- 2 When you defrost, clean interior with solution of warm water and baking soda (teaspoon of soda to three quarts of water).
- 3 Clean exterior with warm soapy water, no scouring powder. Wax exterior occasionally to preserve non-porcelain finish.
- 4 Your refrigerator door should fit properly. Test by closing on a piece of paper. If paper comes out with little resistance, the door does not quite fit correctly. Consult a service man.
- 5 Gasket on i .: le of door should be touched as little as possible since water, grease and dirt shorten rubber life.
- 6 Clean dust and dirt from condenser frequently, to "let the heat get out" readily.
- 7 Be sure there is space at the back of refrigerator and on either side, to allow for proper circulation of air.
- 8 Open mechanism should be oiled and cleaned according to manufacturer's directions.
- 9 Call an authorized service man when your refrigerator is not operating properly.
