

OBITUARY

WILLIAM W. A. KERSTETTER

William W. A. Kerstetter, 17, of State College, died at 9 o'clock Wednesday night, April 22, 1942, at the Centre County Hospital, Bellefonte. He was born May 12, 1924 at Snydertown, a son of George Z. and Madeline Hanley Kerstetter. His father survives with two brothers and a sister, Walter L. Elmer C., and Elizabeth A., all at home. He was a member of the Modern Woodmen of America. Funeral services were held Friday afternoon at his home with Rev. A. S. Asendorf officiating. Interment was made in Pine Hall cemetery.

ANNA M. WEBER

Anna M. Weber, 80, life-long resident of Boalsburg, died at her home at 7:40 o'clock Wednesday evening, April 22, 1942, of complications due to advanced age. She died in the same home in which she was born and lived all her life. Miss Weber was born April 11, 1862, a daughter of Jacob and Catherine Weber. She was the last of her family, her brother, Samuel E., having preceded her in death in 1931. She was a member of a life-long member of the Boalsburg Reformed church. Funeral services were held Saturday afternoon in the Boalsburg Reformed church with Rev. T. G. Jones officiating. Interment was made in Boalsburg.

SIMON O. BLUBAUGH

Simon Oscar Blubaugh, died at his home at Shilloh at 9:30 o'clock Friday night, April 24, 1942, after a lingering illness. Mr. Blubaugh was born in Maryland on June 23, 1867, making his age at time of death 74 years, 11 months and 1 day. On January 4, 1917 he was united in marriage with Catherine Miller, who survives with a daughter, Mrs. Miles Hubler, of Quarryville, and two brothers, James and Charles, residing in Kansas. Mr. Blubaugh was a member of the Grace Lutheran church, State College. Funeral services were held at the Koch Funeral Home, State College, on Monday afternoon, with the Rev. J. F. Harkins officiating. Interment was made in the Shiloh cemetery.

LESTER CLARENCE McCURE

Lester Clarence McCure, 69, of McElhattan, died at the Lock Haven Hospital Saturday afternoon after an illness of two weeks. His death, shortly after his admittance, was due to a heart attack. Born in McElhattan, he had lived in that vicinity all his life. He had been employed at the paper mill and also by the state highway department, but was forced to retire six years ago because of ill health. Surviving are his wife, two sons and a daughter: Nelson, of Camp Sutton, N. C.; Paul and Mrs. James A. Barrett, Jr., of Howard; four brothers, Donald and K. C. McCure, both of McElhattan; Herman B., of Johnstown, and William W., of Washington, D. C. Funeral services were held Tuesday at 2 p. m. in charge of the Rev. Donald H. Miller. Interment was made in the McElhattan cemetery.

DAVID HENRY MOYER

David Henry Moyer, resident of Gilltown, near Pleasant Gap, was found dead in the kitchen of his home there at noon on Saturday, April 25, 1942. Discovery was made by William Duck, who for some time had shared the home with Mr. Moyer. Centre County Coroner Charles Sheekler, of Milesburg, who investigated the matter, said that shortly before noon a neighbor had spoken to Mr. Moyer and had given him some food for his dinner. A short time later when Mr. Duck returned home from work he found Mr. Moyer slumped over the kitchen table. Coroner Sheekler said the man apparently died of a heart attack. The deceased was a son of John and Amelia Gill Moyer and was born in Spring township on May 19, 1862, making his age at time of death 79 years, 11 months and 6 days. He was not married and he was the last member of his immediate family. Funeral services were held Monday afternoon at the Goodhart Funeral Home in Centre Hall, and interment was made in the Zion cemetery. Mr. Moyer was a laborer by occupation.

