SMULLTON

Since last week John Bright of this place, RD, has suffered much from influenza. He is scarcely able to be about. Was under the doctor's care part of the time.

Up to now not much gardening was done.

Harold Brungart and his helper did some cloverseed sowing last week in the wheat fields.

A number of farmers did a lot of sod plowing preparatory to corn planting in the beginning of May. We were glad to have had some days of sunshine toward the close of last week. It was no wonder that many of our folks were suffering from bad colds, flu, grippe, and other internal disorders, throughout this community, because of not enough sunshine.

Some social troubles occurred in this community last week, so we were informed in the Centre Daily Times.

Sunday School next Sunday in the St. Paul's Evangelical U. B. Church near Logan Mills at 9:30 a.m. Preaching at 6:30 p.m.

Church services next Sunday at Wolf's Store in God's Missionary Church: Sunday School at 9:30 a.m. Preaching services and morning devotions at 10:30 a.m. Young Peoples meeting at 7 p.m., followed by preaching and evangelistic services at 7:30 p.m.

Members and Sunday School pupils of this place of the Rebersburg EUB Church will have Sunday School next Sunday at 9:30 a.m. followed by preaching services at 10:30 a.m.

Some one informed us that a certain farmer in Sugar Valley did plowing on Sunday. This farmer should seigh John 5: 39 whether a person should plow on Sunday. Why should parents with their children go to church and Sunday School on Sunday? What did our Saviour tell us to do on Sunday?

He gets a picture of the weather by Long Distance

Tomorrow's weather is on the wires today for the forces which guard this Nation's skies and shores.

Today the largest Long Distance network of its kind brings them detailed "isobar" weather charts around the clock.

These charts are sent by a system known as "facsimile" from the Weather Analysis Center in Washington, D.C. There, an electric eye scans the weather "picture" as it turns on a special drum. The signal waves produced go out over thousands of miles of wire to military installations throughout the country where the picture is automatically reproduced.

This weather network was designed and completed in less than two years. It's another demonstration of the importance of Long Distance to the security of our Nation.

To help speed your Long Distance call, please give the operator the out-of-town telephone number.
