—The equinoctial storms have been upon us since last Friday, and the days are gloomy, with frequent showers. As soon as the nights have begun to get appreciably longer than the days, the stormy period will pass (according to the almanac), and we'll go into the fall and winter as gracefully as possible. We think the Centre County Medical Society could find some relation between the season of the equinox and the incident of sinus trouble and colds, for we've run into more persons with those depressing maladies in the past week than we've noticed since last spring. And there is the germ of an idea! Why don't some medico devote a little time in research into that kind of thing and write an article for the newspapers? Such items would be "good copy" in any man's newspaper, and we hereby offer space to any physician who'd like to take a venture into a field in which we've always believed there is a great lack of knowledge.
