CONSTRUCTION OF Issued weekly, every Thursday morning. intered in the postoffice at Bellefonte, Pa., as secondclass matter.

TERMS OF SUBSCRIPTION	
\$1.50	per yearif paid in advance
\$2.00	per yearif not paid in advance

The date your subscription expires is plainly printed on the label bearing your name. All credits are given by a change on the date of label the first issue of each We send no receipts unless upon special request. Watch date on your label after you remit.

Matters for publication, whether news or advertising, must reach The Centre Democrat office not later than Tuesday noon to insure publication that week. Ad-vertising copy received after Tuesday morning must run its chances

All reading notices marked (*) are advertisements. Legal notices and all real estate advertisements, 10 cents per line each issue.

Subscribers changing postoffice address, and not notifying us, are liable for same.

All subscriptions will be continued unless otherwise directed.

CIRCULATION OVER 7,000 COPIES EACH WEEK

FINANCIAL STATESMANSHIP

Democratic legislators have restored to order the State's chaotic finances.

Under two years of Republican rule Pennsylvania achieved a ninety million dollar deficit-the largest in its history. Under a Governor and Party which promised the State economy, expenditures leaped to a new high.

The pledge of efficiency was found to be an idle dream, with padded payrolls and useless expenditures driving the Commonwealth deeper into the red.

The Republican budget, submitted in February of this year, was found upon examination to be entirely useless, a tissue of fraud and politics so deftly interwoven that the Democratic leaders in House and Senate found it necessary to sit down and rewrite the entire document.

Last week there was presented to the House of Representatives a message unique in the history of the General Assembly. It was a new budget, prepared and written by legislators and complete in the last detail with itemized columns of proposed receipts and disbursements.

It represented three months hard work, devoted work by Floor Leader Achterman, the chairman of the House Appropriations Committee and its efficient research and clerical staff; by Representative Anthony Gerard, chairman of the House Ways and Means Committee; by the staff of the Joint State Government Commission, now under Democratic directions, by Senator Harry Shapiro, Minority Floor

OUR COUNTRY'S PROBLEM Isolationists, and included in that group must

be all the people who oppose the various programs suggested to make our aid to England and the other beleaguered democracies effective, have generally come to the declaration that the utmost aid to Great Britain in the way of war machines and munitions is all right.

Ex-President Hoover, the other day, in affirming the necessity of keeping up this supply said: "Let me state at the outset that I support provision of the maximum of tools of war to Britain; that I am convinced we can give this maximum during her next critical months only if we keep out of this war.

But nowhere in his address did the former President mention how we were going to deliver the goods in the face of the raids and submarine and bomber sinkings of cargo ships.

The classical parallel comes from that high authority, Mother Goose, wherein a cautious mother, consulted on the wisdom of aquatic adventure, advised thus:

> "Yes, my darling daughter, Hang your clothes on a hickory limb, But don't go near the water."

The general argument is that if we convoy the supply ships, and they are attacked, the American war craft must attack the raiders. That means a naval engagement and the isolationists agree that is war. But is it?

Early in our history we battled French frigates and corvettes and privateers. Frequently we recaptured prizes the raiders had taken. On several occasions our naval forces compelled French warships to surrender and brought them home. We patched hem up, raised our own flag on them and sent them to sea again to fight the French-and still there was no war declared. In fact, the Governor of one French island refused an exchange of prisoners on the sole ground that the conflicts did not constitute war.

What To Do-And How To Do It

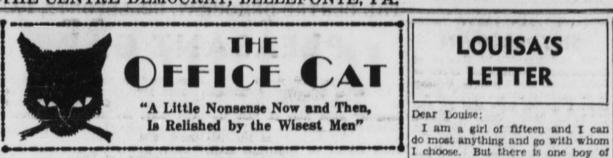

Up to the date of this writing we have not adopted the convoy system. We merely patrol the ocean lanes and report the advent of hostile craft. What would happen if one of our patrollers happened to be present when a Hitler raider started to sink one of the cargo ships carrying munitions to England still remains a matter of conjecture. Probably the Navy knows what would happen but no civilian can do more than venture a guess.

