FARM CALENDAR

Timely Reminders From the Pennsylvania State College School of Agriculture

Sowing Grain in Dust—The dry weather has hampered germination of winter grain sown this fall. Without rain in time much of the grain will not come up soon enough to make sufficient growth for safe winter survival, extension agronomists of the Pennsylvania State College fear. Rye is probably the only grain safe for late sowing.

Produce Clean Eggs—It is easier to produce clean eggs than to clean dirty ones. Poultry specialists of the Pennsylvania State College suggest clean 2-inch boards in front of nests and feeders, screened droppings boards, elimination of wet areas around drinking fountains, and shavings for nesting material.

Obtain Good Seed—Because of widespread presence of ring-rot in many potato crops in Pennsylvania, growers are urged by plant pathologists of the Pennsylvania State College to sell their crops, disinfect the premises, and obtain certified seed or seed produced from certified stock this year to use in the 1944 planting.

Select Trees to Cut—Before the leaves fall, woodland owners in a few hours can mark the weak, sickly, and dead trees, which should be cut during the winter. Extension foresters of the Pennsylvania State College suggest "blazing" the trees all on one side.

Let Pastures Grow—Pastures at this time of year should not be grazed too short. Grasses and legumes need some time to store up reserves during the fall so that early and full production may be obtained next year, remind Penn State agronomists.

Mr. and Mrs. Robert Hippie, James Hippie of Niagara Falls, and Miss Marie Hippie of Mill Hill, spent the weekend with their parents, Mr. and Mrs. Frank Hippie. All the women are very busy canning but very little jellies or jam has been made on account of the scarcity of sugar.
