Rev. W. K. Hosterman is conducting a daily vacation church school in the College township grade school for two weeks. The school will close on Friday.

LETTER READ AT COUNCIL MEETING

Expanded industries. Chemical lime and limestone are vital in the manufacture of steel, synthetic rubber, plastics, acetone, gas, carbide, leather, drugs, glass and many other products that have gone to war. These basic war industries must be kept supplied with lime and limestone.

Despite the complicated problems of increasing production during these extremely trying times, we have continued our program of dust control. In 1941 a large collector was completed and put into operation on No. 2 rotary kiln. No new collectors were obtainable in 1942, but during the past year and up until the present, we have with great difficulty secured and installed three new collectors at an approximate cost of \$40,000. One of these collectors is a large unit for No. 3 rotary kiln, and will be in operation within a few weeks. The other two collectors are smaller in size. One of them has given excellent results and the other, while operating satisfactorily at the present time with a new type of filter recently obtained, has been a source of constant trouble because the manufacturers were unable to supply the correct type of filter for the particular type of dust at that installation.

Due to the different chemical and physical characteristics of the dust from collecting, future installations of collectors require considerable engineering study and tests. We have made real progress in the last year or so, considering the difficulties now existing with respect to solving our engineering problems and obtaining proper equipment, and we propose to continue progressing to the best of our ability.

Respectfully yours, BELLEFONTE DIVISION WARNER COMPANY, John Curtiss, Jr., Vice President.

Companies, making gobs of dough, can't beat a profit taxes by do-Mac Baney and Miss Florence Finch, netting some of the kale to local charities.

Charter No. 1212 Reserve District No. 3

REPORT OF CONDITION OF THE FIRST NATIONAL BANK OF CENTRE HALL

In the State of Pennsylvania, at the Close of Business on June 29, 1944. Published in Response to Call Made by Comptroller of the Currency. Under Section 5211, U. S. Revised Statutes.
