

UNIONVILLE

The Young Women's Sunday school class of the Methodist church will meet next Tuesday evening, June 27, at the home of Miss Nell Williams.

Mr. and Mrs. Melville Peters and daughter Darlene, of Buffalo, N. Y., spent the past weekend at the home of his parents, Mr. and Mrs. Pierce Peters, prior to his leaving for the U. S. Army. Melville left on Wednesday of this week, leaving Buffalo for Camp Upton, Long Island, N. Y. The daughter Darlene, will stay with her grandparents for the time being.

Mr. and Mrs. Pierce Peters and daughter Kathleen, and Mr. and Mrs. Melville Peters and daughter Darlene, accompanied by Mrs. Belle Bruss, motored to Phillipsburg last Sunday where they visited with the latter's sister, Mrs. Annie Meese.

Paul Jones, son of Harry F. Jones of this place, left recently for Tyronne, where he has secured employment and will stay with his sister, Mrs. John King.

Miss Ruth Behers of Bellefonte, spent some time last weekend with her friend, Miss Florence Finch.

The regular monthly business meeting and social of the Woman's Society of Christian Service of the Methodist church will be held on Wednesday evening, July 5th, at the home of Mrs. William Lucas. Full particulars next week.

We have been advised there will be no Arista Lucas reunion this year. This gathering has previously been held on or about July 4th, at the Bush Hollow church, and relatives and friends deemed it best to discontinue with this feature this year but hope conditions will be better in another year.

Miss Charlotte Stere and Mrs. Helen Snock left Tuesday morning for Philadelphia, where they are visiting this week with the latter's sister and husband, Mr. and Mrs. Culp.

Civilian Defense persons are busy this week gathering in the information for military ballots. The final military ballot day will be held in the Community House on Friday, July 7th, when the Judge and Inspectors of Election will be on hand to gather in all who have not already been taken care of.

SCOTIA

(By H. M. Williams) We visited a couple of our former Scotia friends last week who are on the sick list and found them improved in health.

Mr. and Mrs. Jack Lewis and two sons have rented the Carl Fisher house and intend to make their home there while in this vicinity. Jack is superintendent for the McCree Construction Company who have the job at Scotia installing the new plant. We always welcome new friends in our community. We have met the Lewis family and find them very fine people. Of course we come in contact with Jack about every day on the job and he is a jolly good fellow.

We have been asked quite a few times this spring if we are going to hold a Scotia picnic this year. We will say no at this time, for as we see it things will not be any better this summer than it was last summer as far as the gas situation is concerned. And if at any time we see that things have improved enough that will permit us to hold a picnic, we will let you former residents know in plenty of time through the county papers as well as some others in nearby towns and cities.

The first quarterly conference of the Half Moon charge was held last Sunday at Grays church.

Mr. and Mrs. Henry Rudy are the proud parents of a second son born to them last Friday evening. We stated some time ago that the Rudy family were moving to the Stevenson house at Waddle, but we have learned that they have moved to the Hartsock farm, the former Jacob Behrer farm.

Aunt Dora Ghaner hasn't been very well the past few days, but some days she seems to be pretty good and other days not so good, but she is most always able to be around part of the time.

HOLTS HOLLOW

Mrs. Ed Heaton's house was struck by lightning on Sunday night and broke a large mirror and did considerable damage to their telephone.

Mrs. Fred Watson and children spent a week with relatives in Ohio. They were accompanied home by Jean Tueche, a sister of Mrs. Watson, who is visiting friends at this place.

Dr. and Mrs. Al Franco and daughter are visiting relatives in New York.

Mr. and Mrs. Joe Butler, Mrs. Roy Leathers, Mrs. Emma Watson, Mrs. Orvis Watson and daughter, Mr. and Mrs. Harry Lucas and family spent Thursday evening at the J. F. McCartney home at Mt. Eagle in honor of Mrs. McCartney's birthday anniversary. Mrs. McCartney received many beautiful gifts, and delicious refreshments were served.

Mr. and Mrs. Paul Emerick, Mr. and Mrs. Claude Heaton, of Bellefonte, Mrs. Emma Watson and Mrs. Orvis Watson called on Mrs. Ed Heaton on Sunday.

Grace Camel of Tennessee, Mr. and Mrs. Roy Fetzer and family and other relatives spent Sunday afternoon at the Merrill Lucas home at Mill Hall.

Mrs. Hicks of State College accompanied her son Howard and family to our church on Sunday. Visitors at our church are always welcome.

Mrs. Ruth Johnson, Mrs. Myda Leathers and Mrs. Ethel Watson made a business trip to Bellefonte on Saturday.

Fighting in Burma

(Continued from page one) cleared out their section so that Weston's platoon was engaging most of the enemy. He ordered his walkie-talkie radioman to ask for mortar fire from the Marauder positions across the river.

Lt. Woomer, known to the jungle fighters as "Woomer the Boomer," sent his crew into action, and the shells rained down on the Japs. "Nice going, boys," he was told by the platoon radioman, "we just saw a couple of Japs blown out of their holes 40 yards from our point man."

When the order came to withdraw, Lt. Woomer covered the crossing of the river with a series of smoke shells from the mortars. The mission was successfully completed.

