Out of a foxhole on to the doleis this what you want for YOUR boy?

NO! And it isn't what he wants, either. Is this what he's fighting for?

Yet what else can you or he hope for under the present administration that fears peace, a fear instilled by eight years of failure to make a single job, though it spent billions without hindrance on its crack-pot, phony "pump priming" theories?

What else can you expect of an administration that created class consciousness, that has set friend against friend-an evil that never before existed in America?

This is the administration that has had unbridled powervested in one man whose very whims he makes law under the thin guise of wartime economic necessity.

Yet, after eight years of such arrogant power, ten millions of people remained jobless. It took a war to provide jobs. Must we have war to make jobs? Maintain jobs?

No! A sane government, a government that cooperates with industry, labor and capital, will make this the land of sound prosperity... the land to which YOUR boy can return knowing he will partake of that prosperity and security under free government.

If you want that kind of government . . . if you want your boy to enjoy the just fruits of his gallant sacrifices

leaving the patient very weak Quartan malarial fever is caused

hence the term quartan.

these tests.

with one group of these parasites, the

paroxysms occur every fourth day,

Subtertian malaria is a more severe form than either of the above. When a member of your family gets sick, send for a doctor. If the physician can come, and he finds that the subject has symptoms of malaria, he will, if possible, learn

If this can be ascertained he will know exactly how to proceed. Sometimes the services of a doctor cannot be secured. This is especially

laria is very prevalent. In such cases

there is no means at hand with which to examine the blood, as it requires an expert technician to make

However, the chill of fever, follow-

ed by sweating, usually means the

Quinine is the best remedy yet dis-

overed for the treatment of all

orms of malaria. Fortunately it is

not dangerous to administer it to sick

people. It is often given in fevers of an uncertain type, when the doc-

tor himself cannot be quite sure of the diagnosis. If it is caused frem

nalaria, the fever will clear up when linine is properly administered. If

he parasites have been found in the

blood and the class to which they

belong identified as Tertian, the pa-

tient should be put to bed, and treat-

ment instituted as follows: Give

adults fifteen grains a day of quinine

hydrochloride. This must be divided

into three doses, and taken, prefer-

ably, after eating some food. When

the temperature becomes normal,

give 15 grains a day for four days

Quartan malaria requires rest in

bed, and at least 18 grains of quinine

ngth of time as for tertian.

ydrochloride a day for the same

Subtertian malaria is a still more

evere infection, and requires larger

oses of quinine than the above. This

form must receive from 10 to 20

grains of quinine a day. It should be

When the form of malaria is not

known, it is safe to give adults 20

rains of quinine a day until clear of

COMPLETE INSURANCE SERVICE

THIS MAN HAS "PULL"!

TE ALONE among the 135,000,000 of us can get what he wants, when he wants it. New tires, Gasoline. Shoes. Telephone service

Nearly all the manufacturing facilities of the producers of telephone equipment, in fact, are still busy keeping ahead of his needs for special communication and secret, electronic equipment.

This is why there's a waiting-list for home telephone service . . . and why we're short of switchboards, cable, telephone instruments, and 101 other things to meet the needs of more than 80,000 patient people in this State alone.

THAT'S NOT THE WHOLE STORY . . .

After civilian equipment is produced, there's the tremendous job of fitting this new equipment into the living mechanism of the telephone system. Miles of cable must be laid under city streets and along country roads. Hundreds of switchboards must be installed. Buildings must be enlarged or built again.

Yes-it's a tremendous job. But it's right down our alley, and we'll get it done.

MEANWHILE-

you bet your life-only GI Joe has "pull."

BELL TELEPHONE COMPANY OF PENNSYLVANIA
