OVERTIME

WORK

for the Kidneys

Means Serious Trouble

The person who pays no attention to periods of rest and ex-

ercise and continually overeats, burdens the kidneys with overwork. Exercise and rest help to distribute some of the

work of eliminating the waste products through other chan-

nels, and a HEALTHFUL DIET lightens the burden of fur-

nishing the body with more material than it can utilize and

One of the first signs of Bright's disease is the necessity of

emptying the bladder, about 4 o'clock in the morning. The faithful kidneys have been working "overtime" trying to clear

the blood of impurities. At this stage, further progress of the

disease can be prevented by prompt examination, proper ad-

vice and treatment. After a time, the individual is forced to empty the bladder at about 2 o'clock, and again about 4. At

this stage of Bright's disease there is usually some elevation

of the blood pressure and frequently moderate shortness of breath upon mild exertion. As the disease progresses, the

third stage brings more pronounced symptoms of "specks

At any stage of the disease, a frank and complete statement

to a competent physician who can properly diagnose through proper examination, would disclose the true state of the kid-

neys. Have regular yearly physical examinations, including

urinalysis, and tell your doctor if your kidneys have been
