By BILL MONSELL

When officials are done investigating basketball "fixes" in New York State, they might start on the faculty-varsity games at the Bellefonte High School. The contest last Tuesday night would have given detectives something to sink their teeth into. After a final ten seconds which lasted approximately ten minutes the faculty came from behind to tie the score, 54-54, as the final buzzer sounded. At the end of the first half Referee John Miller was heard to advise Faculty Captain Jam Harsanyi to use six men hereafter, only to be informed the faculty had used six men during the second quarter. By the fourth quarter both teams had herds of players roaming on the floor. Musical entertainment was provided by Maestro Ralph Dale no decision has been reached and his Faculty Four-Harold whether to permit a milk price in- Wion, Bruce Garner, Bill Rider, and Bob Laredo.

A TYPICAL BLACK WALNUT DROP-FRONT DESK

It is open to show how its front is partially supported by the top of its table-like base. Beside it are a pair of painted side chairs. Their slightly saddled wooden seats and plainly turned but flaring legs show them to be late examples of the Windsor chair, made about the same time as the desk.

Then about 1840 a new variation inches tall by ten inches deep and

College, announced recently the op- note that there are 29 vehicles on They were fall-front, fold-over writ- width drawer. The desk shown here and so has a slight downward slope. The writing area is covered with green baize, framed at front and sides with a three-inch wide wooden banding. The desk interior is compartmented with a varied arrangement of pigeon-holes, small drawers and a central open space for writing accessories. The flat. slightly overhanging top is hinged at the rear and gives access to a shallow well for storing papers and

To secure the drop-front when closed, a lock is set in a centered mortice. The keyhole is trimmed with an inset metal surround and the key serves as the handle for opening the desk. With a more elaborate example, the keyhole would be apt to have a stamped brass rectangular escutchem.

The table-like lower part is about 20 inches deep an 6 'he single drawer has a pair of nashroom-turned wooden knobs and a reyhole matching that of the drop-f-ont. The legs with their long square sections and simple turnings are characteristic of the period. Such desks with some variations

in details of design were made from about 1840 until 1870 by local cabietmakers who still worked in the maller towns and villages. They can be identified by the evidence of handwork to be found on their interior parts. Later ones were made y the early furniture factories. With the latter, indications of machine planing can be seen on the back boards and-machine work will also be found in the dovetailing of
