PARADERS:
We're sorry the mean old judges for the Halloween parade here Friday night didn't give prizes to the two prominent south ward young ladies, Helen and Jerry, who still think no one knew who they were.

Mixing Batter

Lumps of flour in mixing batter can be prevented by adding the salt to the flour before wetting. By pouring flour into the liquid, instead of liquid into the flour, and beating it with a fork, lumps will not form.

Cream of Tartar Substitute

When mixing cake that calls for cream of tartar, a good substitute is buttermilk. If the buttermilk is not sour enough, add a little vinegar.

2 There's a clue here which shows whether this young lady is (A) playing peekaboo, (B) just waking up, (C) suffering from eyestrain.

3 Here we have (A) a raindrop magnified 150 times, (B) method of making reading or studying easier, (C) glass baking dish.

4 This is (A) a mixing bowl, (B) part of new all-glass automobile headlamp, (C) device for removing glare from reading lamps, (D) eye cup.

Check your score with these right answers!

1 (C) It's a cake of soap! Dust and dirt build up on bulbs and reflectors almost before you know it! Soap and water can often double the light you get from the same current.

2 (C) The clue, if you look closely, is the thimble on her finger. She's suffering from eyestrain because she's been doing her mending and sewing in poor light.

3 (B) An eyeglass lens. Symbolic of the important part eyes must play in winning the war. If you're using your eyes longer and harder these days, have them examined.

4 (C) An IES Better Sight Lamp Reflector—the glass or plastic bowl which has revolutionized lighting in millions of homes by providing abundant light without annoying glare.

MORAL: DON'T BE A LIGHTWASTER!
Eyesight and electricity are vital to the war effort. Conserve both! When you read, work or study have enough light to guard against eyestrain—but don't waste it! When you need bulbs, buy carefully. Get the right sizes! They'll help you avoid being a lightwaster.
