SETTLE MONEY QUESTION BEFORE CEREMONY

One of the best ways that a young couple can help their marriage to become a successful one is to settle the money question before the ceremony. It may seem a very mercenary subject to bring up but the parents of the bride and groom can suggest it and save their children much unhappiness and

young people give no Most thought to money during the engagement. The bride-to-be imagines that anyone so devoted as her flance will most certainly share equally with her. PROBLEM: When will hard water not pour out of a pitcher? (Answer elsewhere in this department.)

V. N .- What is the meaning of "soviet," as applied to Russia?

Ans .- "Soviet" is a Russian word which means a council. Hence, a ouncil of the Union of Socialist Soviet Republics, established as a result of the Russian revolution of 1917, and later by the constitution of the Russian Union in July, 1923. The soviets (councils) are the primary organs of government based on the principle of communism, seeking to give the power of government to the working classes.

E. D .- What is the most northern point in the United States?

Ans .- The most northern point in the United States is in Minnescta, on the shores of the Lake of the Woods. It is a scant one mile farther north than the most northerly point in the State of Washing-

B. G .- What is the cause of earthquakes?

Ans .-- The earth is shrinking slowly, and this puts a good deal of strain on the surface rocks, especially in parts of the earth where rocks are being forced up into the mountain wrinkles, Sometimes a few layers of the rocks break under this strain, and the rocks on one side of the break slip up or down or sidewise. The shock of this slip makes an earthquake.

C. N .- What do fishes eat?

Ans .- There are a few fishes which eat seaweeds or other fish, but most fishes live on the microscopic plants and animals, millions of clothes, electricily and the upkeep which are contained in every cubic inch of the surface water of the sea. I. J .- How do plants grow?

Ans .- From the soil they take water and certain mineral elements which they need; out of the air they take carbon dioxide gas and oxy-

want with a penny?'

Today the farmers of the United States have a better understanding of the economics of agriculture than ever before. This is due, we believe, and frankly state, to the leadership of Secretary Wallace and his aides, who have stimulated farmet discussion of farm problems and put up to the farmers, as a group, the decision as to agricultural policies, Mr. Wallace and his group have many critics and it is possible they have not always been correct but, in the main, they have taught farmers much about the relationship between crops and income, domestic and foreign market, price and purchasing power and other subjects.

What is the matter with the country? Hardly two people in the nation agree on the answer. This is not surprising because the explanation of present problems does not lie in any particular indictment. There are many causes. In fact, there is probably nobody who knows the complete answer. Efforts to understand our economic machinery are hindered by various factors, including self-interest. About the best thing that the average individual can do, if this question has presented itself to his mind, is to forget about the nation, for the moment and ask, "What's the matter with me?" If the inquiry is pursued relentlessly and with diligence there is bound to be results.

The writer cannot tell you whether Dewey or Vandenberg, or Taft, or somebody else will get the Republican nomination in June at Philadelphia. However, it may be asserted that the result of the Wisconsin primary did no harm to the chances of the New York prosecutor. Young, active and vigorous, the New Yorker is making a good impression with Republicans. So far as President Roosevelt is concerned, no one knows what he will do. His recent victories in the Wisconsin and New York primaries were not surprising. It is readily admitted that Mr. Roosevelt can have the Democratic nomination if he will take it. There is no doubt about this and nothing but a major political earthquake will prevent the President, if he does not run himself, from naming the man to have the first place on the Democratic ticket.

Just what purpose Berlin had in mind is obscure. The "revelations" may serve a propaganda purpose in Germany but this is not clear. PUSHING OVER THE BUSINESS

From Pittsburgh comes the story that a \$500,-600 industry, employing 200 workers is going out of business completely after a strike which has been in effect at the plant since July. Stockholders are disgusted and voted liquidation.

The dispute was over wages. What the company offered finally was not satisfactory to the men whose strike action has brought idleness not only to themselves but to 150 other employes not involved in the wage dispute.

If liquidation takes place, it ought to serve as a warning to all who make excessive demands on a business which cannot grant them and continue te operate. Industrial history in recent years shows endless numbers of failures directly traceable to worker demands. In the newspaper field alone, one merger after another has taken place, partly at least for such reasons.

The result in all these instances has been not more or as many jobs but no jobs. Thus workmen who were misled into demands intended to improve their conditions, found themselves in a still worse plight.

Even if the welfare of the employer is unwisely regarded as of no consequence to the employe, the welfare of the employe certainly is that individual's first concern. It has been proved many times that the goose that lays the golden egg can die. The worker is entitled to the very best terms which in reason and justice he can obtain, but when he pushes his case beyond that point, not only his employer but he himself becomes the victim of folly.
