

Discusses Economy In School Building

(Continued from page one)

might not be able to help directly, they would like to see, advise as to how this might be financed. No cause is too desperate if there is the will to fathom it. And the School Board really has a good percentage towards a new building. They have the land, about a hundred and fifty thousand dollars insurance, and from thirty to fifty thousand dollars that might have been salvaged from the old building. This saving might have been effected by having the bids on the new building include the demolishing of the old building.

I doubt the feasibility of Mr. Mitchell's suggestion of a competition on plans based on the necessity for economy. In the first place the architects, have been appointed. In the second place, it would be very expensive, for the best talent will not compete without a rather stiff fee.

And this although a very possible one is an unworkable plan. It will require more than the skill of the average architect. It will require one with genius and one with a stiff for design. Very few men have both of these within themselves.

A possible way would have been to have had tentative plans outlining the requirements drawn up and then consulted for a nominal fee with men of national reputation in order to determine the best possible scheme for this location and then had the final plans developed from that point. The trustees of State College, after their six million dollar building program, have appointed Paul Crete and not PWA architects for future college buildings. Possibly some people in Bellefonte have such a connection at State College, that Mr. Crete might be consulted at no great expense on the merits of his plans and there are possibly a dozen other capable men who could be approached in the same manner. In this way the very best plans possible might have been held to an approximate cost of a thousand dollars, as I understand considerable more than this amount has already been expended. But this is water over the dam.

I feel certain, however, that since the architects who have been appointed have been fortunate in having been awarded approximately ten million dollars of PWA work, that they will be willing to consult with other architects so that Bellefonte might be assured that every possible scheme has been considered and the best possible selection has been made.

With all I want to state that my reference was no reflection on the good work accomplished by the PWA. I am writing only to send Mr. Mitchell's suggestion to the Board and to make a further appeal for a beautiful building. For common sense tells us that we must not come from still another viewpoint for if spending continues needlessly, all the taxpayers will ultimately be PWA workers (except from taxes) and when the reservoir goes dry there will be the device to pay.

I earnestly believe that if every possible advantage towards economy is corralled that we can show a decided saving in the cost of the building without in any way sacrificing its efficiency or design. But we dare not allow any more of these advantages to escape us.

ANN W. KEICHELLE. BREAD MADE FROM TREES IN GERMANY Nations at war will go to any extremes to obtain bread. Methods of making flour or dried meal from the bark of the famous birch and beech trees of Germany were developed just before the present war, according to Dr. James A. Tobey, authority at Rockefeller Center, New York. This flour from trees was intended to be mixed in equal proportions with spoiled rye flour. Above half of the breadstuffs consumed in Germany always have been made from rye flour, says Dr. Tobey.

Bucknell Has More Men. Men outnumbered women almost two to one at Bucknell University this year, according to the enrollment figures. Of the total enrollment 803 are men and 460 are women. Of this number, 331 are freshmen, Registrar H. W. Holter reported.

Remember that Bellefonte is your town. Back it to the limit with your whole-hearted support.

You Will Not Need To Worry About Your Family's Future If You Place In Our Hands The Management of Money and Property You May Leave. The income and principle will be paid as you direct. THERE ARE MANY CASES IN WHICH WIDOWS LOSE THEIR ESTATES THROUGH BAD INVESTMENTS. You can leave no better friend or protector for your family than this institution. Acting as your executor and trustee will relieve your family of all details and responsibility, and your affairs will be administered economically and efficiently in accordance with the terms of your will.

The First National Bank Bellefonte, Pa. (Member of Federal Deposit Insurance Corporation)

To Occupy Buildings

(Continued from page one)

Travelling Engineer C. E. Strausser reported that he is well pleased with the construction throughout and the quality of the equipment being furnished, and is especially pleased with the harmony and cooperation which existed throughout this entire gigantic construction program.

A great deal of credit is due to the following people, connected with the project in an executive capacity, who made this cooperation and harmony possible.

Howard F. Meisler, Resident Engineer Inspector for P. W. A. T. F. Karr, Resident Inspector for C. S. A. Hunter & Caldwell and Charles Z. Klauder, Registered Architects Associated.

George W. Ebert, Superintendent of Grounds and Buildings for Pennsylvania State College. Ralph D. Hetzel, President of the College. S. K. Hostetter, Assistant to the President.

The State College Borough officials. The supervisory forces of the many contractors connected with the project.

The College is at the present time finishing grading, sodding and planting shrubbery with the result that this campus and the buildings there on is second to none in the entire state.

