

Echoes From the Past

Fifty Years Ago

From Spring Mills correspondence: A number of strangers, some from Bellefonte and some from other places, filled themselves with "Blue Vitrol" and undertook to paint the town, Saturday.

The corner stone of the Reformed church at Coburn will be laid on Sunday, September 8. A number of other ministers will assist the pastor on this occasion. All are cordially invited to be present.

Centre Hall is becoming quite a pious little town. All the residents are law abiding citizens and members of churches. As the ministers have nothing to do they have handed in their resignations and are going to new fields of conquest.

Lock Haven is excited over the prospects of a knitting factory being established at that place. The operators are to be a firm by the name of Crawford; if they are the same "breed of cats" who operated a factory at Millheim, would say Lock Haven beware.

Extensive preparations are being made this year by the committee in charge of the Patrons picnic to be held at Centre Hall next month. The display of implements and machinery will be larger than last year. A number of Philadelphia houses will have representatives on the ground with samples to take orders. The number of tents will be larger and on the whole everything will be conducted upon a larger and more improved plan.

During the past week we have noticed articles in our exchanges to the effect that Penns Cave has been purchased by some Pittsburgh capitalists; and that some extensive improvements would be made there at once. The further the story gets away from home the larger it becomes. The last rumor says that a branch road will be built from Spring Mills to that place and will be turned into a famous and fashionable summer resort. We are safe in saying that none of the above reports are true and are a result of someone's imagination.

Workman at the Milesburg bridge are working every day and part of the night to get it completed. This is being done to make up for the two months' delay of the Commissioners. Men working at night cannot perform one-half the amount of work as by daylight and the county must bear the additional expense. In trying to make up for inexcusable delay, additional expenses are saddled upon the taxpayers, all on account of an incompetent board of commissioners. Do the voters of Centre County see their folly? If not they are paying dearly for it.

We would like to know what Billy Gray intends to do with that grand residence and the street which will soon be completed. Landlord Brandon, of the Brockhoff House, leaves this week for Milwaukee to attend the national convention of the G. A. R. as one of the delegates from Pennsylvania. The amount of money he has played at Spring Mills last Saturday, was enough to turn the average man into a temperance fanatic for the rest of his life. Arrangements have been made to have trains leaving Bellefonte every two hours during the Patrons picnic at Centre Hall, and some have left on Tuesday for an extended trip to Chicago and other points in the west. Zellers Drug Store will be located in the Crider's exchange in the early part of September. J. W. Gephart, Esq., is expected home from Europe this week.

Twenty Years Ago

Bessie Quick, little daughter of Mr. and Mrs. Edward Quick, of Milesburg, was painfully injured when she was run down by a motorcycle driven by Orren Hull, near Milesburg.

While enroute to Milroy in his new Ford coupe, F. V. Goodhart, of Centre Hall, escaped injury but his car was somewhat damaged when it collided with another car at an intersection.

Edward Haupt sold his Halfmoon Hill property to Frank Torsel, the consideration being \$1,950. The house was built by the late Thomas Shoemaker and was located near the property of Mrs. Susan Dawson.

Marriage licenses were issued to the following couples: Calvin A. Cheesman, Altoona, and Luella Dale, Bellefonte; Clifford R. Wisinger, Akron, Ohio, and Roberta B. Miller, Port Matilda; Andrew C. Vaughn and Sarah W. Crain, both Sandy Ridge; Maxus E. Schreffler and Helen R. Miller, both Bellefonte.

A Ford touring car driven by Rev. Zacheus Weston, of Milesburg, went out of control while the owner was piloting it across the Diamond in Bellefonte and the unruly machine struck the delivery truck of the Hazro grocery, which was parked in front of Montgomery. The accident was caused by a bent radius rod on the Weston car.

Miss Catherine Jenkins, aged 24, daughter of Mr. and Mrs. William E. Jenkins, of Milton, formerly of Howard, died in the Williamsport Hospital as the result of head injuries received when the car in which she and other members of the family were returning home from a visit to Centre County, struck a telephone pole. A delicate operation performed to remove glass particles from her brain failed to save her life.

