## "I CUT THE KIND OF PULPWOOD THAT WILL DO THE MOST GOOD"

"Cutting pulpwood is my share in winning the war and I aim to do my part here the way I want my boy to do his part over there.

"I'm not doing my best for myself or my country if I waste time cutting and hauling sticks of wood so crooked or rotted the mill can't use them. My pulpwood may be used to make supplies and equipment for my boy and only the best is good enough for him.

"I've found that cutting pulpwood is profitable business and I want to stay in it after the war. I want to be known at the mill as a producer of good sound usable wood."