The contracts already awarded are as follows: Freeland, Inc., general utilities; Wm. M. Clark Co., piping utilities; Elliott Co., turbo-generator; Brandon Reed Co., water supply system; Herre Brothers, electric power utilities; McCloskey & Company, general construction; Daniel J. Keating Co., heating and ventilating; Herre Brothers, plumbing; H. B. Frazer & Co., electrical; Dravo Corporation, power plant equipment; Hamilton Mfg. Co., laboratory and scientific equipment; Brevlau & Lyndwood Supply Co., equipment; Ceco Steel Products Corp., equipment; Oliver C. Steel Mfg. Co., equipment; Peerless Pump Division, food machinery, deep well pumps; E. H. Sheldon & Co., laboratory and scientific equipment; N. Snellenburg & Co., laboratory and scientific equipment, and furniture and equipment; Hamilton Mfg. Co., laboratory and scientific equipment, and furniture and equipment.

Sandy Ridge Man Killed

(Continued from page one)

noticed the Sandy Ridge man on the tracks, according to reports. The locomotives stopped immediately and made arrangements for Miller to be rushed to the hospital. Miller was admitted at 5:30 Saturday afternoon and died Sunday morning at 4 o'clock after repeated blood transfusions failed to aid him. Dr. W. R. Heaton, Centre county coroner, was unable to state whether or not an inquest would be held until he had investigated the death thoroughly.

The accident victim was born in Johnstown, March 22, 1897. He was a son of Mr. and Mrs. George Miller, Sandy Ridge. For 30 years he resided in Sandy Ridge where he was a member of the Methodist church. On July 17, 1916, he was married to Veda Moore at Pottsville by Justice of the Peace J. W. Merryman. Surviving him are his parents, his wife and the following children: Mrs. Gertrude Caldwell and Miss Margaret Miller, both of State College; Eugene, Robert, Mildred and William, all at home. Also surviving are a sister and brother: Miss Edna Miller and George L. Miller, Jr., of Sandy Ridge. Funeral services were held Wednesday afternoon from the home of his parents at Sandy Ridge. Interment was made at the Phillipsburg cemetery with the Rev. Merie Cowher in charge.

Retired Ballplayer Takes Life Joseph R. Lafferty, 74, a retired railroad employe of Altoona, was found hanging from the ceiling in the collar of his home Sunday morning at 11 o'clock. The family could give no reason for the aged man's action, reporting he and his wife were recuperating from a recent automobile accident. He is survived by his wife and six children.

Claims Abuse By Officers

(Continued from page one)

not allow him to mingle with other prisoners. DePalma continued that he repeatedly asked that Sheriff Keeler, visit his cell, but the official did not appear. At the end of two weeks, the prisoner said, he was taken to Rockview penitentiary and kept in a "death cell" where he was garbed only in shorts, and where a blanket and mattress were provided only at night. DePalma claimed in this manner he was "forced" to plead guilty to the charge.

When instructed by the Court that he could withdraw his plea of guilty and stand trial in December, DePalma decided to plead. He was sentenced to pay the costs of prosecution, a fine of \$1, and undergo imprisonment in the Western Penitentiary for from 3 to 6 years.

A DuBois police officer who appeared against the man, denied that he had been abused in his presence, or that he had showed evidences of mistreatment at any time. On September 5, he said, he and other police officers arrested DePalma, Eli Royer and Mr. Calvert, at the instruction of Phillipsburg police. The \$76.05 in cash and two bar towels valued at 20 cents, taken from the team, were recovered from the man. DePalma was sent to the State Industrial School at Hummelton as a juvenile offender, escaped from the institution, and served time in the Western Penitentiary. He later was in trouble in Birmingham, Alabama; Cumberland, Md., and served time in Allegheny Workhouse. His contacts with the law also include a burglary charge at DuBois and parole violations. He had been out of prison for about three months when he and his companions entered the Phillipsburg team, it was reported.

Royer also entered a plea of guilty to similar charges and since he was a first offender and presented references from a number of reputable DuBois business men and officials, he was placed under probation for three years. His attorney claimed that he was intoxicated at the time of the robbery and knew little of what transpired during the evening.

The third man arrested, Mr. Calvert, was discharged by a Phillipsburg Justice of the Peace because of lack of sufficient evidence. Two Howard business men charged with maintaining gambling devices entered a plea of guilty and were sentenced to pay fines of \$30, each and the costs of prosecution. Both were first offenders. They were: Merrill Fletcher, proprietor of a billiard room, and Harold D. Fletcher, owner of a store.