William Green, colored, of Bellefonte, an employe of the Beatty Motor Company, escaped injury and the car he was driving was not badly damaged when it left the road just after reaching the top of the Centre Hall mountain, and plunged into the trees and underbrush which checked its course. Green, who was not an experienced driver, was believed to have become confused with the contours after reaching the top of the mountain. He jumped when the car left the road.

Arrangements were being made for a gigantic Labor Day celebration at Snow Shoe. John Sholl, former assistant ticket agent in the P. R. R. office who had served overseas, had returned to his present position and was busy getting "caught up" on new developments in his job while he was absent.

Chester Books, an employe of the Titan Metal Company, Bellefonte, departed for Cleveland, where he had accepted a position. During his residence in Bellefonte, Books was an outstanding player on the north ward baseball team.

Two Potter township school teachers tendered their resignations. They were: Miss Lillian Emery, of Centre Hall, who had been elected to teach the Pine Stump school, and Miss Meyers, of Julian, who was chosen to teach the Manor Hill school.

Maurice Smith, son of Mr. and Mrs. Howard Smith, of Hebersburg, was seriously injured in an accident at the Hog Island Shipyard, Philadelphia, where he was employed. His skull was fractured and an eye injured. His condition was so serious that his father departed for Philadelphia to be with him.

Robert Sechler, became ill suddenly while engaged in his duties as a mail clerk on the L. & T. passenger train, and fell unconscious at the Bellefonte station. For a time it was feared that he would not rally. Mr. Sechler had been having the attacks quite frequently. They were attributed to indigestion and heart trouble.

On Monday the glass works were sold at Sheriff's sale to John P. Harris, cashier of the First National Bank. An effort is being made to reorganize the new company. If the new glass plant proves a success at the nail works they claim that they can introduce the same system and will be able to manufacture glass cheaper than where natural gas is used. The success of this enterprise will insure raw materials in business in our community and all anxiously await the test which will be made in a few days.

The report reaches us of a theft of over five hundred dollars from some Hungarians employed at Collins Furnace. The facts as we were able to obtain them are few. It appears that several of these foreigners who live in a shanty near the furnace had been keeping their money in a chest in their building and had saved up a sum of about five hundred dollars. Wednesday morning the chest was missing and one of their number also. Later the broken chest was found a short distance from their house and all the money taken therefrom. At this writing nothing has been heard from the thief or the money.

The Philadelphia Daily Journal says Sadie E. Sharpe, alias Grace Goodman, (the daughter of James Sharpe who has traveled Centre county from end to end delighting his friends as a "snake charmer" came to Philadelphia on Monday of last week and took up her abode for the night at the Potter House and afterward domiciled at the well known house of Sarah A. Butler, where she died by her own hand by taking poison. No evidence was adduced to show why she did it. It is supposed she became ashamed of the life she had been living for some time, although only now about twenty years of age. Letters were found on her person received from her sister persuading her to alter her course of life and return to her home.

Emanuel Noll, one of Bellefonte's aged and best known citizens, became ill while walking about town and was taken to his home on North Allegheny Street. His condition was causing his family and friends some alarm.

William Garman went to Tyrone to serve as substitute mail clerk for W. H. Burrows while the latter was on his annual vacation. Burrows was clerk on the train between Tyrone and Lock Haven which arrived in Bellefonte at 8:10 a. m.

Margaret, four-year-old daughter of Mr. and Mrs. I. Peacock, Hazard, of Syracuse, N. Y., drowned while the family was spending an outing at a cottage along a New York lake. Mrs. Hazard was formerly Miss Katherine Burnett, of Bellefonte.

Ira D. Garman and family, of Philadelphia, and W. C. Harland and family, of Coatesville, were enjoying a vacation at the Garman summer home, "Edgemoor," near Bellefonte. Miss Anna Harland, a member of the party, had just returned from France, where she had been engaged in Y. M. C. A. work.

