E ...... Don't worry about the weather; winter will arrive all right.

Buying Christmas seals is a habit that every Centre county citizen should acquire.

Mussolini may begin to suspect by this time that the word the Greeks had was "No."

Mussolini boasts that he will break Greece's back, whether it takes two months or twelve months.

The money that you have is worth what it can buy. That's why experts are closely watching increases in prices.

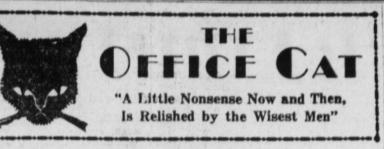

Nobody knows what the next twelve months hold in store for the people of the United States, but it is safe to assume that there is sacrifice ahead for every loyal American.

It is announced that officers and enlisted men in the parachute corps of the Army will receive extra pay because of the hazards of their duties. They will get about fifty per cent more pay than for regular ratings.

A new tax bill, will be introduced early in the first session of the new Congress to yield revenue to meet the regular expenditures of the Government, but just what it will be depends largely on the results of present taxes in connection with the current upturn in business.

Bombers going to Great Britain are equipped with the Sperry bombsight, but the United States

## THE CENTRF DEMOCRAT, BELLEFONTE, PA.

## The Nine Hunters

To arms, to arms, the huntsmen cried But still the bunny sped And though the hunters fired and fired The bunny simply fied.

They grew quite angry, these huntsmen bold Who had never known defeat And when the bunny left them cold They stamped and stamped their feet.

To arms, to arms, they cried anew But now 'twas too late For old man age had left them blue With pairs of aching legs.

In pure disgust they sat and thought About that rabbit bold Until their ears got red and hot

And they knew they were nine men old. That's the end there ain't no more For their guns are put away But come wintertime they'll bray and bray

'Of the bunnies they shot by the score. -"Froth," Harrisburg Patriot,

## Story With a Moral

Temperance Lecturer :- "And in conclusion, my dear fellow citizens, will give you a practical demonstration of the evils of the Demon Rum. I have two glasses here on the table. One is filled with water and the other with whiskey. I will now place an angle worm in the glass of water. See how it lives, squirms, vibrates with the very spark of life. Now I will place a worm in the glass of whiskey. See how it curls up, writhes in agony and then dies. Now, young man, what moral do I get from this story?

Young Man in Front Seat-"If you don't want worms, drink whiskey."

### . . . .

## Balmy Weather

Little Audrey and her mother returned from London last week. While did husband for the many gifts he in London, as they were walking the streets, an Italian bomber landed a lavishes upon her, if she could feel Hoover's term ended? shot right on her mother's head. So little Audrey just laughed and laughed and laughed, for she knew Italian balm was good for the skin.

## \* \* \* \* , Couldn't Miss

The squad of recruits had been out to rifle range for their first try at marksmanship. They knelt at 250 yards and fired. Not a hit. They moved up to 200 yards. Not a hit. They tried at 100 yards. Not a hit.

"Attention," the sergeant bawled, "Fixed bayonets! Charge! It's your only chance.

## . . . .

## Embarrassing

Arriving home from the party, the doctor's wife confronted her husband

"I'll never take you to another party as long as I live," she fumed. "Why?" he asked in amazement

"You asked Mrs. Jones how her husband was standing the heat."

"Why, her husband has been dead for two months." . . . .

## Poet's Corner

Two mosquitoes once lit on the features Of two fair and peroxided creatures;

When asked by what right, They replied, "We're not tight,

We're just seeing the game from the bleachers." \* \* \* \*

## Wouldn't Repeat

The proud father called up the newspaper to report the birth of twins. The news editor, not hearing clearly, said, "Will you repeat that?" "Not if I can help it!" shet back the father.

. . . .

## No Further Proof

A physician, on presenting his bill to the executor of a deceased patient, asked, "Do you wish to have my bill sworn to?" "No," replied the executor, "the death of the deceased is sufficient

LOUISA'S LETTER

**IDLENESS IS THE REAL CAUSE** OF MUCH TROUBLE.

Dear Girls: A reader writes that she is very unhappy. It seems that her husband is the soul of courtesy and generosity. She has a beautiful home, a car of her own, a generous allowance, but she has decided that she doesn't love her husband

and that causes her to be miserable. There are so many people in need of sympathy that I find it hard to expand any on this case.

When I think of the weary women who scrub and sew and cook from morning 'til night, trying to make ends meet and keep the children looking well enough for school -when I think of women who have no luxuries, lacking even many necessities but who face life with courage, although that means wearing the same old frock or coat, when I think of all the women who have worthless husbands as added burdens, men who philander or who zen. humiliate them by getting drunk. who actually abuse them and their children. I think this unhappy reader had better get down on her

knees and thank God for all her blessings.

Two to one, her whole trouble is idleness. She probably hasn't enough to do to keep her mind out of devilment. She thinks about herself all of the time and finds nothing of interest but the state her feelings. If she were less selfish and would try to think of ways in which she might repay her splenso grateful that she does not have to struggle for a living and would work to help those who do, with some of her idle time and generous means, she would perhaps, find that she is not unhappy after all.

ture themselves as unhappy. They just wallow in synthetic misery and are really having a gorgeous time pitying themselves.

I feel sure that if they were suddenly bereft of car, money and expect to pass through this world but once. Any good, therefore that house, and had to stand all day in I show to my fellow creature, let me do it now. Let me not defer or neg-

has declined to permit British use of the Norden bombsight which is used by our first-line fighting planes. While the Sperry sight is said to be superior to any possessed by other nations, it is considered more or less obsolete when compared to the Norden sight which remains a military secret.

