

Sunday School Lesson

JEROBOAM: A MAN WITH GREAT OPPORTUNITY.

International Sunday School Lesson for July 9, 1939.

GOLDEN TEXT: "In all thy ways acknowledge him, and he will direct thy paths."—Proverbs 3:6.

Lesson Text: I Kings 11:26-43.

In order to satisfy his craving for regal pomp and outward show Jeroboam, who had made such a good beginning as a young king, soon turned his court into a place where luxury and idleness ran riot.

In order to maintain his court in luxurious fashion and to build the buildings he desired, the people were increasingly burdened by heavy taxation and forced labor.

Keen enough to realize that the days of Solomon's reign were about ended and knowing that the natural successor to Solomon—his son, Rehoboam—was not a fit person to reign over the people, Jeroboam took advantage of every opportunity to put himself into line to become the ruler upon Solomon's death.

One day, as Jeroboam was leaving the city of Jerusalem, he met the prophet, Ahijah, who called him aside and informed him that he had a message for him.

pieces, saying that it was God's will that the kingdom should be taken away from Solomon's successors and that Jeroboam should be ruler over ten of the tribes of Israel.

While we do not go into a study of Jeroboam's reign over the Northern tribes, we do know that Jeroboam failed to take advantage of the mistakes made by his predecessor and he, filled with a love of power rather than a love for God, led his people away from God and deepened the breach between the two kingdoms.

Of Jeroboam, George Rawlinson said: "Jeroboam is not condemned for his ambition, for his self-seeking, or for his rebellion against the house of David, but emphatically for his religious innovations.

They were of human device; they had no divine sanction; and they rested on falsity."

Louisa's Letter

Dear Louisa:

I have been married seven years and my husband and I have been separated only by sickness and we have not seen each other for six months ago. It seems as if he has found some one he loves more than he does me.

We have a little four-room house and we have it furnished real cute and we have our furniture all paid for.

Well, since my husband has been treating me so cold, I have seen another man I have fallen desperately in love with. He comes to see me once a week and tells me he loves me more than anybody, but I haven't let him or anybody else know that I love him so.

Right is right and wrong is wrong, and when we get away from this fundamental fact we lose our grip on things. No matter how lightly other people treat their vows, if we hold fast to what we think is right, we won't go wrong.

ANSWER:

I am a great believer in marriage for "better or for worse," unless one or the other partner becomes unbearable. I think that if people would work as hard to make themselves and keep themselves attractive to the mates they have as they do for other men and women, this world would be a far happier place.

TELEPHONE SALES!

"After separating my chicks, I had about 250 good broilers, which I retailed almost entirely by telephone," writes one farm housewife.

Another tells about making pies, jams and preserves which she sold by telephone, adding considerably to the family income.

When used in ways like these, the telephone can more than pay for itself. Then the pleasure and protection it affords cost you nothing.

Our Constitution of Today

Our Constitution is the charter of our national ideals. It contains within its four corners the basic and characteristic principles of our political philosophy, individual freedom and self government.

Our government was created by the "consent of the governed." The state is the creature of man, not man of the state; our government is the servant, not the master of the citizen.

Proposed amendments must be carefully analyzed; therefore, we must carefully weigh each proposal to see in which class it falls.

Those who maintain that our federal system is antiquated and is no longer adequate under changed conditions must take upon themselves the burden of proving their contention, and thus far the burden of proof has not been produced.

To concentrate unlimited power in one political unit—the Executive—by interpretation or amendment is not progressive but reactionary.

Can anyone correctly read the history of the Supreme Court without being impressed with the great stability of the Constitution and its molding by the court to fit the exigencies of changed conditions?

What we are opposed to is forced and artificial "growth" either by amendment or construction which fundamentally transforms our constitutional system.

Historically, the Constitution represents the culmination of centuries of struggle for a government which would allow each and every citizen the freedom and individual liberty which every thinking person has always desired for himself.

All this was done to protect the citizens from the disastrous consequences which inevitably result from the concentration of the various attributes of governmental powers in one person or group.

Some of the cardinal rules which the Constitution lays down for the American Government are:

1. All power comes from the people. The people are the masters, the government and its officers their servants.

2. The government of the United States exercises no power except those expressly given to it by the Constitution.

3. No man or set of men shall ever enjoy the despotic power of being able at one and the same time to make the law, to decide whether it has been violated, and then to execute judgment on the violator.

4. Every locality shall have the right to look after its own affairs, free from outside interference.

5. The Courts shall have the right to protect and enforce the rules set forth in the Constitution.

6. The Courts shall have the right to declare any Act of Congress or legislation, or President, or Governor, or other person whomsoever, which contravenes the Constitution null and void.

7. The Constitution lays down for every citizen of the United States two great fundamental rules. The first rule of equality, the second is the rule of freedom.

8. The Constitution lays down for every citizen of the United States two great fundamental rules. The first rule of equality, the second is the rule of freedom.

SALE VALUE OF SWINE IS REDUCED BY MANGE

Many hogs usually make unsatisfactory growth, and if they do reach a marketable size, buyers will discount them because they produce undesirable carcasses.

According to County Agent, mange is unusually prevalent this year. Mange is caused by a small mite which burrows under the skin, causing intense irritation to the swine. The insects are particularly active during the summer.

The appearance of mange mites in swine is noted first about the eyes, the root of the tail, and in the flanks. In severe cases, the entire body may be infected.

Treat pigs troubled with mange when only a few pigs are being fed, a thin paste made of flowers of sulphur and oil of tar can be smeared over the animals. For a larger number, a solution of lime sulfur is more practical.

Dry lime sulfur can be used at the rate of 1 part of the powder to 20 to 25 parts water. If liquid lime sulfur is used, mix one part of the stock solution with 15 to 20 parts water. The animals can be sprinkled or dipped.

Two applications approximately 10 days apart may be sufficient, but three or four are better. Because the mites live where the hogs are housed, it is a good plan to clean the pens and spray them thoroughly to remove the source of the trouble.

To Extend Service Lines. The West Penn Power Company has practically completed negotiations for the right of way for the extension of its service lines from Beech Creek up the Beech Creek Valley to Monument and Orviston, a distance of 11 miles.
