FACTS FAVOR FORD

The 1939 Ford V-8 is a beautiful, modern motor car. Its 85-horsepower engine gives you economical, well-balanced performance over the entire speed range - and the 60horsepower engine is even more economical.

2 The structural strength of the Ford car frame, bracing, axles, body - makes not only for safety, but durability and long life.

Ford hydraulic brakes are exceptionally

large and strong in proportion to car weight. 4 The Ford car is stabilized for comfortable riding. Its springbase, the distance between front and rear suspension, is 123 inches. Seats are toward the center, perfectly balanced. The ear does not bob or dip and can have very

These four points - power, strength, safety, comfort - are by far the most important essentials in any motor car. They form the basic value of your investment.

little sway.

With this solid foundation to build on, the Ford V-8 has been made beautiful, spacious, easy to drive. It is richly upholstered and has all the modern features which add to the luxury and pleasure of motoring.

You can see these things when you take a trial drive, but do not forget that the main value is in the things you do not readily see quality of materials, precision of manufacture, fundamental engineering.