Accepting the proposition that the defeat of Great Britain will leave the United States alone with war inevitable sooner or later, the Committee to Defend America by Aiding the Allies insists that our only chance of avoiding war "is by giving all material assistance to Great Britain and her allies immediately." Just now, the committee urges greatly increased arms production because the war-"may be won or lost on the American assembly lines."

The Dies Committee recently made public a White Paper, dealing with the activities of German agents in this country, whose activities, in the opinion of the Committee, have been financed directly by the German Government through the German Embassy. One chapter of the report detailed activities to stir up bad relations between the United States and Japan with the view to preventing the United States from taking any part in the war in Europe.

We heartily congratulate the American Federation of Labor on its action in recognizing the responsibility of labor organizations to prevent rackets and racketeering from preying upon business and the public generally. The labor union that works for the benefit of its members is justified by its results. The same cannot be said about the alleged "union" that has been utilized to blackmail employers into the payment of protection fees and which, in the hands of callous, gangster-like leaders, have never been much concerned with the welfare of the workers. The rackets that have plagued large cities have not represented responsible labor leaders, the rank and file of organized labor of the American people. That the American Federation of Labor is turning its attention to their nefarious schemes speaks well for the Federation, which deserves a vote of thanks from the public at large.

It is worth noting that in the celebration of Columbus Day in Madrid, emphasis was placed upon the influence of Spain in Latin America. The Spanish Foreign Minister is expected to cultivate Spanish organizations throughout Latin America and the Philippines in the interest of Spain and toward the elimination of all Anglo-Saxon influence, particularly that of the United States, "which Falange names as its mortal enemy." (The quotation is taken from a news dispatch published in The Christian Science Monitor.) The effort of Spain to gradually assume political leadership in Latin-America is considered, by many experts, the logical outcome of Spain's association with the Axis powers. It is well known that the "New Order" envisioned by Hitler expects to have free access to Latin-American raw materials and industrial markets. Development of Hispanic-American loyalty to Spain is considered a logical method to achieve the ends in view.

### PROTECT THE MORALS OF SOLDIERS

Fathers and mothers of men called into service under the Selective Service Act will echo the appeal of the War Department, made to civic organizations, asking them to protect the morals of soldiers when they are off duty by eliminating areas of vice and intemperance near Army posts.

The Army will take care of the morals of the men when they are on military reservations. The War Department says that "the morals of the Army have always been a matter of pride to its person-. . The enlisted men are encouraged to take nel pride in their uniforms and in the Army of which

ences.

We make no effort to pretend that food and oil supplies represent grave problems for the Axis nations because we do not know the facts. Neither do we attempt to set up the liability of millions of sullen people in nations conquered by Germany. There s no way for us to tell whether the acquisition of industrial plants, ship-building facilities, ores, fuels and other raw materials have solved some, if not all, of the shortages that made Hitler and his experts anxious to avoid a long war.

Last week we called attention to the serious threats that involve the British and space is not available now to speculate upon the undoubted improvement in British prospects for eventual victory since June.

Important factors include the failure of Germany to launch an invasion, the spirited suffering of the people under aerial attacks, the amazing courage of the men of the Royal Air Force and the sterling performance of British seamen. More vital. however, is the promise of almost unlimited supplies from the United States which, unless checked by Hitler, will guarantee British victory if the empire holds the fighting front.

## TO RUSH SUPPLIES TO ENGLAND

It is very difficult to ascertain the extent of the damage that is done by German aerial attacks upon objectives in Great Britain despite the importance of the answer to the question.

From Great Britain, within recent days, has come considerable testimony as to raids upon industrial centers. The Germans, we are told, have sent their bombers by the hundreds in massed attacks upon particular localities.

While we have no way of being certain in our estimate as to the damage inflicted, it is safe to assume that it is tremendous. To reach this conclusion it is not necessary to believe the claims sent from Berlin. It is only necessary to read the British reports of British raids upon objectives in Germany.

Obviously, if British planes can inflict serious damage upon rail centers, aircraft factories and other production centers of Germany, German aircraft can do the same in Great Britain. It is known that German planes outnumber British bombers and that the targets, sought by Hitler's airmen, are compact and more easily located than the scattered objectives that are pounded by the R. A. F.

This conclusion leads up to consider the part that the United States must play in upholding British morale. As German bombs diminish the efficiency of British productive plants, rushing war supplies, the leaders of Britain must know, beyond doubt, that they can secure the supplies somewhere, regardless of German destruction of factories and plants,

Thus, it is necessary for the United States to furnish the supplies that will offset the lost production of British plants and, in addition, if Britain is to keep alive hope of victory, additional material that will promise, some day, to develop adequate superiority for British arms.

The interest of the United States, in sending these supplies, is not to rescue the British empire. While our sympathy is with the British it does not of itself, justify the role of non-belligerency that has been asumed by the United States in contradiction to its former policy of neutrality. The fact is clearly recognized by people in this country that the future peace and welfare of the United States depends upon the outcome of the war now going on in Europe.

Consequently, it behooves the United States to peed-up the production of planes, guns, tanks, muntions and other war supplies in order to assure the British of a plentiful reserve. This is insurance against having to face a trio of victorious dictators. whose ideals and ambitions will lead them into an inevitable attack upon this country, once they are relieved of the necessity of fighting an enemy at home,

and seek Truth righteously, He dievidence that you attended him professionally.