Still the question remains unanswered-how are we going to insure the delivery of the war goods all agree must reach the forces of democracy? That delivery perhaps constitutes the biggest element on whether the British Empire stands or falls. Perhaps on the arrival of the bombers, guns and ships we are forwarding under the lend-lease law depends the outcome of the European War. If Hitler wins, we will be next in line, for the purpose of the Axis to destroy democracy has been openly declared. It may be argued from this premise that the only way we can definitely keep out of war is by making the destruction of Great Britain impossible-but still there is no solution of the riddle offered by those who take Mr. Hoover's position-that is to give England every possible aid, but avoid using the navy or the air force "where they may have to shoot or be shot at.

The President has in mind the answer to the riddle. He said as much at his recent conference, when he mentioned that the convoy system used during the first World War was out-moded in view of the part that air bombers, improved submarines and increased power surface raiders are now playing, but, naturally, he would not reveal just what would be done in regard to the new agencies of attack on merchant ships.

The President Is Not Guessing

Some of the column writers deduce that he intends to do it with airships, using airplane carriers and nearby islands for bases. Going on from there, they suggest that the program involves big bomber bases on the Aleutian Islands and Hawaii, from which our flying fortresses would keep watch on any element of the Japanese navy approaching American waters. This, they figure, would enable this country to brace up the Affantic patrol without taking too many chances on what Japan might have in mind

She Was The 'Fruit' She was a peach from sunny Georgia-A honey from the south 'The boys all called her "rumor' 'Cause she passed from mouth to mouth.

. . . . Nice Doggie

Shoeless, he climbed the stairs, opened the door of the room, entered, to go out with him. and closed it after him without being detected. Just as he was about to get in bed his wife, half aroused from slumber, turned and sleepily said: and he was along. He will talk to "Is that you, Fido?"

The husband, telling the rest of the story, said: "For once in my life I had real presence of mind. I licked her hand."

. . . .

Smart Kid

A Bellefonte boy told his teacher that his sister had the measles. "You go right home, Johnny," she said, "and don't come back until you unless he does it of his own acyour sister's well."

Johnny left in a hurry. After he was gone another little boy held up in that way but open pursuit very his hand and said:

"Teacher, Johnny's sister what has the measles lives in Lock Haven."

Leader, and officials of the Democratic State Committee

This is genuine statesmanship of a high order The Democratic Party, in the majority in the House and in the minority in the Senate, with no voice in the executive departments other than the fiscal offices, refused to accept the role of critic and opposition.

When it became evident in February that the Republicans had no program other than the hodgepodge budget, they decided that their responsibilities to the public required them to assume the responsibilities which normally belong to the Party controlling the executive arm of government.

The new budget is the answer-an irrefutable answer to the do-nothing program of the Republicans.

It is an honest budget, it is a courageous budget, it is a humane budget, it is a budget designed to promote the general welfare, not the interests of the few

Under its provisions the mentally ill will receive for the first time adequate care through State assumption of the county mental hospitals. It provides adequate subsidies for distressed school districts and gives the special aid to school districts to pay for transportation and high school tuition promised in 1937 but refused by the Republicans in 1939.

It cuts the cost to local taxpayers through these special grants and further saves the State taxpayers \$7.653,000 through reduction in the four-mill personal property tax.

The legislative budget is intelligent enough to recognize that the defense boom means increased revenue and to pass on this increase in the form of savings to taxpayer.

The Democratic budget is the result of courage, vision, and sheer hard work.

It is financial statesmanship of a high order. Members of the Party and the general public alike will rejoice in the calibre of the leadership the Democrats have displayed on Capital Hill.

It augurs well for 1942.

LET JAPAN MAKE THE PEACE

The suggestion has been advanced recently that the time is ripe for the United States to make an effort to settle the differences between Japan and China, with a view to removing the Far East as a source of possible trouble.

