wanted a vacation, so he got one of the ministers of the town to run the office for him during his absence. The second week of the minister's duties was going along nicely until he opened the mail. One letter said: "I got a dun from you for \$1.50. Now I paid for my paper and you know it, and if you say I didn't, I will come in and knock hell out of you."

The minister wrote the following reply to the angry subscriber: "I (Continued from page one, 1st Sec. public use and can not gravitate into see by the books that you did not pay for your paper this year-your subprivate ownership. Our sponsors scription was in arrears and you paid for last year only. And That Was That

The stout fellow, with large, broad feet, walked into the shoe store. Although several pairs of shoes were shown him he refused them.

"I must have square toes," he explained to the clerk. The young man sighed wearily.

"But square toes are not stocked now, sir," he explained. "Pointed toes are fashionable this season."

The customer gave him an angry stare, "That may be," he retorted, "but I happen to be wearing last season's two years in the Federal Prison of Leavenworth.

Query and Answer Column

PROBLEM-John takes a strip of paper exactly one foot long to make a rule in 1-4 inches. His only guide is a small 1-inch rule. With the use of this inch rule he marks off the 1-4 inches. How many marks will he have made when he gets to the end? (Answer elsewhere in this col-

O. L .- As a devout Quaker, did William Penn own slaves?

Ans .- Yes. William Penn was the owner of Negro slaves at the time of his death.

A. W .- How could Theodore Roosevelt be President of the United States when he was under the minimum age limit of 45 years of age when he took office the first time? Ans,-According to the Constitution a man must be 45 years old to

be eligible for election as President of the United States. But there is no such restriction on the Vice-President. Theodore Roosevelt was Vice-President to McKinley, and when the latter was shot, Theodore ascended to the presidency, being only 43 years old at that time. When he was elected President three years later he was, of course, over the minimum wge

D. Y .- Does the Prince of Wales speak Welsh? And is he a Welsh-

Ans.—No. "The Prince of Wales" is a mythical title created to appease the Welsh people. No Prince of Wales has ever been a Welshman.

F. E.-What is meant by the political expression "right and left,"

as applied to parties? Does Communism or Socialism figure in them? Ans .- The "right" are the conservatives and the "left" are the liberals. The Democrats lean to the liberal and the Republicans lean to the conservative. The terms originated from the custom common in many European countries because the conservatives were seated to the right of the speaker, while the liberals and radicals were seated to the left of the speaker. Communists, Socialists and radicals are classed as "liberals,"

but "leftists" are not necessarily Communists, Socialists or radicals, M. B.-I would like to know why "lb." is used as the abbreviation of 'pound?" Thank you. Ans,-"Lb." is the abbreviation of "libra," the Latin word which

D. C.—I wish to ask what was the day of the week that Admiral Dewey won his brilliant victory at Manila?

Ans,-Sunday. The date was May 1, 1898. P. W .- Do Negroes observe any holiday that is peculiar to their own

Ans.-Yes, but the dates vary according to the State in which they

live. Their holiday is known as Emancipation Day.

L. J. M .- What caused Earl Browder's imprisonment? Ans.-Earl Browder was arrested in Olathe, Kansas, in 1917, after expressing his opposition to the selective Army draft. He was sentenced to a year in jail for refusing to register. Later he was indicted for conspiracy to resist the operation of the draft law, and was sentenced to

D. E. W .- When did Congress pass the law declaring 32 beer nonintoxicating?

Ans Congress signed the bill making 3.2 beer legal on March 22, 1933. The beer went on sale on April 7, 1933. T. J. V .- Why is a plant called Job's tears?

Ans.—Its name is derived from the hard, shining, tearlike seeds which resemble bluish white porcelain and are used in making bracelets, necklaces and rosaries.

W. M. H .- What was the peak year for the sale of phonograph records? Ans.-In 1921 approximately 100,000,000 phonograph records were sold in the United States.

E. J. P .- Why is no comic supplement issued with the New York Ans .- Arthur Hays Sulzberger says: "When Mr. Ochs first took over The New York Times in 1896 the days of so-called yellow journalism were at their zenith. He had no desire to compete in sensationalism. Quite the contrary, the opportunity to succeed with what might be termed strictly a newspaper was the more apparent. Accordingly, on the day that Mr. Ochs took over he discontinued a serial story without even permitting it to finish, and from that day on the test of appropriateness The The holes for the ears of the jackass who would pay that much for New York Times is, 'Is it news?' This paper has never published a crossword puzzle, a serial story or comics, and the sole and determining rea-

son for this is that they are not news."