Judge Walker warned both defendants that jail terms might be imposed for any further infractions of the gambling laws on their part.

Severe Storm Breaks Drought

(Continued from page 1)

rain found its way into ignition systems, paralyzing motors. On the other side of the sheet, the storm was of incalculable value. A serious water shortage had existed in many towns and communities, where a number of farmers feared that cold weather would come before their water supplies had been replenished. Friday's storm, followed by several steady soaking rains, has practically eliminated water shortage. In the storm, during which more rain fell than all during the rest of September, one slight accident resulted. A car, driven by Oliver Morgan, of Bellefonte, and Mrs. Sarah Markle, of State College, sideswiped in Lemont at about 8:30 o'clock, damaging fenders to the extent of about \$5.

In the vicinity of the Bellefonte airport, nearby the site of Centre County's famed "Phantom Lake," the rain seemed especially heavy. Highways and fields were covered by as much as three feet of surface water. The downpour began about five minutes after the State College-Williamsburg High School football game began at State College. Spectators were drenched in a few moments, and the game was called at the close of the first half. In Bellefonte, storm sewers and gutters were in many places inadequate to carry off the water and some streets were covered by water from curb to curb. Several gutter repair jobs, completed several days earlier and which had not "set" properly, were completely washed out, the mixture of crushed stone and road oil being washed into sewers. Some of the sewers clogged up early during the storm, and were of no aid in clearing the streets of water.

School Patrol Is Organized

(Continued from page 1)

operate by keeping their children at home until the patrol goes on duty at 8:30 a. m. and at 12:40 p. m. By complying with this request, children will be protected at dangerous crossings on their journeys to and from school. The following sixth grade boys have been chosen for patrol duty: Marvin Fanning, Herbert Malin, Henry Quigley, Gerald Gordon, Alvin Jodan, Edward McNichol, Arthur Smoyer, Wilbur Tierney, Joe Musser, Joe Quill, Merton Webster, Kenneth Murray and Ronald Hill. These boys are undertaking a big job and they need the help of every parent and motorist in Bellefonte if their work is to be of the greatest value to their school and their community. The patrol operates for safety of the children of the Dale building as well as for those of the Spring street school. The patrol is not completely equipped at this time, but it is hoped that the deficiency of equipment will be remedied in the near future so the officers are protected during all kinds of weather.

2 Die in Bald Eagle Motor Accidents

(Continued from page one)

er's jury, later was charged with involuntary manslaughter and was placed under bail for his appearance at court.

Mr. Peters sole eye-witness to the death of Mrs. Ezar was injured about 10:30 o'clock Wednesday morning when he stepped into the path of a car driven by Dorsey Stevens, of Davidsville, Somerset County, on the same road and within one-half mile of the scene of the first crash. Mr. Stevens, employed as a salesman for the Josiah Pritchard estate Gulf agency at Phillipsburg, was exonerated of all blame in the fatality after an inquest.

With Mrs. Ezar in the car at the time of the crash were her husband; their son-in-law and daughter, Mr. and Mrs. Michael Hustaasky, and a small son of the Hustaasky's. Mr. Ezar, 65, who suffered an injury to his back, and Mr. Hustaasky, who received a severe laceration of the abdomen, were taken to the Centre County Hospital until Friday morning when they were taken in the E. E. Widdowson ambulance to the Uniontown hospital for further treatment. Mrs. Hustaasky and son escaped injury.

According to testimony presented at the inquest by Private C. J. Conahan, of the Pleasant Gap sub-station State Motor Police, who investigated the accident, and Mr. Munro, driver of the truck, the Ezar-Hustaasky car had been proceeding west on Route 220 when, at a point about one-fourth mile east of Julian the motor failed. Mr. Hustaasky, driver of the car, pulled to the side of the road, got out and lifted the hood to make an adjustment when the Munro truck en route from Lock Haven to the Phillipsburg area for a load of coal, approached from the rear.

Munro testified that although he wasn't sleepy a short distance before the crash, and that although he remembered rounding the curve leading into the straight stretch of road which the accident happened, he must have fallen asleep, for he knew nothing of the crash until he was awakened by the impact. The truck hit the left rear of the sedan, forcing the rear truck forward to the driver's seat. The car was pushed over a slight embankment to the right of the road and came to rest on its wheels in a field.

