Japanese Americans From Centers Working on Farms

About 1,200 workers from the WRA relocation centers, all of Japanese ancestry, are at transient labor camps and many more have left the centers to take seasonal and yearround employment on farms. These people were evacuated from the Pacific coast and quartered for a time in relocation centers. Now they are helping in the production of food needed by our soldiers and civilian population, WRA officials report.

More than 5,000 workers of Japat the relocation centers in six west- ployment program has been moving housed by individual farmers who G. Clifford Reed, attorney, to Rob- the War Relocation Authority. They qualified individuals by the War Re-
