Modern education has not persuaded youngsters that "early to bed" is good sense.

Nearly every wife can explain to a young man why he should seek to marry a girl with some qualities she has never developed.

ENGINEERS STUDY HARD AT PENN STATE

Students in the School of Engineering at the Pennsylvania State College are taking their work more seriously than ever before.

This was the observation of Dean Harry P. Symmond, who reports that there has been a steady decline in the number of failures, and that more students have achieved citation on the dean's list for high scholarship.

Dean Hammond believes that this is an indication of the realization on the part of students that engineers must play a vital part in the national emergency.

A racket is anything that brings an individual more money than his service or his commodity is worth.

Words that delight the editor's ears: "Here's my money; mark the paid in advance for two years!"