MRS. GEORGE ROGERS

Mrs. Edna Elizabeth Rogers, 49, wife of George Rogers of near Jacksonsville, died early Thursday morning, April 23, 1942, at the Lock Haven Hospital of complications following an illness of six years. Mrs. Rogers was born in Marion township, Centre county, and had resided in the vicinity all her life. Surviving, in addition to her husband, include eight sons and two daughters: Raymond and Irvin, of Howard, R. D.; Gerald and Dean, Bellefonte, R. D.; Lee, Baltimore, Md.; Mrs. Cecil Herr, Cleveland, Ohio, and Lloyd, Paul, Harold and Ethel, all at home. Three brothers, country sisters, Clarence Weight, Montana; Floyd Weight, Nevada, and George Weight, Bellefonte, R. D., and Miss Elvora Weight and Mrs. Fern Dunkle, Howard. Seven grandchildren, and the deceased's mother, Mrs. Catherine Weight, also survive. Mrs. Rogers was a member of the Women's Guild, Marion Grange and the Emmanuel Evangelical and Reformed church, Jacksonsville. Funeral services were held Monday at 1:30 o'clock at the home and at 2:30 at the church, with the Rev. John R. Gulick in charge. Burial was made in the Jacksonsville cemetery.

WAR THEORY

We had a talk about war with a six-year-old the other day, and got a refreshing new slant on things. In speaking of bombing, he suggested that the people of bombed countries write "a nice letter" to the bombing nations, asking them not to do it any more. When we expressed doubt that such action would work, he suggested sending a nice present. We pointed out that such acts have been tried in the past, but didn't bring results. Then he got tough. "How many Germans and Japs are there?" he asked. "Two thousand," we replied, knowing that such figure was astronomical enough for him. "Well, what we ought to do is to make two thousand guns. Then if the Germans and Japs would stand in a row . . ."

'I'M SORRY'

Two defendants appearing in court here, Monday, both of whom are seemingly of more than average intelligence and both of whom once enjoyed the respect and confidence of their fellowmen, when asked by the Court if they had anything to say before sentence was passed, declared they were sorry for their misdeeds, and that they have been in great mental anguish as a result of their acts. Those statements no doubt were true, but we suspect that crime always will flourish until people learn to think beforehand of the sorrow and mental anguish which inevitably will be theirs if they overstep the bounds of the law. Even if they aren't caught, they have themselves to live with and must always be on the alert to protect their secret crimes.

Queer Custom of The Japanese

(Continued from page one)

In one of these pens in broad daylight. At a way-station, a prosperous looking and portly Jap, apparently a business man, came into her pen. Before the train started, he began to undress although it was the middle of the day. He carefully took off his obi (gash), looked over every inch of it, folded it neatly, and placed it on the seat beside him. Then he took off every article of his clothing and gave each one the same treatment.

Finally, completely nude, he began to look over every inch of his flabby, fat skin. It was plain to the distinguished woman by this time that he was not merely showing off his yellow body, but was also looking for some fleas. But a million fleas would not have disturbed this Jap a fraction as much as his display of infantile nudism upset his white traveling companion.

Perhaps the psychoanalysts would say such instances, which would be common even where the Japs have tried to police places to give better impression to tourists, indicate that the Japs have not generally advanced out of the three-year-old stage. But it is obvious that it would be no shame to them to have their pants beaten off them. They are more likely to need to have their pants put back on.—The American Weekly.

Volcanoes in Iceland

Altogether there are 107 volcanoes in Iceland, with thousands of craters known to exist.

Fooled World

Ptolemy Claudius, 200 B. C., ancient astronomer, fooled the world into believing that this earth is a fixed body in the very center of the universe and that the heavens revolve around it once every 24 hours.

Zoo Accepts Skunk

At last Albuquerque, N. M., school children can look at a skunk in safety. The city has installed a deodorized polecat in the zoo.

Bed 15 Feet Long

King Og of Bashan had an iron bed 15 feet long and 7 feet wide. King Ahasuerus had beds of gold and silver.

Hitler Anxious Over Home Affairs

(Continued from page one)

He promised his people despite the acknowledged difficulties. Although he promised ultimate victory, the man who once declared that the Russian "enemy already is broken and will never again rise" set no date for triumph and indicated to the Germans that they might fight through another winter.

