

Stoker-Fired Furnaces Are Fully Automatic

Did you kiss the girls goodbye with a clear conscience when you hurried off to work on a frigid morning last winter? Or did you feel guilty knowing you were leaving your wife to act as fireman to a juggernaut of a furnace, along with her other tasks as general household manager, nurse, laundress and cook? Even though you may be sweltering in a heat wave as you read this, now's the time to plan for the family's comfort next winter. You can delegate the job of furnace tending to electricity which works with clock like regularity and precision to feed the furnace and keep the house a cozy temperature.

You well know those distressing occasions when you completely forget about shoveling coal and the furnace grows cold as a stone. This invariably happens in the middle of a party. Or perhaps the furnace goes out when the family does—and you return late at night to a house like an icebox. With a mechanical stoker to tend the furnace, this never happens. You can have one of two types of stokers to use in connection with your present furnace—or with a complete new heating plant. The least expensive is one that automatically adds fuel to the fire, but the hopper must be filled very so often by hand. A further degree of luxury is the sealed bin from which the coal is conveyed on a worm-screw feed line to the stoker. You don't have to handle the coal at all! The bin can be located in the cellar, or completely out of the house.

Since the stoker does a more scientific job of firing the furnace, you get more heat from the coal used. The fire is fed at an even rate, the fuel entering from below instead of on top of the fire, so that it becomes gradually heated until it reaches the combustion point. Whenever the temperature upstairs goes above or below the desired level, the thermostat signals the stoker for more or less heat so that a healthy, even temperature is maintained throughout the house. The children can safely play on the floors without becoming chilled. The whole family will have fewer colds, which doctors tell us are often

due to overheated, stuffy houses but to a wide variation in temperatures, ranging from a chilly atmosphere to an overheated one.

The whole house will be noticeably cleaner after a stoker is installed. That constant battle with soot and coal dust will be a thing of the past. Curtains, rugs and slip covers won't need to be made so many trips to the dry cleaners or the wash tub. The basement, if it will, be so clean and neat that you'll have the equivalent of an added room in the house that can be put to good use as a recreation room, a work shop, a drying room for clothes in bad weather, or a clean, cheerful place for the ironer.

Don't say off-hand that you can't afford a stoker—let a reliable dealer give you an estimate on the type that would be most satisfactory for you. Although stoker manufacturers don't make any blanket claims about the stoker paying for itself, it will help pay its own way. Stoker coal may be cheaper than the coal you are using for hand-firing since the economical small sizes of coal are used. But most families who have stoker-tended furnaces say that any economies made with the stoker are of small importance compared with the convenience and dependability.

Injunction Is Granted

(Continued from page one)

The plaintiffs also aver that they own the right-of-way of the water line.

According to the complaint, on August 11 the two defendants began digging a ditch from their properties nearby, throwing dirt and stones along the Schlegel property, and opening the ditch to the private water line where they are allegedly trying to tap onto the line.

The plaintiffs have served notice on the defendants to cease the digging, but the notices have been ignored, the bill of complaint says.

At next Thursday's hearing the Court will decide whether or not the temporary injunction will be continued until a final hearing.

Dogs Given Green Light

(Continued from Page 1)

some \$22.50 in catching dogs, buying feed for them, slaying and disposing of unwanted animals, and in repairing and cleaning the dog pound.

On the income side of the dog-catcher ledger were two one-dollar bills planned to be reported from Mayor Hardman P. Harris for a fine collected for one dog.

Marshall's report showed that a number of dogs had been caught, but indicated that the Mayor had freed most of them without imposing fines on the owners. Marshall asked Council for instructions. He wanted to know who he's to take orders from—the Mayor, Council, the Fire and Police committee, or who. He indicated that he'd administer the dog laws without fear or favor, and said he had the backing of George Peters, county dog-law enforcement officer, in his work.

Councilman Henry Brockerhoff offered a motion referring the entire matter of enforcement to the fire and police committee. No one seconded the motion.

Mr. Brockerhoff then offered a motion instructing the dog-catcher to take all informations before a Justice of the Peace instead of before the Mayor.

Council president Thomas Beaver demurred at this suggestion, declaring that the fine and costs imposed by a Justice are greater than imposed by the Mayor.

