to the Bellefonte-State College road project at such time "as the circumstances will permit."

A check with Chamber of Commerce, Rotary Club and Kiwanis Club representatives yesterday revealed that plans are now underway for the road committee from those organizations to go to Harrisburg in the near future in an effort to have the proposed road placed on the construction schedule for this spring. The committee was instrumental last year in having the long-contemplated project revived, and at the time the Highway Department survey was approved, strong assurances were given by Highway officials that the road would be built without fail this spring.

listened to his addresses on the problems of youth and parenthood.

Since going on the lecture platform he has delivered over 11,000 addresses.

Without any effort at preaching and without any oratorical flourishes, Dr. Baker has left a profound impression on the lives of these millions of young people. His most popular lecture, "How to Make the Most Out of Life," has been delivered to three million boys and girls of high school age. Almost three-fourths of the young people who have listened to this talk have come back to the auditorium the same evening to hear his address to mothers and fathers, and their sons and daughters on "The Most Important Job in the World."