The highest price ever received by Centre County farmers for wool was realized by sheep growers of Ferguson township when they sold their shears of wool to Gregory and Koehler for sixty-four and six-tenths cents a pound. The Ferguson township growers had about 1600 pounds which brought over one thousand dollars.

During July, Miss Alice Tate, registrar of vital statistics for Bellefonte borough and Benner, Spring and Walker townships, issued only five burial permits, which was a minimum record since the law providing for tabulation of vital statistics was passed fourteen years before. One of the five was the accidental death of Pilot Lamborn, leaving four deaths by natural causes in the month.

Two persons were injured when a car occupied by John Horner, of Enders Hall, and George Taylor, of near that community, struck a burling in which were seated Edgar Miller, Paul Martz and Boyd Jordan, the accident taking place near the Charles Stoner farm at Tusseyville. The buggy was demolished and the horse broke loose and ran home. Martz suffered severe bruises and lacerations. Jordan escaped with less severe injuries, and Miller was not hurt.

Lightning recently played havoc on the farm operated by William High, at Westminster, Md. It struck in the middle of a wheat field, dug a three-foot hole and set fire to the straw. The fire spread over an acre before volunteer firemen extinguished it.

All men are endowed with brain capacity, but few of them have the necessary will power to use what they have. It takes more than good intentions to succeed.

These men are endowed with brain capacity, but few of them have the necessary will power to use what they have. It takes more than good intentions to succeed.

These men are endowed with brain capacity, but few of them have the necessary will power to use what they have. It takes more than good intentions to succeed.

Modern Etiquette

1. When a man meets a girl on the street and stops to chat for a few minutes, which one should make the first move to walk on?
2. Should a widow be addressed as Mrs. Ruth Moore, or Mrs. Henry Moore?
3. When service rendered is unsatisfactory, is a tip necessary?
4. Is it proper for the bride to carry the bridegroom's ring?
5. Isn't it bad form for a person to form the habit of criticizing everybody else?
6. Should a guest ever rise from the table before her hostess rises?
7. Should a guest always arrive at a specified time, when invited to dinner?
8. When a man and a girl are dining, who leads the way from the table to the dance floor?
9. Is a bad blot in a social letter excusable?
10. Would it be all right for us to use our own garden-grown flowers as decorations for a home wedding?
11. Should a wife receive her husband's guests at a stag dinner?
12. Should a girl of eighteen rise when being introduced to a man of sixty?

Answers at bottom of column.

Sunday School Lesson

BEVERAGE ALCOHOL AND THE COMMUNITY

International Sunday School Lesson for August 20, 1939.

GOLDEN TEXT: "Woe unto him that giveth his neighbor drink."—Habakkuk 2:15.

(Lesson Text: Joel 1: 5-7; Daniel 5: 1-5, 17, 25-28.)

The lesson this week should be of peculiar interest to two different classes of people—those who are individual and personal as a community business, and those who realize that the life of a community is dependent upon and tied up with the actions and lives of its individual private citizens.

If it were true that only the individual who drinks pays, then one might defend the contention that drinking intoxicants is one's own individual and personal business. But since experience has shown that not only the individual but the community and the nation at large suffers because of the sins of the individuals who make up the community and nation, it becomes necessary for us to consider the question of beverage alcohol as a community and national problem.

The two Scripture passages are very appropriate. The prophet Joel draws a picture of ancient Judah as the nation was caught in a terrible plague of locusts. The leaders of the people were so drunk that they did not know what was happening or that the locusts were even destroying the source of their drunkenness, and, therefore, they were unable to do anything to assist the people in the tragedy that was befalling them.

The writer of the Book of Daniel describes a slightly different kind of scene. Belshazzar, inexactness described as the King of Babylon, was being host at a great banquet given for his nobles. Probably drunk, certainly careless, the king commanded his servants to bring the sacred vessels of Jehovah which had been brought from Jerusalem to Babylon many years before. Contemptuously and mockingly, he served wine to his guests.