Mr. Teaman declared at this juncture that he was willing to second Mr. Brockerhoff's first motion—to refer the matter to the fire and police committee. Mr. Brockerhoff then declared that since he's been a member of Council, innumerable attempts have been made to curb dogs, and that every enforcement attempt failed because Council lacked what it takes to enforce the ordinance. He declared that he was for enforcing the law and was about to add something else when he was interrupted by Mr. Beaver who cut in with the question: "Does the committee (Fire and Police) have anything else to report?" That ended the discussion with things in worse condition than before the meeting.

As matters now stand the dog-catcher doesn't know who he's to take orders from. He doesn't know how long he's to work each day. He knows the Mayor said he showed no signs of backing him up in the enforcement of the dog laws. He has no encouragement from Council.

At Monday's meeting, Council voted against meeting on the next regular meeting night, Monday, September 4, which is Labor Day, so unless a special meeting is called, dog-law enforcement will be on a hap-hazard basis for a full month. By that time the public, the dogs and Council probably will have forgotten about the whole matter. They always do.

PURCHASE NEW TRUCK
After opening bids on the purchase of a new dump truck, Council, in the absence of street committee members, authorized the awarding of the contract to the low bidder, the County Chevrolet Company, subject to approval of the street committee.

Four bids were submitted on the truck. They were:
Bezer garage, Studebaker, \$1,480.
County Chevrolet, Chevrolet, \$1,123.50.
Dunlap Motor Co., Ford, \$1,149.
Decker Motor Co., Dodge, \$1,124.

INSPECT TRAFFIC LIGHT

A representative of a traffic light manufacturing concern was present in Council with a demonstration unit to explain matters of installation and cost. Traffic lights would be erected at the four corners of an intersection. The old overhead light has been 50 feet away with legislation, he said. His lights would cost from \$550 to \$600 for each intersection, and the cost of operation would be about \$3 a month for each intersection. Control units, which may operate several sets of lights, cost \$148.20 each. The lights can be adjusted to allow the red, green and amber lights to show for any predetermined time. The amber light can be made to flash as a caution sign when the other lights are off during slack periods of the day or night, and the outfit has other modern features.

After discussing the matter, Council decided to get permission from the State to erect a sample traffic light unit at one of the intersections to determine whether lights will aid the smooth flow of traffic.

FOOT-FRONT POLICY

Council passed a motion to the effect that in the future all improvements to streets and sewers in undeveloped portions of town will be made on a foot-front basis to the owners of the properties along such developments. This motion was passed when Councilman Brockerhoff pointed out that the ordinary income of the borough is sufficient only for ordinary operating and maintenance of streets, sewers and other services. New development, he said, is an extra expense, and since the value of properties along new developments is enhanced by such improvements, he contended that the property owners should be assessed on a foot-front basis for such work.

A. C. Hewitt, chairman of the Bellefonte zoning committee was authorized to recommend to Council some person to take the place of Charles Thompson on the committee. Mr. Thompson withdrew from the post.

W. C. Smeltzer and William Bortner, officers of the Farmers National Bank, appeared in Council to ask that something be done to correct surface water drainage conditions at the bank, corner of High and Spring streets. They reported that ever since the new grading was done at a filling station on the opposite side of Spring street, heavy rains being a torrent of water

across the street to flood the bank cellar. Council assured the delegation that steps will be taken at once to correct the condition.

Democratic Registrations Hold

Phillipsburg Youths Sent To Prison

(Continued from Page 1)

Harold D. Ream, gave a summary of the robbery of the Phillipsburg store, during which some \$150 in merchandise was taken. Some of the loot was later recovered at the homes of the three defendants, the officer stated.

Three State College merchants were sentenced to pay the costs of prosecution and fine of \$50 each when they pleaded guilty to charges of operating gambling devices. The defendants were David Porter, Paul Boeger and Rufus Ripka.

The merchants were arrested by Officer H. C. Hand, of the State College borough police, who told the court that he had played pin-ball machines in each of the three places, and had been paid a cash prize in two of the establishments. In the third, he couldn't get a winner, he said, but he saw another customer receive a cash award.

