# HOW ANTS CROSS A STREAM

The insect known as the driver ant is a more ferocious creature and perhaps more to be feared than even he wild animals and cannibals of Africa. They travel like soldiers, in columns, and the order of march is perfect. Their numbers are so large as to be considered only in astro-

nomical figures. Nothing is left in their path, Even if they encounter an elephant there will be nothing left of it after they pass except a mass of whitened bones. Natives, noting the approach of the driver ant army, leave their villages and flee in terror. When they return all livestock of every description has completely vanish-

When the marching column come o a stream the ants unite and form hemselves into balls, some as large is hornet's nests, and roll out upon he water. A given point on the ther shore is attained with uncanny

And Brachbill's Yuletide Wish is That the New Year Bring Peace to Every Land

We salute the homemakers of America. . . the women who have done so much to bring peace nearer. In saying "Merry Christmas" we want to convey to the homemakers of Bellefonte our appreciation of their cooperation with us, as a home store. We know we have not been able to render them the service they have learned to expect . . . we know that we did not always have just what they wanted . . . but we hope to make amends when America can again concentrate upon the needs of a nation at peace, rather than upon the requirements of a wartime world.

Another Christmas . . . another year drawing to a close . . . a new year dawning which is different from the last three wartime years because it brings to us all the hope of a year of peace . . . of a better world to come.