Surprised by Winter

Explaining why Germany's armies were forced back, Hitler said the past winter came suddenly and was the most severe in 140 years—since Napoleon's retreat from Moscow. "The problem which in those days caused us the greatest trouble," he said, "was the bringing up of supplies because neither the German soldier nor the German tank nor, unfortunately, our German railway engines were prepared for such cold which had caught us surprisingly. . . . I have taken measures necessary for preventing a repetition. In the coming winter . . . German railways will be able to meet their tasks better than in the last winter. The army in the east will be better equipped." Otherwise, the speech ran the same gamut as Hitler's in the past—a reiteration of "endless German efforts for maintenance of peace," predictions of dire catastrophe for the British empire and imprecations against the "Jewish international parasites."

Same Old Story

It contained the same oratorical devices: Air and naval threats: "If in England the idea should be carried out to continue the air war against the civilian population with new means, then I want to state before the world . . . I shall retaliate from now on blow for blow."

"What our submarines actually can do will be proved increasingly month after month . . . there numbers is growing according to fixed rhythm from month to month and . . . today they have surpassed by far the highest number of submarines during the World War."

"The hint of a peace overture. . . . I am not quite sure whether all Englishmen today still regard it as wise that their government rejected the numerous possibilities for understanding which I have put forward since 1933 . . ."

Doesn't Like MacArthur

Derision: "I have read so much of the terrible threats on the part of our enemies . . . the great generals of England and the United States cannot frighten me. In my opinion, generals like MacArthur have no encouraging, but discouraging, capabilities." "That General MacArthur managed to escape from the Philippines just in time . . . was an encouraging factor, just as encouraging as when 20 Englishmen with blackened faces, on rubber soles and in a rubber boat landed at some point of the coast occupied by a German patrol came into sight."

MANY VOLUMES ON "FISHING" AT LIBRARY

"Among the Pennsylvania Dutch in the Allegheny mountains, I have found a curious tradition that Ascension Day is the luckiest in the year for fishing. On that morning the district school is likely to be thinly attended, and you must be on the stream very early if you do not wish to find wet footprints on the stones ahead of you." (From Henry Van Dyke's "Fisherman's Luck.") Even if you have devoted a lifetime to angling, and are in danger of becoming a professional fisherman, you may still enjoy choice bits from the experiences of brother anglers in the following books at the Centre county library.

- Bergman—"Just Fishing."
 - Farrington—"Atlantic Game Fishing."
 - Sturgis—"Fly-tying."
 - Rodman—"Handbook of Salt Water Fishing."
 - Camp—"All seasons Afield with Rod and Gun."
 - Wulff—"Handbook of Fresh Water Fishing."
 - Bergman—"Trout."
 - Miller—"Outdoorman's Handbook."
 - Goods—"American Fishes."
- An exhibit of pictures of Zane Grey's country and an exhibit of books on hobbies are on display at the Historical Library. These exhibits and the Historical Museum will be open to the public on Saturday afternoon from 2-4 p. m.

Insurance Settlement

An insurance settlement of \$3,280, representing the amount of the fire damage to the Berwick High School stage, but not including any fixtures, scenery, drapes or curtains, was accepted last week by the Berwick School Board. No price estimate is available on the asbestos curtain on which delivery cannot be made without a priority rating.

Sugar Beets

Ten years of experimentation are now beginning to bear fruit in the form of machines designed to plant, thin, block, and harvest sugar beets, according to Prof. H. B. Walker of the University of California Agriculture.

Start Now to Fight Common Clothes Moth

One of the best year-round offensives against the clothes moth is good housekeeping, reminds Miss Helen S. Butler, home economics extension representative of Centre county. Moths like to eat hair, feathers, fur, and wool, so never leave any of these lying carelessly around the house. Ordinarily, moths won't bother clothes that are worn frequently but they are likely to set up housekeeping in a wool coat or dress that hangs in the back of a dark closet for weeks at a time. To guard against any possible moth infestation, it is an excellent idea to sun and brush garments occasionally.