William P. McGowan, of Snow Shoe, entered a plea of guilty to a charge of drunken driving and was sentenced to pay the costs and to serve 30 days in jail. According to State Police Officer George W. Finlin, of the Pleasant Gap sub-station, McGowan was arrested May 22, near the Mike Furl residence above Runville by two fish wardens. The wardens investigated after McGowan's car ran into a guard fence, backed away and then stood at a standstill for a time in the center of the highway. The driver was turned over to Officer Finlin who took him to Snow Shoe where a physician pronounced the man unfit to drive a car because of intoxication.

Donald Irwin, also charged with drunken driving, entered a plea of guilty and was sentenced to pay a fine of \$100 and serve ten days in the county jail in addition to paying the costs in the case.

Officer Finlin, acting prosecutor in the absence of Private J. J. Mignogna, told the court that Irwin was arrested near Wingate in Boggs township late in the evening of April 29 after his car was seen to zig-zag along the road. He was brought to Bellefonte where a physician found him in unfit condition to drive a car. Irwin's attorney told the court the defendant was in a position to pay a fine, which accounts for the shorter jail term.

Harold Mowery, brought into court on a charge of escaping a \$500 bond bill, was placed on probation for three months upon payment of the bill and the costs of prosecution. The prosecutor in the case was Mrs. Cora M. Klinefelter, of Centre Hall, who said that Mowery boarded and roomed at her place for a time and left without settling his account.

The final two cases on the list were inter-connected. In the Fred Brighton, of Phillipsburg, was charged with assaults, threats etc., and in the other Charles Oncea, also of Phillipsburg, was charged with malicious mischief, disorderly conduct, forcible entry and threats. The real prosecutor in all the cases was Mrs. Charles Oncea, who since her separation from her husband two years ago, has rented the Fred Brighton home. Brighton lives in with the family and is a boarder there.

Mr. Brighton claimed Mrs. Oncea brought the charges against him because he's been trying to get her family to move out of his property, and so far they have not moved. After much conflicting testimony in this action had been heard, Judge Walker found Brighton not guilty and divided the costs between him and Mrs. Oncea.

In the case against Charles Oncea, the court found the defendant not guilty and placed the costs of prosecution on Mrs. Oncea, with the stipulation that she be sent to jail until the costs are paid.

Mrs. Oncea on the witness stand said her husband saw her in a Phillipsburg club one night and threatened "to get" her. He then left before she did, went to her home and layd her as she was about to enter her home. He struck her on the forehead, breaking her glasses and rendering her unconscious, she said.

Oncea admitted having suggested to his wife that she stay at home with her children instead of spending her time in clubs; and admitted having struck his wife, but claimed that he paid a fine and costs on that charge and held that case was settled.

Farm Credit Group Meets

(Continued from Page 1)

ed as directors by the members of the cooperative.

The Associations function as short term credit agencies lending money to eligible farmers at an interest rate of 4 1/2% per year, using the farmers livestock and equipment as security. Mr. Corman said that during the past five years the Hollidaysburg Association has loaned nearly a million dollars to the farmers in the six counties it serves.

A banquet was held on Wednesday evening at the Nittany Lion at which many of the members of the college Agricultural faculty were present. Dr. F. F. Linsinger, Head of the Agricultural Economics Department of the College was the principal speaker of the evening and gave an interesting talk on the future of the Production Credit Associations and the opportunity which they have to serve the farmers.

Other directors of the Hollidaysburg Production Credit Association who were present at the conference were: Harry Snoberger, New Enterprise, Director for Bedford Co.; John A. Runk, Huntingdon, Director for Huntingdon Co.; and President of the Association, and S. T. Blough, Johnstown, Director for Cambria Co.

Pickler's Pickled
Here's a fish story about one that didn't get away. Harry Jones, of Sarantio, displayed a 21-inch two-pound pickled fish he said leaped into his boat when he and his wife started to sing hymns while rowing on Jones' Lake.

Democratic Outing To Be Held Aug. 30

(Continued from Page 1)

Justice of the Pennsylvania Supreme Court; Joseph P. McGranery, Philadelphia Congressman, candidate for Judge of the Superior Court, and Edward Jackson Thompson, Phillipsburg, candidate for Judge of the Superior Court.

The picnic will be officially opened with flag raising ceremonies to be held in honor of Pennsylvania's newly naturalized citizens. The ceremonies will be under the direction of Joseph Barr, Pittsburgh, president of the Pennsylvania Young Democratic Clubs, assisted by Russell M. Lucas, president of the Phillipsburg Young Democratic Club.

