urer elect will receive the same salary as his predecessor, which is \$200 annually Mr. Blaney, as chairman of the building committee, declared that

he found that the present system of requiring the Board President to sign requisitions for every purchase made by the schools, is cumbersome and often causes delay in school work. "I feel," Mr. Blaney said, "that the Supervising Principal should have the power to purchase a box of tacks or a can of paint when janitors need such items in their regular duties."

Mr. Blaney then offered a motion to give the Supervising Principa! power to purchase minor items relative to the repair and maintenance of the schools. He broadened motion to include emergency supplies upon the suggestion of Mr. Harranit, who contended that there are often times when minor supplies are needed at once and that it should be unnnecessary for chool authorities to have to locate the Board President for his signabefore such purchases are

> bodies to outside influences. Dr. Petersen said that changes in the barometer should serve as a warning to physicians to be especially watchful over their patients.

On the basis of a survey the doctor concluded that the death rate is direct proportion to the ups and downs of the atmospheric pressure. Sudden increases or decreases in the pressure, he declared, often will show an adverse effect on patients who appeared to be on the road to recovery and sometimes the shock so great it causes death.

Windows Are Important In Appearance of Home

Windows are all-important in con-In Engineering Tests trolling the outside appearance of a Scientists are using shadows and some and its inside decorative efrainbows to prevent train wrecks, fects, as well as contributing to the comfort and happiness of the occufloods and other disasters-by the use of polarized light to analyze pants, according to a recent issue of strains on bridges, dams and other a leading builders magazine. structures, according to Prof. M. S.

Some of the newest home building ideas for cutting costs and increasng quality apply to windows. And that is fortunate since the public taste seems to be more and more ward glass, cheerful interiors and sunshine. Analyzing the work of some of the country's most successful operative builders brings out the fact that they are practically designing their best selling houses around its windows. In their most profitable homes the windows are mething more than mere openings the wall. They have a far greater ole than that of letting light in and eping out wind and rain and snow. They are utilized as one of the most effective of sales points in focusing attention of the prospect, whether he's a buyer or a renter.

Picture windows decide many "is that polarized light, which is view. Use of peach colored plate glass often adds to the beauty of a scene. And a picture window over the sink or a corner window may be the means of lifting that kitchen to a new plane of beauty and cheer the difference between a domestie workshop of drudgery and an inviting unit of the home.

> Lusty Klondike Is Stilled The lusty Klondike, where men killed each other for gold and gambled away their fortunes on greentopped tables in smoky saloons, is all but buried today beneath the gray muds deposited by 40 years of floods. Dr. Lowell R. Laudon, professor of geology at the University of Tulsa (Oklahoma), painted that picture in describing his experiences in a hiking trip from Skagway over Chilkoot pass to Lake Bennett at the headwaters of the Yukon river last year. A lone trapper lives in the ghost area today. Sodden gray piles of lumber, almost completely overgrown with the dense Alaskan vegetation, mark former camp sites. Beneath tumbled roofs lie wreckage of crudely made furniture, harnesses. packs, wagon wheels, sleds, oars, and other gear discarded after the collapse of the golden bubble.

Adequate School Lunch
To maintain a good food balance,
the noon school lunch should include milk, fruit or tomato juice; one protein food like eggs, meat, fish or cheese; bread and butter, and one vegetable, preferably raw. The vegetable may be used as a sandwich filling, or it may be celery stalks, carrot or turnip sticks with salt. Whole wheat bread should be used at least half of the week for these lunches. Cookies or cup cakes are preferable to sliced cake because they carry much better. If the teacher serves one hot dish at noon, the children should know the castle (from the old French and menu a week in advance so the mother will know just what to send from home to complete the lunch. a ditch. Around the crest of its

> Labrador Tea Labrador tea is the popular name

for a small evergreen shrub of the heath family which grows in bogs and swamps in Greenland, Canada and the more northern parts of the United States. The leaves are tough, densely covered with a brown wool on the under face. They are fragrant and when crushed have been used as a substitute for tea.

There are exceptions, but the best eople in most places are the ones who support the churches.

Our Own Advice: Never fight against old age; accept it gracefully and it will not burden you.
