Last Wednesday afternoon Will Pettehoff, an 18-year-old lad, was bitten on the forefinger of his right hand by a rattlesnake. Young Pettehoff was engaged in loading a wagon with slab wood at a saw mill about two miles east of Centre Hall, and had reached down to throw a piece from the pile on the wagon when it is supposed he disturbed the snake which sunk its fangs into his finger. His finger was bound to prevent the poison from entering his system and the usual antiseptic whiskey, was poured into him. The hand swelled up and at last accounts Pettehoff will recover completely from the bite. When the snake struck, Pettehoff jerked back with the snake hanging to his finger, but it soon disengaged itself and escaped into a pile of wood.

Since Fred Dunham has shown enterprise in bringing the Sunday papers from Lock Haven by pony express the community is beginning to realize how convenient it would be to have a Sunday mail. An application has been made to the Postoffice Department for such accommodations. The idea is to have the mail carried from Bellefonte to Lock Haven by pony express, leaving here in the morning and returning in the evening. That would be some accommodation, but why not go a little further? Bellefonte should have a Sunday train and it is only a matter of a little time until we get it. If a Sunday mail is of any benefit we might just as well have it come by train in good time. Of course there would be considerable opposition from the pretenders but that wouldn't matter.

"So far, America's greatest act as a nation has been the liberation of the slaves," says Dr. E. Stanley Jones, missionary to India. Now the great act will be to give the descendants of those freed slaves equality of opportunity. We must do it, not through patronage or condescension, but through simple justice—an already too long delayed justice. The Negroes have more than earned the right to that justice. Although suppressed and thwarted at every turn, they have made more progress in these eighty years since slavery than any race in human history in that length of time. We should be proud of them and open the gates of opportunity to them.

Medical missionaries and health officials in the Belgian Congo, Africa, where it is customary for the white man to fight malaria by doses of quinine every day, are greatly concerned over the lack of that and other drugs because of the war. According to Dr. Arthur L. Piper, for twenty-five years in charge of the Methodist Hospital at Kapanza, the small amount of quinine raised in the Congo will not be nearly sufficient for everyday needs. "Scientists in Germany developed atabrine several years ago, and this can be manufactured and resold as quinine, but there is none of it to be bought in the Congo," he says. "Substitutes notwithstanding, there are going to be a lot of deaths all through the malarial countries due to the grabbing of Java (principal source of quinine) by the Japanese."
