Altoona Girl To Make Screen Debut

(Continued from page one)

Florence Lafferty, the name Blair was adopted when she began in the entertainment field and is in reference to Blair county, in which she was born.

Miss Blair was an average growing girl in Altoona, attending public school, dancing school and singing in the church choir. She was secretary of the senior class in High School and sang the Alma Mater at commencement. Whenever there was an entertainment, Janet either sang or danced or both. She was known as the town's most talented child.

After high school she was offered a singing job with Hal Kemp's orchestra. Her father offered an alternate choice of a college career. She took the job with Kemp.

Carroll Tompresh, of the NBC Artists' Bureau, who heard Janet sing over the air, met her and was impressed by her wholesome beauty. He arranged a screen test; a contract with Columbia resulted. A starring role in "Three Girls About Town" immediately follows.

Walker Projects Net High Returns

Summary of Vocational Agriculture Program Shows Substantial Profits

A summary of the projects completed by the Walker Township Vocational Agriculture Department for the school year 1941-42 reveals that the boys realized over \$1.95 for every hour that they spent on their projects. Twenty-four boys carried to successful conclusion 27 projects ranging from one acre of potatoes to 5 pigs. In these projects the boys invested \$1,145.35, for feed, seed, fertilizer, etc., and from them they earned \$1,950.70—leaving a net profit of \$805.35. In addition 919 hours of the boys' time was required, for which they charged \$137.84. Thus their labor income amounted to \$953.19.

The average project earned \$72.62 and made a clear profit of \$35.30 for each \$1 invested in projects by the boys they earned \$1.71—which netted them 71 cents on each dollar invested. This amounts to an interest rate of 71 per cent on the money invested in the project.

This year's projects show a striking improvement over last year's work. In the school year 1940-41 an investment of \$1,027.59 yielded a return of \$1,276.30, making a net profit of only \$248.71, or 24 per cent on the investment, while this year's investment returned over 72 per cent profit—a return three times larger than the previous year.

The scope of these projects included 5 acres of corn, raising 4 purebred dairy calves, 3 acres of strawberries, 2.2 acres of potatoes, 229 chickens, 5 purebred sheep, 5 acres of barley, and 27 pigs—almost a farm business.

However, the value of these twenty-seven projects cannot be reckoned in terms of dollars and cents alone. The value reaches far deeper than that for twenty-four boys received practical training of inestimable value. They studied to learn, then learned to do by doing.

It was voted to eliminate refreshments at the club meetings during the present emergency. Mrs. H. C. Stenger, Jr., was introduced as a new member.

The entertainment program consisted of vocal solos by Caroline Katschik, accompanied by Mary E. Sloop.

The following people spoke on different phases of "Designs for Living": Dr. Harriet Harry, State College; "Health," Mrs. Louis Schadt; "Music," Miss Helen Butler; "Home," Theodore Jackson, Phillipsburg; "Civic Conduct," and Rev. Clarence Arnold, "Religion."

Feeders Buying Wheat for Stock

Suggest Buyers Pool Orders to Make Up Carload Lots

Dairy and poultry feeders in many sections of Pennsylvania are taking advantage of the opportunity to buy wheat for feeding purposes from the Commodity Credit Corporation at about the price of corn, according to an announcement by the Centre County Agricultural Conservation Office.

This wheat for feeding is being made available to feeders in order to supply an economical source of feed so producers may do their share in producing Food for Freedom. Also, in the release of this wheat, feeders will make available storage space to take care of the new wheat crop to be harvested in 1942.

A delivery price for wheat has been established for each county in the State. The wheat at this established price will be delivered to any railroad receiving point in a county. This price is based on the price at which the Commodity Credit Corporation is selling at Chicago, plus the cost of loading and the average freight charge from Chicago to the county.

The established delivery price in Centre county to any railroad siding is \$32 per bushel whole or 97c cacking in carload lots of 1500 to 1800 bushels. Feeders can pool their orders in making up carloads to be shipped to convenient points.

All orders must be approved by the Agricultural Conservation Association Office located at the Post Office Building, Bellefonte.
