# WILL GIVE YOU DANDY LIGHT!"

Get your school child an I.E.S. lamp for reading and study-it's one of the most worthwhile things you could do.

Because it's made to provide plenty of good light, free from glare and shadows. Such light helps prevent eyestrain, speeds up home work and aids in promoting interest in learning.

I.E.S. lamps are low priced-lower than you'd expect for lamps that are so useful, so strongly and carefully built.

Among the 54 specifications to which I.E.S. lamps conform is that the table study lamp provide 35 foot-candles on a reading surface 18 inches from the center of the lamp.