In the midst of the wild revelry, however, the king had a strange vision. A light appeared and wrote on the wall the words, translated into our language, *meme, lekel, upharin*. Troubled and awed, the king called for his wise men to interpret the magical formula, but they were unable to do. Then Daniel was mentioned to the king and his past performance recounted. When summoned to the king's room, promising great honors and wealth if he would interpret the message.

Before interpreting the meaning of the mystic words, Daniel reminded Belshazzar of his previous interpretation of the dream of Nebuchadnezzar and related how when that great king had been lifted up by his pride and arrogance, God had deprived him of his reason.

INSURE LAMBS AGAINST PARASITES BY DRENCHING
Lambs will suffer little from internal parasites if owners drench them every 21 to 30 days, claims County Agent R. C. Blaney. Farmers who drench their lambs regularly have learned that it is impossible to produce a profitable lamb crop without drenching when conditions are favorable for the development of the parasites.

Feeding is also important. Experienced sheepmen know that the better lambs are fed, the less they are damaged by parasites. Farmers lacking temporary pasture usually find it profitable to feed grain to their lambs for a period before marketing. This is particularly true when feed prices are so reasonable as now.

Members of the team were Virginia Kiser, of Tyrone, and Samuel Black, of Altoona. They demonstrated the proper method of canopizing. In their demonstration at Cleveland they canopized cockles at the rate of two birds per minute. L. H. Bull, assistant county agent of Blair county, coached the team. Twenty-six teams from as many states competed in the national contest.

The 4-H club poultry judging team from Washington county placed in the "excellent" group. Twenty-eight teams competed. Team members were Fred Craft and John Rish, of Avella, and Clarence Morton, of Bentleyville. Lyle Carter, assistant county agent of Washington county, was coach.

Bolt Digs Crater.
Lightning recently played havoc on the farm operated by William High, at Westminster, Md. It struck in the middle of a wheat field, dug a three-foot hole and set fire to the straw. The fire spread over an acre before volunteer firemen extinguished it.

Centre County Hospital Notes

Monday of Last Week

Admitted: John Seville Jr., Woodward; Mrs. Frank W. Crawford, Alliquippa. Discharged: Frank Mayes, Lemont, Joan Marie Crust, Spring Mills; R. D. Ned Plumb, Bellefonte. Admitted Monday and discharged Tuesday: Master Daniel B. Thompson, Bellefonte; Master James Beaver, Bellefonte; Master Winfield A. Stover, State College.

Tuesday of Last Week

Admitted: Miss Virginia N. Miller, Bellefonte, R. D. 1. Discharged: Mrs. Carl R. Waltz and infant son of State College, R. D. 1; Mrs. Quentin E. Johnson and infant daughter, State College, R. D. 1. Births: a daughter to Mr. and Mrs. Lawrence R. Neal, Milesburg. Admitted Tuesday, discharged Wednesday: Mrs. Samuel W. McGinley, Bellefonte. Admitted Tuesday, discharged Thursday: Miss Patricia Matern, Bellefonte; Mrs. George W. Clemons, Boalsburg.

Wednesday of Last Week

Admitted: William F. Newman, Milesburg. Discharged: Master Lester J. Yearick, Bellefonte, R. D. 2; Mrs. Vilas S. Ream, State College; Miss Margaret Mauls, State College. Admitted and discharged Wednesday: Mrs. James D. Fry, Pleasant Gap; Master Roy N. Hile, Pleasant Gap. Admitted Wednesday and discharged Thursday: Mrs. Clyde E. Weber, Rebersburg; Master Lloyd L. Bitner, Howard; Miss Jean Caum, Bellefonte.

Thursday of Last Week

Discharged: Mrs. Minnie Dugger, State College; admitted Thursday, discharged Friday; Mrs. Samuel E. Page, Centre Hall, R. D. 1.

Friday

Admitted: Mrs. Mary Reiter, Bellefonte. Admitted Friday, discharged Saturday: Samuel W. Stover, Boalsburg; Master W. Davis Lewis, Bellefonte; Master William E. Ishler, State College; Master Leroy L. Ishler, State College.

