Lock Haven Girl Assault Victim

Struck on Head by Rock in Hands of Unknown Assailant

Lock Haven police with the aid of several members of the Rockview motor police are searching for the assailant of Miss Dorothy Orner, 26, who was struck twice on the head with a rock by an unknown man about midnight Monday.

Miss Orner, an employe of the Pennsylvania Woven Wire plant on the night shift, said she had left the plant and was walking in the alley near the corner of Bellefonte avenue and First street, when a man came up to her and said: "Are you lonesome?" She warned him to stay away or she would "report him."

He then struck her with a rock and ran away.

Miss Orner was later treated at the Lock Haven Hospital where several sutures were required to close a two-inch gash in back of the left ear.

Police found a rock at the scene of the attack. It was clean, with no pieces of dirt adhering to it, indicating that it had been carried for a time. A cube cigarette, partly smoked, was also picked up as a possible clue.

Miss Orner describes her assailant as being about 23 years of age; had dark curly hair and wore dark sweater and pants.

Lightning Hits Local Church

(Continued from page one)

Mr. Emerick told a reporter last night that he was near a window facing the church when he saw a flash. As he looked up, a "stream" of fire seemed to come down out of the sky. The "stream" seemed to strike the copper-covered cross atop the church and divide into two streams, one branch coming down each side of the steeple to the ground. At the height of the flash, Mr. Emerick said, it seemed as though two pillars of fire extended from the top of the steeple to the ground. Examination of the ground later failed to reveal any trace of where the flashes struck.

Mr. Emerick is becoming somewhat of an old hand at observing lightning from the windows of his home. About six years ago while the family was at dinner, a bolt struck and shattered a large maple tree which stood on the lawn between the Emerick and Stewart homes. The Emericks saw a brilliant flash of light at that time, but didn't see any of the "streams of fire" as described in Tuesday night's stroke.

Handkerchief Is Clue In Attack

Stained Cloth Found Near Scene of Teichert Attack Being Examined

According to reports from State College, a handkerchief found near the scene of the brutal attack upon Mrs. Ernest J. Teichert, just outside her home at State College, last Tuesday night, was similar in some respects to the bloodstained handkerchief found at the Shiloh church

the morning the body of Rachel Taylor was found in front of the Lemont school.

The handkerchief is reliably reported to have had several types of stains upon it, one of them supposedly made by blood. The square of cloth was a cheap affair, such as are on sale on the counters of many stores. The handkerchief found at Shiloh church was of the same general type.

Laboratory experts are conducting exhaustive tests of the handkerchief found last week in the hope that it will lead to the person responsible for the attack.

Mrs. Teichert returned to her home from the Centre County Hos-

the morning the body of Rachel Taylor was found in front of the Lemont school.

It is amazing how easy it is to start an argument with a man who is getting some petty graft, on the side.

State College reports yesterday were to the effect that the attack on Grace Gray, high school student, last May 24, had been "cleared up" to the satisfaction of police. Inquiry revealed that while police are reported to have strong suspicions as to the guilty person, they are seeking further evidence before taking any action.

It is amazing how easy it is to start an argument with a man who is getting some petty graft, on the side.