Munro testified that after the accident he assisted in making the injured persons as comfortable as possible. He said that he had been traveling at about 35 miles an hour and although he habitually keeps the window on the right side of his truck cab open about two inches, even in severe weather, he expressed the belief that he might have been overcome by fumes in the cab. Munro said he suffered a broken rib, a split lip and had his nose "torn loose" in the crash.

He added that he doesn't know whether the Ezar-Hustaasky car was parked on or off the concrete, but believed it was on the road judging from shattered glass found at the point of impact. There were no tire marks on the road to indicate that he had applied the brakes of his truck before the accident. Questioned as to the amount of sleep he had before the accident, Munro said he had arisen about 5:30 o'clock that morning, went for a load of hard coal and returned home in time for lunch at noon and had set out for Phillipsburg about 1:15 o'clock. He said he remembered the last curve before reaching the accident scene some 30 yards distant, according to his estimate.

Munro offered to produce as witnesses from the Julian area, who he said saw him pass a service station a short distance east of the accident scene.

The crash occurred nearby the house of Edward A. Peters, who was standing in the yard, facing the highway. Mr. Peters told Pvt. Conahan that he saw the Ezar-Hustaasky car stop along the road and was just about to walk over to see if he could be of any assistance when the truck crashed into the parked vehicle. Mr. Peters' death two days later removed the only witness who was not involved in the crash. Members of the coroner's jury which found Munro negligent in the fatality were: Sheriff Harry V. Keeler, William E. Hurley, Al Rushel, B. D. Tate, and J. R. Driver, all of Bellefonte, and Charles Woods, of Phillipsburg. The inquest was held at the E. E. Widdowson funeral home on North Allegheny Street.

At the conclusion of the Ezar inquest, the coroner and other officials went to the Wetzel Funeral Home in Milesburg, where the inquest into Mr. Peters' death was conducted. Witnesses who testified in this case were Private J. M. Amick, of the Pleasant Gap sub-station State Motor Police, and Mr. Stevens, driver of the car. Stevens said that he was en route to Bellefonte last Wednesday morning to make his regular calls and was traveling at about 45 miles an hour as he passed Julian, when he was about 200 yards from the place where the accident occurred on the highway just opposite the village of Julian, he said he saw Mr. Peters walking along the edge of the road in the same direction in which the car was traveling. Stevens said he had an unobstructed view of the pedestrian all the time from then on. As his car got within 50 or 75 feet of the man, he said, Mr. Peters suddenly changed his course and started across the road. Reaching the middle, the aged man looked back just in time to see the Stevens car, virtually upon him. Stevens said he had swerved to the left in an effort to avert the pedestrian, accounting for the impact happening in the middle of the highway.

The driver of the car related that he immediately stopped, flagged down a truck driven by Theodore R. Rowan, of Altoona, which passed the scene a moment later, and with Rowan's assistance loaded Mr. Peters in the Stevens car for the trip to Bellefonte. The injured man, who suffered fractures of both legs between the knees and ankles, and who had a severe crush fracture of the right side of the skull, was conscious on the ride to Bellefonte but spoke irrationally, Stevens said. Private Amick related virtually the same story, and reported that he had visited the scene, but could not definitely establish the spot where the impact occurred because there were no markings on the highway. Stevens had said that the road was wet at the time of the crash, and that rain quickly obliterated the tire marks of his car. The radiator grill of the car a 1938 Plymouth sedan, was damaged by the impact.

Malcolm Peters, of Bellefonte, a son of the deceased, told the jury his father had lost the sight of his right eye, but that he had good vision in the other eye. In response to questions Stevens said that the brakes on his car were in excellent condition, and that he had not been drinking. Edward A. Peters, was a son of Lewis and Beulah Fisher Peters and was born at Julian on October 4, 1854, making his age at time of death 84 years, 11 months and 25 days. His wife, the former Julia Berkeimer, died on November 21, 1938. Surviving are the following children: Claudius, Junia, Mrs. George Shipley, Julian, Mrs. Harry Wiley, Philadelphia; Mrs. Hugh McAfee, Somerset; Howard, Curtin; Mrs. Guy Shuey, Knoxville, Tenn.; Wilbur, Huntingdon, and Malcolm, Bellefonte. Also surviving are 34 grandchildren, 10 great grandchildren, and 2 great-great grandchildren and a brother, William Peters. The deceased was a member of the Unionville Baptist church. Funeral services were held on Saturday afternoon from the home of the son, Malcolm, in Bush Addition, Bellefonte, with the Rev. C. C. Shuey officiating. Interment was made in the Union cemetery.