Lt. Woomer was inducted into the service on April 24, 1941, and from New Cumberland was assigned to the Infantry. He was sent to Camp Croft, S. C., and after receiving basic training was on maneuvers in Virginia, North Carolina and Tennessee. From there he was sent to Livingston, La., and on September 2, 1942, he entered officers' training school at Ft. Benning, Ga. After graduating on December 7, 1942, he was assigned to overseas duty and on January 1943 he left for Australia.

From Australia he went to New Guinea and from there was sent into Burma. After a short time in Burma he joined Merrill's Marauders, and has been with that group ever since.

COWS NEED ATTENTION DURING SUMMER MONTHS

Daily cattle on pasture need plenty of water and shade during warm weather, County Agent R. C. Blaney points out. A large-sized cow producing heavily will drink from 150 to 300 pounds of water every 24 hours and the consumption of water increases as the temperature goes up.

Water should be provided in such a way that it is available to the cows when they desire it. If it is necessary to provide water in tanks or troughs these containers should be kept clean. Watering tanks should be cleaned at least every two weeks during hot weather.

If a cow is to consume all the water necessary for capacity milk production, the water must be fresh and clean. Cows will drink more water between 6 and 9 p. m. than at any other time of day.

Cows suffer as much from extreme heat as from extreme cold. Shade should be provided for all cows on pastures, either from shade trees or sheds open on all sides.

Flies are one of the most bothersome of cow pests during the summer. Cows that are given protection from flies will produce better and there will be less danger of milk contamination. A cow to produce full capacity must be comfortable. Many of the little things like water, shade, and flies are overlooked by some dairymen during the press of the summer work on the farm.

Accidents Many a serious misstep can be avoided when going down into a dimly lighted basement if the lower cellar step is painted white.

Tinware For cleaning tinware use a damp cloth dipped in common soda, and rub thoroughly. Follow by washing and wiping dry, and it will remove all stains.

Hard work makes almost any job easy, but putting off makes an undertaking almost impossible of accomplishment.

HEALTH & BEAUTY

CARE OF CHILDREN

It seems almost incredible that, in a time like this, there is so much mismanagement of little children. Poor, helpless creatures, many of them are doomed to go through life with weak eyes, undernourished bodies, defective bones, indigestion and crooked brains, all on account of parents who were too ignorant and indifferent to give their offspring a chance to grow into strong, normal, human beings, mentally and physically.

Countless children are suffering from ailments that are preventable. It is the bounden duty of every mother to study child care and to guide and guard her children from the ill—mental, moral and physical—that threaten them. Even the animals of the forest often bestow upon their little wild offspring more intelligent and affectionate care than some human mothers.

Many helpless babes have cigarette smoke puffed in their faces by their mothers, even when nursing at the breast. Thus the mothers compel the babies to breathe into their lungs air which is so poisonous that if it were blown upon the delicate insects that feed upon plants, it would kill them.

Dr. J. H. Kellogg, of the Battle Creek Sanatorium, forbade smoking in the buildings or upon the extensive grounds. He said that he did not want his patients poisoned by tobacco smoke. However, smoking was allowed in the greenhouses for the purpose of killing bugs and insects upon vegetation.

Mothers should inform themselves about the food that children should eat. It is more essential for the child than for the adult. Their bodies are growing and developing. The child not only needs carbohydrates, fats, and proteins, but he needs a sufficient amount of minerals and vitamins, if he is to build calcium into his bones, strengthen the heart, and nourish his muscles and nerves.

Carbohydrates are found in sugars, starches, bread, cereals, vegetables, fruits and milk. Buttery, cream, egg yolk and the fat part-of-meat supply the necessary fats. Protein is essential to proper growth and development. It is chiefly obtained from milk, eggs, meat, and fish.

Lime, or calcium, and phosphorus must be obtained by the body in order to build strong bones and teeth. Unfortunately the rice that

we eat has had all the valuable minerals and vitamins removed by milling. This is done so that it will remain for an indefinite time on the grocery shelves, undisturbed by bugs. Bugs would starve to death on

it, so they let it alone—and you feed this denatured and devitalized food to your children, along with white flour and pearl grits that have been left after the milling process—as poverty stricken, so far as food

values go. Don't let all the "babysitters" about enriched flours, breads and so on fool you. The natural minerals and vitamins that God put into grains before the vital proteins, minerals,

and vitamins were removed and chemicals substituted. Insist on feeding your family upon foods that contain all the original substances that nature built into them from the good soil.

Advertisement for A&P Super Markets. Features a woman with a shopping basket and the slogan 'It's time to turn to A&P SUPER MARKETS'. Text includes: 'IF YOU WANT TO BE EFFICIENT', 'Careful and efficient storekeeping has enabled A&P to conduct its business at less expense than is usual to the grocery business. This means that A&P Super Markets can afford to sell for less than average prices. Years ago, A&P reasoned that America's families were more interested in getting the most food possible for their money than they were in receiving costly services. And A&P's endless seeking out of ways to sell foods at less expense has resulted in saving after saving for its customers. Today, when getting the most for every dollar spent is so important to wives and mothers, millions agree... "It's time to turn to A&P."'
