## PROBLEM:

The Bellefonte school board had a problem on its hands, Monday night. The senior class is having a dance Friday night, and the board thought it might be wise to open the school cafeteria so the dancers could obtain refreshments during intermission. It was interesting to hear the comments of board members. Some thought if the night is cold the dancers would appreciate a nearby place to get refreshments. Others claimed the local restaurants have all the business they can handle anyhow and wouldn't care for the dance crowd. We thought Dr. Adams came closest to the kernel of the matter when he asked: "If we'd open the cafeteria, would they go there?" It's our bet that the guys and gals, all logged out in their very finest, will want to be seen in what night places this area affords. They'll have on new gowns, maybe a corsage, and they'll be looking their best. Even a trip uptown to a hot dog stand would be in the nature of an outing. Anyhow the board was smart. The school directors left the decision up to a vote of the senior class.

## LETTER:

Gunnors Mate John M. Fleming, son of former Judge and Mrs. M. Ward Fleming of Bellefonte, who is on the briny paddle aboard one of Uncle Sam's warships, writes that he has a souvenir for us which he expects to mail as soon as he can find a box. Meanwhile we'll be on our chair's edge waiting for the thing to get here!

## DAY'S THOUGHT:

The war isn't won and the government is again about to round up the loose dollars in your pocket before you succumb to the urge to go out and buy something. The Fourth War Loan will begin January 18 and will continue through February 15. Centre county has done very well in previous drives, but we haven't scraped the bottom of the barrel of spare cash by a long shot. Let's really strain ourselves a little this time!

"What does the authority intend doing with this money? If any money has been spent improperly, steps should be taken to recover these sums or to surcharge the individuals responsible.

"We are paying interest on money that is lying idle in the Philadelphia bank and which is now drawing interest in return. This is darn poor business on the part of the authority," the Harrisburg engineer, and the Philadelphia bank.

"I believe that the solution to this problem is more important than checking on meters for pennies and nickles or the tagging of cars that have over-parked for a few minutes.

"The Water Authority, gentlemen, is a \$65,000 item. This isn't meter coins."

"I have, since becoming burgess, heard very little discussion at Council meetings of the problems which are now confronting the Water Authority, and I know that members of this Council have very little information on the subject. The lack of information is obvious because there appears on the State College Borough Council minutes a motion recently passed requesting the authority's permission to have their minutes read before Council."

# FARMERS GET DRAFT CREDIT FOR CUTTING PULPWOOD

OFFICE FOR EMERGENCY MANAGEMENT  
WAR MANPOWER COMMISSION  
WASHINGTON, D. C.  
December 1, 1943

TO THE FARMERS OF AMERICA:  
It is our purpose that every worker be used every available day and hour on some war-useful job. Traditionally, farm workers have made themselves available in the off-season for pulpwood cutting, lumbering, sawmill operations and other activities.

We hope that they will be available this year and that they will regard off-season work in essential activities as a wartime obligation. In order that they may transfer to war-useful work with a minimum of personal inconvenience we have taken three steps to simplify our wartime controls over manpower. These three points of simplified procedure should be known to and understood by every farm worker in America.

1. In considering agricultural workers for deferment, war unit credit for the production of essential crops will be given for work in wood products production. Up to one-fourth of the total war units necessary may be for work in logging, lumbering, sawmill operations, and pulpwood cutting. Selective Service Local Board Memorandum No. 164 covers this point.

2. Agricultural workers will be granted permission by their draft boards to engage in up to four months off-season work in other war-useful occupations. So long as the workers are available for the agricultural season, such off-season nonagricultural work will not affect their draft status. Selective Service Local Board Memorandum No. 115-D covers this point.

3. New United States Employment Service instructions provide that farm workers may engage in such off-season activity without obtaining a release from the Employment Service office. If they continue in such employment for more than six weeks, the obligation to obtain necessary approval from the Employment Service rests with the employer. War Manpower Commission Field Instruction No. 89 covers this point.

In some localities other activities and occupations may take a higher priority. The local office of the U. S. Employment Service will know where off-season farm workers are most urgently needed. These measures were taken primarily to aid the pulpwood and lumbering industries.