E. B.—How fast does a bullet travel? Ans.-The speed of a bullet varies from 800 to 4000 feet per sec-

J. F. F.-Why is a ship referred to in the feminine gender? Ans.-In some of the older languages such as Latin and Old German, from which modern languages have been derived, all inanimate objects were given masculine or feminine gender. In this way the moon was fem-

inine and the sun, masculine, and among other things, ships and other

vehicles were generally spoken of in the feminine gender. Modern larguages have adopted this same idea; hence, the reason for speaking of a ship and train as "she." T. S .- What college building was the seat of the United States Gov-

Ans.-Nassau Hall at Princeton University served at different times as a hospital and barracks for American and British troops during the Revolution and holds the unique distinction of having been the sest of the National Government in the year 1783 when the Continental Congress fled to Princeton.

C. J. H .- How much does the Empire State building sway?

Ans.—The building is constructed to withstand a maximum of twelve nches but tests show that the sway is rarely greater than two inches. In the storm of September 21, 1938, in a 110-mile wind the building swayed H. P.-What makes a cat's eyes shine at night?

tapetum around the optic nerve. This area causes the eyes to shine at

Ans.—The iris of cats and some other animals has an area called the

F. H. K .- What kind of time does Mexico use? Ans.-Mexico uses Central Standard Time as used in the United States-that is of the ninety degree longitude-except for the northern

district of Lower California, where Pacific Standard Time is used. E. K. L.-When was the act passed which stopped the manufacture of poisonous matches? Ans.-The Esch-Hughes Non Poisonous Match Act was passed in

1912. It placed a tax of two cents per hundred on matches containing white phosphorus which made the use of this material commercially impossible. L. S. H.-What was the largest bell ever made? Ans.-It was the 220-ton Tsar Kolokal of Moscow, which was never rung because before it was finished an eleven-ton piece fell from its side,

The largest bell in the United States is the Bourdon, weighing eighteen and one-fourth tons, in the Rockefeller carillon, Riverside Church, New York City

E. N. J.-What was our Federal debt when President Roosevelt took

Ans.-On February 28, 1933, the Federal debt was \$20,310,820. T. H. G.—How long has Alec Templeton been blind? Ans.—The famous planist has been blind since birth.

J. D. H.-What is a pourparler? Ans.-It is an informal, preliminary conference of representatives of different groups, factions, or countries, looking to a formal agreement settling disputed questions among the parties.

J. H.-How long has Lydia Pinkham been dead? Ans.-Lydia Pinkham died May 17, 1883, after suffering from a Date alvtic stroke. J. S. R .- How many bones are there in the skull?

Ans.-The skull consists of twenty-two bones, eight of which form the skeleton of the cranium and fourteen that of the face. E. S. G.-How much of a pineapple is canned?

Ans.—Approximately half of each fruit is canned. From the balance are obtained such by-products as juice, syrup, bran, citric acid, calcium citrate, alcohol, and carbon dioxide gas. L. H. S .- What country formerly required that a man waving a red

flag should precede every automobile Ans .- England thought so little of the value of the new machine and considered it such a dangerous agent that a law, enforced until 1896, forbade automobiles to speed at more than four miles an hour, and re-State College have been working on quired that a man waving a red flag should precede every power-driven

T. K.-Who was the American artist who named his sons for famous painters?

Ans.-Charles Wilson Peale had eleven children, all of whom named after famous artists. Three of these, Rembrandt, Raphaelle, and Titian, all became artists. J. D. S .- What is the origin of the milk bar? Ans .- In 1935 H .D. McIntosh, an Australian visiting London, bad

difficulty in getting a glass of milk in tea shops and restaurants. Soon

thereafter he established a milk bar in Fleet street which was the beginning of the now successful business. Answer to Problem: John made 47 marks to make his rule in 1-4 erty. The reason for that is obstrange part of it is that the aggresvious. Our products must be for sive nations may be right.

practices, erosion are lessened, say Penn State grapher who used to wonder whether inches. The last 48th quarter finished the rule and therefore not necession.