B. H. S. Defeats Snow Shoe High

(Continued from page one)

terback, scored from the six-yard line on an off-tackle plunge. Later in the same quarter a 70-yard march brought the second tally. As the half drew to a close, Bellefonte's second team got the ball on an intercepted pass on their own two-yard line, but in attempting to circle the left end, Boob was thrown for a safety by McCloskey, of Snow Shoe.

An uninterrupted march as the third quarter opened resulted in another half-dozen points for Bellefonte. Tate and Mazulla doing the ball carrying. Rhodes took the ball from the two-yard line to make the touchdown, and Mazulla's pass to Tate accounted for an extra point. A few moments later Tate intercepted a Snow Shoe pass on the 25-yard line, and with the entire Bellefonte team as interference, ran unopposed for a score. Mazulla's placement was a success.

Although the United States has a population of approximately 130,000,000 people, Germany, 78,000,000, and Russia, 168,000,000, the United States has only half as many research scientists as Germany and one-third as many as Soviet Russia. Recent estimates show, according to the Monsanto Chemical Bulletin at Rockefeller Center, that there are about 30,000 American scientists, 70,000 German scientists, and 100,000 Russian scientists.

Committee Points To Zoning Plans

(Continued from page one)

business or kind of industry which can be built or conducted. It also provides for limits of bulk and height of buildings, and for the size of front, side and rear yards for new homes which will be built in the city.

A Zoning Ordinance will: 1. Eliminate uncertainty from real estate, create confidence in its stability and conserve its value. 2. Substitute order and system for disorder and chaos in city building. 3. Direct the location of the proper building for proper use in the proper places. 4. Maintain and promote attractiveness, comfort and contentment in home neighborhoods and encourage home ownership. 5. Encourage building operations and facilitate the financing of homes and other structures. 6. Provide, without cost, for homes in all residence sections, protection from injurious invasions of business or industry. 7. Prevent undue concentration, providing open spaces to promote health and safety.

A Zoning Ordinance, properly drawn up, does not cause inconvenience to the best interests of any land owner, nor does it require the abandonment of any existing use of land.

Dr. W. J. Schwartz To Locate Here

(Continued from page 1)

Office hours will be from 1 to 3 p. m. and from 7 to 9 p. m. Dr. and Mrs. Schwartz expect to move to Bellefonte as soon as suitable living quarters can be secured.

Dr. Schwartz was born in Pittsburgh in 1910, was graduated from the University of Pittsburgh medical school in 1934, and served his internship in the Memorial Hospital, Pittsburgh. After that he was a member of the staff of the Allegheny County Hospital for nearly two years before accepting an appointment as resident physician at Rockview. He has resigned his duties at the prison and will devote his entire time to his Bellefonte practice as soon as the newly appointed resident physician has taken charge there.

During his period of service at Rockview, Dr. Schwartz has become well known and well liked throughout this area. He is a member of the Nittany Country Club; of the Centre County Medical Society and of the Pennsylvania Medical Society. In college he was a member of the Phi Beta Pi medical fraternity. Dr. Schwartz also is a member of St. John's Catholic church, Bellefonte, and comes here with the best of recommendations.

FUMIGATE FOR WEEVILS BEFORE COLD WEATHER

(Continued from page one)

Special species of insects cause considerable damage to stored grains and mill products. Most of the damage is done by the larvae or weevils. Not only does the presence of the weevils result in the destruction of the grain, but they may also cause it to heat. When severely damaged by weevils, grain and milled products may be unfit for food.

To control grain weevils, according to County Agent E. C. Blaney, attention must be given to a few basic principles. Storage bins must be kept clean of scattered grains and dust in which the insects may breed. Bins must be tightly built. Early threshing is advisable. It is best to keep the grain out of mows.

The insects can be killed by fumigation, and this is a step that must be taken before cold weather to be accomplished successfully. The storage temperature must be at or above 70 degrees F. Carbon bisulphide is the most effective fumigant for farm purposes. Substitute materials generally depend on the proportion of carbon bisulphide in the combination for their effectiveness. Carbon bisulphide is a liquid that forms a gas heavier than air. The fumes will go to the bottom of the bin. County Agent Blaney warns that carbon bisulphide is explosive and must be kept away from open lights of all kinds. He suggests using three pounds for each 10 bushels of grain, placing it in shallow tins on top of the grain. Three or four containers placed to distribute the gas evenly will be sufficient. Bins must be airtight.

Further information on the control of grain weevils may be obtained from the Agricultural Extension Office, Post Office building, Bellefonte.
