### THE FLAG OF THE UNITED STATES OF AMERICA—HOW TO RESPECT AND DISPLAY IT

- 1—When flags of states or cities or pennants of societies are flown on the same halyard with the flag of the United States of America, the latter should always be at the peak. When flown from adjacent staffs the flag of the United States should be hoisted first and lowered last.
- 2—When displayed with another flag against a wall from crossed staffs, the flag of the United States should be on the right (the flag's own right), and its staff should be in front of the staff of the other flag.
- 3—When used on a speaker's platform, whether indoors or out, the flag should never be reduced to the role of a mere decoration by being tied into knots or draped over the stand. For this purpose hunting should be used. The flag, if displayed, should be either on a staff or secured to the wall or back curtain behind the speaker with the union to the star's right.
- 4—When flags of two or more nations are displayed together they should be flown from separate staffs of the same height and the flags should be of approximately equal size.
- 5—When the flag is displayed in a manner other than by being flown from a staff, it should be displayed flat, whether indoors or out. When displayed either horizontally or vertically against a wall, the union should be uppermost and to the flag's own right, that is, to the observer's left.
- 6—Whenever a number of flags of states or cities or pennants of societies are to be arranged in a group and displayed from staffs with the flag of the United States the latter should be placed at the center of that group and on a staff slightly higher than any of the others.
- 7—When the flag is displayed in the body of the church, it should be from a staff placed in the position of honor at the congregation's right as they face the clergyman. The service flag, the state flag or other flag should be at the left of the congregation. If in the chancel or on the platform, the flag of the United States should be placed on the clergyman's right as he faces the congregation and the other flags at his left.
- 8—When the flag is displayed from a staff projecting horizontally or at an angle from the window sill, balcony or front of a building, the union of the flag should go to the peak of the staff (unless the flag is to be displayed at half-staff).
- 9—Whenever the flag of the United States is carried in a procession in company with other flags, it should occupy a position in front of the center of the line of flags or on the right of the marching line.

## Wheat Growers to Vote On Quota

(Continued from page one)

wheat parity payments.

With the farmers of Pennsylvania and other states now planning for the greatest production in history of particular commodities needed for war purposes, the continued curtailment of wheat under the wheat allotment and marketing quotas program is especially significant now.

**Cut in Wheat Acreage Important**

In making the announcement setting the date for the wheat referendum, Secretary Wickard said: "American agriculture is embarking on the largest and most comprehensive food production program the world has ever seen. To obtain this production our entire agricultural effort must be expanded in such a way that no waste of human labor, machines and material will occur in needless production of farm goods that already exist in plentiful quantities. Wheat farmers through the Ever-Normal Granary have provided plentiful reserves. Without producing a bushel this year, we have enough on hand to supply all of our anticipated needs both at home and in foreign outlets well into 1943.

"Raising excessive wheat wastes productive effort of farmers, disrupts transportation and clogs storage facilities that are already filled to capacity. We must provide for orderly handling of our wheat reserves and at the same time democratically divide the responsibility for this orderly handling among all the nation's wheat farmers."

The quota program remains essentially the same as that in operation in 1941. Quotas do not apply to farms on which the acreage planted to wheat for harvest is not more than 15 acres nor to farms on which the normal production of the acreage planted to wheat is less than 200 bushels.

Under quotas, farmers who have oversold their acreage allotments are asked to make the same adjustment in their marketings that program cooperators made when they seeded within their allotments. All farmers may market free of penalty normal or actual production from their acreage allotments and farmers whose entire production is below normal may market free of penalty an amount of wheat equal to the normal production of their acreage allotment. Excess wheat, unless stored under bond, is subject to a penalty of 50 per cent of the basic lot rate.

The supply of wheat in 1942-43 is estimated to be 1,428 million bushels on the basis of a July 1, 1942, carry-over of 635 million bushels and a 1942 crop of 793 million bushels, which includes a preliminary estimate for 1942 winter wheat of 631 million bushels. Total average production for spring wheat of 162 million bushels. This is the greatest supply on record, nearly 100 million bushels more than a year ago.

**SCOOPI:** Centre county newspapers, metropolitan newspapers, and at least one press association have been burning the wires and chewing finger-nails for the past week or so because a Centre couponian is supposed to have fallen into from FBI espionage net. We wouldn't know anything about it—and anyhow we wouldn't say anything unless the FBI in person came up and told us the whole story.

**TAILORS:** On previous occasions this corner has pointed out that some day Bellefonte is going to find itself without any first-class tailors—the kind who can build a suit or an overcoat from the ground up. There are no young men learning the trade. As the war progresses more and more men are going to have their present clothing made over, and only a good tailor can do such work successfully.

**AIR WHISTLE:** Council heard with some dismay, Monday night, that a good air whistle for use as an air-raid warning would cost perhaps \$1800. That's a sizeable sum. Seems that among the machinists or inventors in Bellefonte there is at least one man who could devise a noise-maker which could jar Bellefontians out of their sleep for less than \$1800. This is no far-fung noisy city where super-sensational noise-makers are required.

## Gubernatorial Campaign

mittesman, answered Meyers' summons to a conference to see whether they could agree on one man for the nomination. Auditor General F. Clair Ross is generally regarded as a candidate, with Lawrence's backing.

Guffey said he also would propose a candidate and political circles believed Judge Ralph H. Smith, of Pittsburgh, was Guffey's choice.

A Democratic committee of twenty began a canvass of gubernatorial possibilities to determine whether the party should unite behind one candidate in the May Primary.

The committee was instructed to recommend "a course of positive action that will lead to victory" in the November elections.

Directly involved was a controversy over whether the state committee should back one candidate as provided by party rule.
