Motorists who have not already purchased stamps may until August 1st secure them from their local postoffice. After August 1st they will be required to purchase them from collectors. This warning should not be neglected as it is the intention of the internal revenue service to vigorously prosecute any and all violations. Secure your stamp at once, if you have not already done so, and save yourself future trouble and expense. It doesn't occur to Marshal Pettain that France wasn't beaten; the nation just quit. BE SURE THAT MILK TANK WATER IS COOL

Guesswork has no place in cooling milk. County Agent R. C. Blaney suggests to all milk producers that they check with a reliable thermometer the water used in the milk cooling tank. Milk must be cooled to below 50 degrees Fahrenheit.

On July 1 the Office of Defense Transportation issued an order that milk plants must reduce their driving at least 25 per cent below that done in 1941. Improperly cooled milk will not meet the requirements of the consumer who is forced to hold milk longer at home because of curtailed delivery service.