Saturday

Admitted: Samuel A. Gill, Woodward, R. D. 1. Discharged: Mrs. Fred C. Kurtz, Bellefonte; Mrs. Harold A. Sempel and infant daughter of Bellefonte, R. D. 2. Births: A daughter to Mr. and Mrs. Amos A. Gosw, State College.

Sunday

Admitted: Wilson Boone, Howard, R. D. 1. Discharged: Master Kenne R. P. Kintner, Bellefonte; Richard W. Stow, State College. Hospital contributions—From C. H. Shaffer, Madisonburg, 1 bushel sweet corn; from H. P. Kelley, Pleasant Gap, peck of carrots.

HOUSEHOLD SCRAPBOOK

A Screen Door Hint

Slip several wide rubber bands about the door knob of a screen door and carry them over to the knob on the other side of the door. This will prevent the annoyance of slamming.

Beef Juice

T' make beef juice, cut fresh raw beef up into small squares and put a few pieces at a time into the potato ricer. Sprinkle a little salt over it and press hard until no more juice runs out.

Prevent Dandruff

It is claimed that dandruff may be prevented by using a mixture of one part of apple juice and three parts of water. Apply this solution twice a week.

Buttons on Lace

Instead of sewing buttons on lace, they should be tied on, using a needle with double thread. The ends should be tied under the buttons and on the wrong side if they are tied carefully, the buttons are easily taken off when the lace is freshened.

The Coffee Pot

Too much care cannot be taken in cleaning the coffee pot. If it is not kept scrupulously clean, no matter how much is paid for the coffee, it just doesn't taste right.

Mosquito Bites

The sting can be taken out of mosquito bites if a little household ammonia is added to the water with which the skin is washed.

Badly Scorched Linen

When linen has been so badly scorched that the application of lemon juice and exposure to sunlight is unsuccessful, try the following: One cup of vinegar, half an ounce of soap, two ounces of fuller's earth, and the juice of one lemon. Blend well, spread the solution, and allow to dry. Then wash the linen.

Wrought Iron

Wrought iron fixtures and ornaments can be cleaned very efficiently by rubbing with a woolen rag, moistened with any thin oil, such as paraffin or kerosene.

Hard Water

Hard water can be softened with borax, lemon juice, or an oatmeal bag.

Cleaning Phonograph Records

Fingerprints, grease, and dirt may be removed from phonograph records by use of a weak solution of soap in water. Moisten a wisp of absorbent cotton with this solution and wipe the record. Then wipe the surface with plain water.

Painting Screens

Painting the inside of a window screen white and the outside black impairs the vision of people from the outside but not those on the inside.

Improves Gravy

Add a touch of burnt sugar to the flour which you use in making roast beef or lamb gravy, and it will create a pleasant flavor.

The average man who stands off

and criticizes the churches and makes fun of other people's religion has something the matter with him and he knows what it is.

Health and Beauty

SO THEY HAVE RETIRED.

In "Time" for April, 1939, in the article on medicine, we read that John D. Rockefeller, Jr., reached the age of 65 and "announced that according to regulations, he had retired from the Rockefeller General Education Board, and would soon quit the Rockefeller "foundation."

Recently, to the surprise of scientists all over the U. S., the Rockefeller Institute for Medical Research enforced retirement rules on its working scientists for the first time and suddenly announced the withdrawal of five of its most brilliant members. Although the five scientists will hand over their administrative duties to younger colleagues, they will all receive pensions.

These great workers will continue their very important research work in the laboratories unhampered by administrative duties.

At the head of the list the greatest of them all, stands Doctor Florence Rena Sabin, 67. She was the first woman graduate from the Johns Hopkins medical school. She was the first woman to hold a professorship in the medical college there. She gave up this position to begin work in the Rockefeller Institute. She was elected to the National Academy of Sciences. She is famous "for her discovery of the origin and processes of the lymphatic system and her account of the development of blood cells. Her studies of the blood in tuberculosis, also her testing of chemical substances isolated from the tubercle bacilli. In 1929 Doctor Simon Flexner, former head of the Institute, called her "the greatest living woman scientist of all time."

