YOU GUESSED WRONG! HE'S IN THE INFANTRY-In modern warfare infantrymen fight with other arms than the traditional rifle. This soldier operates a 37-millimeter gun and among his comrades on foct are mechanics, cyclists, telephone operators, ski troopers, "walkie-taikie" radio men, parachute troops and airborne infantry. Off to each flank of infantry troops, mounted in a speeding armored car or crouched behind his well-concealed weapon at a road junction is the 37-millimeter gunner. Primarily, in modern warfare, he has but one target: enemy tanks and armored vehicles. His first shot must be a direct hit for armored vehicles travel at a high rate of speed and a miss means precious seconds lost.

Every homemaker these days feels she has a double job. She wants to take better care of her home and family than ever before-and she wants to do her bit toward Victory.

It's a lucky woman who has an electric range, for there's no greater ally in saving more time for more jobs.

For instance, on Red Cross days a whole meal can be cooking in the electric range oven while the homemaker is away-or a hearty, nourishing stew or soup can simmer quietly in the deep well cooker while she attends to her patriotic duties. The homemaker can be gone all afternoon-all day, if she likes-and yet a tasty, well-balanced meal will be all ready to dish up-right on the dot. Automatic time and temperature control makes electric cooking the Time-Saving way to cook.

Take full advantage of the many time and laborsaving features of your electric range.