For safety and convenience, most homemakers like to clear closets of winter clothing as soon as possible. They may be cleaned and stored safely at home. Half the battle is won if you make sure there are no moths, moth larvae, or moth eggs on the clothing before you store it. Moths fly away from clothing the minute they get out in the light, but the tiny, soft, white moth eggs can go unde-

FARM AND HOME

(Continued from page one)

Whole Grain Products Rich in Food Values

One way to keep your family up on the gold standard diet is to serve whole grain or enriched breads and cereals every day. Says Miss Helen S. Butler, home economics extension representative of Centre county. Breads and cereals are one of the most important and cheapest forms of energy-giving foods that we need every day. They also are one of the best sources of vitamins B and G and minerals, especially iron. It is advisable to serve whole grain bread and cereals at least half the time or all the time if the money to spend for fruits and vegetables is limited.

Whole grain products contain the vitamins and minerals in their natural form. The outer coatings and germ of the wheat grain supply that essential nerve and digestive vitamin B and iron for building blood. Homemakers who have been using whole grain products have developed an excellent habit and should continue to follow it. However, those who do not have the whole grain habit will do well to change over to at least the enriched white bread. Enriched breads, cereals, or flours look and taste the same as the old-fashioned styles of the same products, but the enriched products contain vitamin B and iron. These essential food elements have been added to the regular milled white flour to add some of the food value removed in milling. Enriched bread and flour are available at many stores today.

Repair Equipment Now to Get Best Service

One good way to show your patriotism is to keep your household equipment and furnishings in repair and give them the best care possible, points out Miss Helen S. Butler, home economics extension representative of Centre county. Keeping all household equipment in repair will assure better service from it.

Because of the need for vital materials, the manufacture of many types of home equipment has been halted for an indefinite time. This means that we must keep what we already have in excellent working condition for efficiency. Now is the time to check on any needed repair parts. Repair parts such as metal and rubber, and paint and oil are available now. As time goes on, they will be harder to get. Wise homemakers will take careful inventory of their probable needs for repair parts, washing machines, or any other labor saving pieces of equipment.

After you have repaired and replaced your needs, see that your equipment is carefully stored. If you do not have adequate and convenient storage space, it would be a wise investment to provide for it. Storage space should be large enough so that you can keep all similar equipment together in a convenient place.

Grow Small Fruits in Garden For The Family

Fruit has come to play a very important part in the nutrition of the human individual. While a large number of families must, of necessity, purchase all the fruit they use, in many cases part of the fruit needs can be supplied from the home garden. Fortunately, points out County Agent E. C. Brier, no all types of fruit which are recommended for the backyard garden or small areas. Therefore it is advisable to select those fruits which lend themselves to intensive cultivation in either family gardens or small plots which can be used for the purpose. Fruits which can be grown to the best advantage under these conditions are those which do not demand the use of expensive equipment and will produce a crop of fruit in the shortest possible time.

How will raising the mower aid the national effort?

"In several ways," answers County Agent R. C. Blaney. First, grass seed will be saved. Each spring there are tons and tons of grass seed used on lawns that are thin and poor, in an effort to thicken the turf. The grass seeds which are used in lawn mixtures are needed in agriculture and there is a shortage. Higher cutting will develop deeper roots and a thicker turf which will need less reseeded. Consequently, less fertilizer will be required.

Third, steel will be saved. High cutting makes the mower push more easily. The mower will last longer because it will not be cutting twigs, stone, glass, and other debris and consequently it will need sharpening less often.

Heating System May Need Care

(Continued from page one)

When the furnace is in a damp basement, it may be advisable to store the pipe in the attic or other dry place. Wrapping with newspaper or painting both inside and outside of pipe with asphaltum also will protect from corrosion, according to the engineers. If it is necessary to put the pipe back on the furnace after cleaning doors, dampers, and openings in the furnace and pipe should be left wide open to assure free circulation. Pipe of small heating stoves and the stoves themselves should receive similar care.

Cracked Dish

An easy way to prolong the life of a cracked dish is to boil the dish in enough sweet milk to cover it; the cracks will glue together and become invisible. The dish will stand almost as much ordinary usage as before.