It was an Austrian born physician, Docor Landsteiner, who won the Nobel Prize in medicine. He discovered the four main types of human blood. As a result of his work many thousands of lives have been saved. For blood transfusions have become safe and easy, and before they were difficult and dangerous. Many of our readers owe their lives and the lives of some of their loved ones to the long hours of painstaking and laborous work which was done by a once obscure Austrian doctor.

Doctor Phoebe Aaron Theodore Levene, a Russian, discovered the minute chromosomes that are the inheritance carriers. He is also famous for his work on vitamins and gland substances.

Doctor Winthrop Osterhout, formerly a teacher of botany in Harvard, has been doing valuable work upon plants. He has made us more reveal to him some of her most valuable secrets.

Perhaps one of the most famous and interesting of the group is Doctor Alexis Carrel, a Frenchman. In 1912 he won the Nobel Prize for his wonderful work in suturing blood vessels and transplanting organs. He collaborated with Lindbergh in fashioning an artificial heart. He has kept a piece of chicken heart alive for 27 years. Doctor Carrel's wife is a physician and lives in France. She operated upon their son for appendicitis. Doctor Carrel intends to return to France very soon and make his home. He has written and published a very interesting book, "Man the Unknown," about which we will have something to say if the future.

FARM CALENDAR

Timely Reminders From The Pennsylvania State College School of Agriculture

Installing Electric Fences—Extreme care is necessary in the installation of electric fences to eliminate all possibilities of the loss of human lives from their use. Warn agricultural extension engineers with the Pennsylvania State College.

Planting Vegetables For Fall—By planting seeds immediately, certain vegetables can still be grown for fall use and for winter storage. Penn State vegetable gardeners say. They suggest turnips, lettuce, endive, kale and winter radishes.

Fumigating for Wax Moths—Damage to comb honey by wax moths can be prevented by fumigating the supers with carbon bisulfide, inform extension bee specialists at Penn State. Approximately 1-3 ounce of the chemical is required per section of supers. Carbon bisulfide is inflammable and must be handled accordingly.

Growing Better Tomatoes—Highest yields of tomatoes of the best quality are being produced this year on plants grown with strong, healthy stock. Penn State vegetable gardeners report. As a result, many growers are already making plans to grow their own plants next spring.

Preventing Storage Scab—Development of storage scab in stored apples can be prevented by proper spraying, extension plant pathologists at Penn State claim. Application of lime sulfur spray at this time will check possible damage from the disease.

Spraying for Walnut Caterpillars—Application of lead arsenate spray to trees infested with walnut caterpillars may save the life of the tree, say Penn State extension entomologists. Trees defoliated for 3 or more successive years usually die.

4-H Club Meets
The Stormstown sewing club met at the home of Mrs. Waring, Aug. 9, at 1:30. The business meeting was in charge of Rebecca Way. Miss Butler had the second and third year sewing kits out for the girls to see. She took some of the girl's garments to be judged at Club week. Demonstrations were made on how to make a wool darn. Refreshments were served.

Girl, 6 Dies To Save Boy
Little Lois Taylor, 6, Kingston, Pa., tried to save her cousin, Billy Taylor, 8, from drowning by wading into a rainwater pool, only to be sucked down by the mud. A physician, unaware that she lay at the bottom, waded in, dragged out the unconscious child and revived him.

Our own definition: Caution—A word of advice, to be found in dictionaries.

STUDEBAKER SALES ARE UP! NEARLY 3 TIMES A YEAR AGO!

STUDEBAKER CHAMPION

It's the talk of America! \$660 AND UP, DELIVERED AT FACTORY!

PUT your money on a winner. Become the proud owner of a beautiful, dollar-saving Studеbaker Champion—the newest, finest, lowest price car that traveled coast-to-coast and back for 27 1/2 miles per gallon average—the roomy, safe, easy-handling car that ran 15,000 continuous miles in 14,511 minutes at Indianapolis Speedway—buy this one and only Champion. Low down payment—easy C.I.T. terms.
