Another was a suggestion by con of a disabled veteran of World Councilman Leslie Thomas that borough taxes be collected on a quar-

> The engineering company in a letter to Council estimated that a plant with a capacity of 20 tons a day would be needed to dispose of Bellefonte's garbage. Such a plant would be able to dispose of about 7 tons in an eight-hour day. No estimate of the cost of such a plant was given. since it was explained that a number of factors, including the nature and kind of garbage, enter into construction costs.

Councilman Thomas, in offering his suggestion for a quarterly collection of taxes, declared that it might be more convenient for taxpayers and might result in the collection of a greater percentage of taxes. He added that since water and sewer taxes have been collected on a quarterly basis, payments are much more prompt and regular than
