fente airport at a meeting of Coun-Deca'ur, spent Sunday with SherPleasant Gap, and Mr. and Mrs. fice of a physician who found her to cil. Monday night. Davis was a man and Annie Confer.

Figure System and daughter Agnes be suffering from a severe bruise pilot in the U. S. Army in France during the World War and at the close of the war had a commission in aviation since the war. "There's no more hopeless a feeling in the world," he said, "than to be flying over strange country at night and be faced with the sudden necessity of landing." He told Council members he is familiar with the Bellefonte airport and praised it highly ranking it among the better airfields in the small communities of the east. In speaking of Council's proposed expenditure of approximatey \$400 a year for field lights and beacons, Mr. Davis declared that if one plane is saved from crashing, or one pilot saved from injury or death the expense is justified. But aside from that, he predicted the increased revenue and other benefits to Bellefonte from operation of the airport will offset the cost.

> PARKING METERS: We feel that parking meter salesmen are missing a good bet in selling meters by not having short mot.on pictures to present at meeting, of borough and city councils. Such a movie should show how the meters look installed along a street, with views of men and women operating hem. A brief view of the factory in which they are made should be presented. Then they should show close-up shots of a chiseling motorist trying to cheat the machine by pounding, bumping, and use of shigs for coins. The wind-up of the reel should show a motorist with a sledge hammer, beating up a machine to illustra e that although the case will bend out of shape it won't break or crack. We're becoming convinced that the first parking meter salesman who can present such a movie at a Bellefonte Council meeting will be the bird who gets the order—that is, if Council really means to install parking meters.

Centre County May Be Reapportioned

(Continued from page one)

But O'Connor's proposal for re-apportionment, has little chance of passing, according to political observers although some of the features of his bill may be embodied in another bill in case of a party stalemate which requires a compro

Other two measures introduced in the congressional reapportionment fight at Harrisburg are those sanctioned by Sen. George Wade, Cumberland, and House Majority Leader Leo Achterman of Monroe.

How LONG is a

WELL, it's longer going downhill than up, longer going slow than fast - but the important new discovery of the year (or since Buick's Compound Carburetion* appeared) is that it's longer when you have two carburetors teamed like Buick's than when you have

Here's why:

In easy going like most of your travel, just one of Buick's smaller-than-usual carburetors thriftily handles all engine requirements.

Only when you want extra power does the second carburetor come in.

Then, momentarily, it adds extra fuel and extra power only while it's needed.

Result is that carburetion is always fitted to your driving need.

You're never driving with a carburetor that's bigger than you need for lowrange travel, or one that's too small for top-range performNow the net result is that the same-size engines give up as much as 10% to 15% more miles-per-gallon than last year.

And that's a handsome saving -mighty handsome in a car big and roomy and smart as a Buick.

Look over the next Buick that passes you-or better yet, go trial-drive one-and see if you don't agree. *Optional equipment on the Buick SPECIAL, standard on all other models,

for the Business Coupe delivered at Flint, Mich. State tax, optional equipment and accessories -extra. Prices subject to change without notice.

Bellefonte,