During the morning regional conferences of the Women's Democratic Clubs and the Young Democratic Clubs of Pennsylvania will be held under the leadership of Mrs. Lucy Howe Merrell, and Walter E. Bezer, regional directors of Phillipsburg.

Former State Senator Edward Jackson Thompson, chairman of the picnic reception committee will entertain Senator Guifey, the state-wide candidate, and other honored guests at a luncheon reception to be held at his home.

Two bands will furnish music for the picnic. The Phillipsburg High School Band will play an early afternoon concert, and the Osceola High School Band will give the evening concert.

The main event of the sports program will be a softball game between the Clair Rose team, Osprey Hill champs of Harrisburg, repre-

sented the State Treasury, and the Millionaires, Centre-Clearfield county champs. The game is scheduled to follow the speaking program. Another feature of the sports program will be a watermelon eating contest for children under fourteen. Substantial cash prizes will be awarded the winners.

To climax the day's activities a gigantic display of fireworks will be held in the evening. The display will feature vivid aerial bomb displays, shot so that they will be reflected in the lake at Black Moshannon. There will be other entertainment including trap and skeet shooting, bathing, boating, and games.

The picnic is being staged under the direction of Walter E. Bezer, Phillipsburg, general chairman, and is being sponsored by the Young Men's Democratic and the Women's Democratic Clubs of Phillipsburg.

ENJOY THE COMFORT, ECONOMY and HEALTH of AUTOMATIC HEAT with a **FREED TYPE "C" Electric BIN-FEED STOKER**

There are five sizes, any one of which will fill your requirements.

All models are adaptable for Steam, Vapor, Hot Water or Warm Air Heating installations.

Prices begin at \$195.00 installed, and our liberal payment plan allows you to enjoy winter, at the lowest cost, with the finest Automatic Heat obtainable.

Every home owner should have clean, healthful heat. Avoid colds with continuous, even heat.

GUY W. LYONS

"MACHINE HAS PAID FOR ITSELF"
I've never known a piece of machinery in which I have felt such complete confidence; appreciation of its merits almost to affection. It has never missed a beat, nor given the slightest trouble. Heating costs have been almost halved, and the machine has paid for itself by now.
Roy L. Orwig, Winooski, Vermont

LINK-BELT Automatic COAL STOKER
The finest Automatic Heat at the lowest cost of any heat!

Imagine it! The comfort and convenience of automatic heat—at less cost than you now pay hand firing!

No running to the basement to fix the fire while relaxing at home or entertaining guests. No more getting up half an hour early to start the fire in a cold basement. No drafts to adjust. No smoke, no soot, no explosion hazard. Less tendency toward winter colds.

Quickly Installed; Easy Terms
Installed in your present heating plant, without inconvenience. Ask for free estimate of savings possible by installing a Link-Belt automatic stoker.

Enjoy AUTOMATIC HEAT with COAL Next Winter Get Ready Now!

WE'RE HAVING A STOKER INSTALLED THIS WEEK, GEORGE—LOOKING AHEAD TO EASIER AND BETTER COAL HEATING NEXT WINTER

SAFE CLEAN HEALTHFUL ECONOMICAL CONVENIENT

OVER HALF A MILLION IN USE!

NOW is the time for YOU to install an Automatic COAL Stoker—so that you may enjoy its many advantages (including freedom from hand firing) next winter, and for many winters to come. It makes no difference what your present COAL heating equipment is—whether furnace or boiler type—it can be used. An Automatic COAL Stoker can be installed in less than five hours. Act AT ONCE and be prepared to have clean, safe, healthful heat!

LOW IN PRICE—CHEAP TO OPERATE—BUDGET PLAN IF DESIRED

See Your Local STOKER DEALER

STOKOL STOKERS
BITUMINOUS—ANTHRACITE

The greatest stoker ever put into a furnace—prices by far the lowest ever quoted.

Super STOKOL
Only Super STOKOL has the phenomenal RETORT AGITATOR "AUTOMATIC POKER" (Patents Pending)

- Produces 20% to 30% more heat, 2 to 4 times more rapidly and with 1/2 to 3/4 less attention than any other stoker regardless of price.
- Burns all local stoker coals successfully.