We have no idea whether there is any basis for belief that peace can be arranged in the Far East through settlement of the issues that threaten to result in hostilities between the United States and Japan. Certainly, it is absurd to write of the Far Eastern question in a manner indicating that all the United States has to do in order to bring about peace, harmony and good will in the Far East is to be reasonable with Japan.

The Government of the United States has been exceedingly reasonable with the Japanese since they began their policy of aggression in the Far East Until the Tokyo statesmen bound themselves to Germany and Italy in a formal alliance, which is plainly aimed at the United States, this country, despite its great sympathy for China, permitted Japan to buy vast quantities of war materials and continued to purchase the silk upon which Japanese fiscal strength largely depends.

Just the other day, Foreign Minister Yosuke Matsuoka issued a formal statement for the Foreign Office reaffirming Japan's loyalty to the Triple Alliance. He denied reports "in the United States' that Japan had become indifferent to the German-Italian-Japanese treaty. Moreover, he threatened that if Japan's peaceful policy in the South Seas became impossible, she might have to reconsider it. This was taken as an obvious reference to the Netherland Indies and a hint that force might be used.

The people of Centre county might as well understand that before the present crisis is settled they will be called upon for sacrifices.

It is true that the United States can get along with Hitler, but only on Nazi terms.

The individual who refuses to fight for his rights is not entitled to any.

Perhaps the guess is a good one, but it sounds a little too simple. The deductions possibly hit what may be a part of some more elaborate plan-that is anybody's guess.

Obviously, the reticence concerning the arrangements is to avoid giving potential enemies information. As the President said, when pressed on the subject, that a comprehensive answer would be the very information Hitler would be pleased to get.

Senator Wheeler, as leader of the isolationists. suggested the other day that the President submit a war declaration to Congress. Of course, nobody considers seriously that we would declare war. War, if it ever comes, will have to be declared by Hitler The debate which the Montana Senator visualizes would probably furnish the Axis powers with just the information withheld for military reasons. The isolationists, it is indicated, would advance as their main argument that America is woefully unprepared If they were answered, either the Government would refuse to give the data of our Army and Navy and materials strength, or would have to disclose those vital secrets. So the Wheeler project is not going to get very far. The debate would probably range far into the field of how much aid the democracies have received, how much is en route, and how much the Nazi raiders have sunk-all very interesting, doubtless, but hardly good strategy.

The Nazi spies, and general espionage agents now operating in this country with difficulty, danger and vast expense, would be relieved for other duty if what they are striving to learn were spread on the Congressional Record, ready-made for them,

A. F. OF L. DESERVES PRAISE

It is worth noting that the Executive Council of the American Federation of Labor has announced its agreement with the President and called upon its members to serve the nation and the cause of democracy by withholding from strikes until every effort at mediation and conciliation has been exhausted.

In making public this statement, the Council pointed out that the Federation had heretofore enunciated a no-strike policy which "las proven 99 per cent effective," but that "we cannot be satisfied" with this record.

Of course, there are people who will say, immediately, that the declaration of the Council means nothing. This only shows how little some people know. The Federation is to be commended, in general, upon its intelligent understanding of the world situation and its willingness for its members to give more than lip-service to the cause of democracy.

THE KAISER AND HITLER

The death of Kaiser Wilhelm twenty or more years ago would have created vastly more excitement than its announcement from the village of Doorn last week. Driven from his throne by the insurrection at home, fanned by the fortunes of the World War, the proud autocrat has been living in self-imposed exile since, an "also ran" in the race of world events.

There is no evidence that the world has softened its attitude to the old Kaiser because there is no expunging from the records the acts he wrote there, but there has come to the world the shocking realization that Germany can produce worse than a Kaiser and has done so and brought more misery to the world than the old monarch was even capable of conceiving. Compared with Hitler, the old Kaiser was an infant in creating world disorder.

So far as The Centre Democrat is concerned, we stand with the Congress and the President of the Unlited States, in asserting and protecting the rights of the United States upon the high seas.

The power shortage that threatens to impede defense operations reminds us of the time, not many years ago, when utility experts "feared" lest there should be a huge surplus of power.