BOALSBURG

Among the relatives and friends who attended the funeral of Frank Ream on Saturday were: Mr. and Mrs. George Ream and family of Schuylkill Haven; Charles Ream of Doylestown; Vilas Ream and family of State College; Private Dean Peters, Camp Croft, South Carolina; Mr. and Mrs. Paul Ream and family, State College R. D.; Mr. and Mrs. Mac Colbert, Mr. and Mrs. John H. Ream, Harrisburg; Mr. and Mrs. Irvin Buck, Tamaqua; Mr. and Mrs. Elmer Rossmann, Bellefonte; Mrs. J. C. Orndorf and son Maurice, Lock Haven; Mrs. Charles Mark and two children of Loganton; John Rishel, Centre Hall; William Rishel, Spring Mills; Mr. and Mrs. Blain Bitner and Mr. and Mrs. Clayton Stover, Spring Mills; Mrs. Savilla Stitzer, Rebersburg; Mrs. Lena Spayd and Paul Spayd, Centre Hall, R. D. and Mr. and Mrs. Edward Feltenberger of Spring Mills.

Choose Simple Style For Making First Coat

Making a good looking coat at home, a coat with the air of the professional, is no more difficult than many other sewing jobs that women tackle, according to Miss Helen S. Butler, home economics extension representative, Centre county.

A high-grade pattern is a good investment and a small item in proportion to the total cost of materials when making a coat. It is advisable to buy a pattern the same size that you would for a dress, since patterns are made with all the allowance necessary for the coat to be worn over a dress. If you are making your first coat, choose a style that is simple and comparatively easy. When planning to make a coat, keep the style and material in mind because each influences the choice of the other. The thicker, rougher wools usually look best in straight hanging styles, while the softer, lighter cloths work up well in the more fitted types.

Raise Lawn Mower to Save Needed Material

Homeowners with lawns have an opportunity to make a significant contribution in the present emergency. This contribution can be made simply by raising the lawn mower as high as it will go and leaving it there for the rest of the season. A wrench, a few minutes, and the job is done. Simply loosen the nuts that hold the roller, let the roller drop as far as it will go, tighten the nuts, and the contribution is made.

How will raising the mower aid the national effort?

"In several ways," answers County Agent R. C. Blaney. First, grass seed will be saved. Each spring there are tons and tons of grass seed used on lawns that are thin and poor, in an effort to thicken the turf. The grass seeds which are used in lawn mixtures are needed in agriculture and there is a shortage. Higher cutting will develop deeper roots and a thicker turf which will need less reseeded. Consequently, less fertilizer will be required.

Third, steel will be saved

High cutting makes the mower push more easily. The mower will last longer because it will not be cutting twigs, stone, glass, and other debris and consequently it will need sharpening less often.

YOUR HEALTH

(Continued from page one)

The moon is made of green cheese, 'tis said. So are strong muscles, firm bones and better health.

Cheese is an important food, particularly at this time. Cheese is an almost universal food.

Its popularity as a table delicacy is unquestioned. Sheep's milk in Bohemia, reindeer milk in Sweden and goat's milk in other countries are made into cheese. Cheese is not a by-product, but a concentration of almost all of the food values contained in milk.

Most of these values carry through to cheese. Different from milk in composition and consistency, yet cheese supplies much of the heat and energy, proteins and vitamins to be found in milk.

Cheese has lost most of the sugar, ash and albumen contained in milk, but retains the fat and the protein nutrients. There are three general classifications of cheese—soft, semi-hard and hard.

Fewer nutritive studies have been made of cheese than of some other foods. Each succeeding investigation adds much to the understanding of the nutrition to be found in cheese. Cheese supplies protein needed for energy and contains valuable vitamins and minerals.

Cheese is a rich, health-promoting food.

"Walter, bring me some of that Danish Gaisle or Swedish Mysost." "Sorry, we're all out of those cheeses—how about Pennsylvania sharp or Philadelphia cream cheese—very tasty."

DO YOU KNOW

All persons in military service will be provided by the War Department with spectacles when required and all lenses and frames damaged or lost through performance of military duty will be replaced. These glasses will conform to specifications issued by the Surgeon General.

'Boxing Compass'

"Boxing the compass" means to enumerate the various points, half points and quarter points of the mariner's compass in their proper sequence.

Good Plan

Trinidad puts its destitute families on little plots of ground and teaches them to grow their next meal, instead of putting them on relief.
